The Architect's Legal Handbook is the established leading textbook on law for architectural students and most widely used reference on the law for architects in practice. This eighth edition includes all the latest developments in the law that effect an architect's work. A key addition is a greatly expanded section on adjudication - a topic that has become hugely important in the last few years. The book also builds on the comprehensive coverage of all UK law,

with editors for Scotland and Northern Ireland expanding their sections.  
Surveyor DIANE Publishing  
 Reviews the circumstances surrounding the Challenger accident to establish the probable cause or causes of the accident. Develops recommendations for corrective or other action based upon the Commission's findings and determinations. Color photos, charts and tables.

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small

agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.
