*Jewish Languages from A to Z* A&C Black

The goal of the volume is to shed fresh light on Modern Hebrew from perspectives aimed at readers interested in the domains of general linguistics, typology, and Semitic studies. Starting with chapters that provide background information on the evolution and sociolinguistic setting of the language, the bulk of the book is devoted to usage-based studies of the morphology, lexicon, and syntax of current Hebrew. Based primarily on original analyses of authentic spoken and online materials, these studies reflect varied theoretical frames-of-reference that are largely model-neutral in approach. To this end, the book presents a functionally motivated, dynamic approach to actual usage, rather than providing strictly structuralist or formal characterizations of particular linguistic systems. Such a perspective is particularly important in the case of a language undergoing accelerated processes of change, in which the gap between prescriptive dictates of the

Hebrew Language Establishment and the actual usage of educated, literate but non-expert speaker-writers of current Hebrew is constantly on the rise.

*Hebrew for Life* Walter de Gruyter

Using long-ignored constitutions of various Jewish organizations, this unique book uncovers the political history of Canadian Jewry since its beginning during the 1700s. Building on the premise that Jews, since time immemorial, have written down their values and ideologies, this study effectively demonstrates how these writings record the principles and values that motivated a community.

**Hebrew in Israel** John Benjamins Publishing Company

Ben-Yehuda's vision of a modern Hebrew eventually came to animate a large part of the Jewish world, and gave new confidence and pride to Jewish youth during the most difficult period of modern history, infusing Zionism with a dynamic cultural content. This book examines the many changes that occurred in the transition to Modern Hebrew, acquainting new students of the language with its role as a model for other national revivals, and explaining how it overcame many

obstacles to become a spoken vernacular. The author deals primarily with the social and political use of the language and does not cover literature. Also discussed are the dilemmas facing the language arising from the fact that Israelis and Jews in the Diaspora "don't speak the same language," while Israeli Arabs and Jews often do.

For many aspiring academics, the transition from doctoral student to classroom teacher is a challenging one. The classroom culture, the needed pedagogical skills, and the expected level and type of work are significantly different in the two environments. Nevertheless, most doctoral students go on to teach in undergraduate or seminary classrooms. To prepare the PhD students at McMaster Divinity College to negotiate this transition successfully, the faculty holds a biennial colloquium covering the major dimensions, both theoretical and practical, of a Christian teaching vocation. On the basis of the presentations of the colloquium, the essential topics have been addressed in essays prepared for this volume for the benefit of all who aspire to excellence in their teaching, especially those in Christian higher education.

*Linguistics in South West Asia and North Africa* Wipf and Stock Publishers

Hebrew is regarded as a former living language which ceased to be a native language 1800 years ago, only to be given a spoken function anew in the late 19th century. Since the re-acquisition of a lost colloquial function has never been documented, Modern Hebrew has become an object of fascination among linguists and laymen alike. In this book the author claims- Modern Hebrew is not a direct continuation of monolingual Semitic Hebrew- Modern Hebrew was created when Yiddish speaker re-lexified their language to Biblical and Mishnaic Hebrew- Yiddish is a Slavic language, derived from Sorbian and thus, Modern Hebrew is a Slavic Language These claims raise a number of interesting questions: why do most speakers believe that Modern Hebrew is a Semitic language, what are the contributions of Modern Hebrew to the typology of diglossia, historical and genetic linguistics, universal grammar, 2nd language acquisition and political science?

**Shapers of the Jewish Tradition** Gunter Narr Verlag

Colour Terms in the Old Testament Wayne State University Press

The OT semantic field of 'colour' is presented as a coherent, interdependent, and graded linguistic structure. The relevant lexical items are organized under the following categories: primary (basic) terms; secondary and tertiary terms; terms for pigments, dyes, painting and paints; and terms for stains, speckles, and other phenomena related to colour. Proper names, and names of objects which carry 'colour' associations are discussed as well. Many OT texts are discussed in detail. Finally, the OT colour field is compared to its Mishnaic Hebrew counterpart, and an Appendix dealing with the renewal of the same lexical sector within modern spoken Hebrew brings the study up to the present.

*An Essential Grammar* Routledge

This book is a selection of the papers presented at the International Symposium on the History of the Hebrew Language on 16-17 October 2012. The selection constitutes seven Israeli and two Turkish speakers. The subjects were chosen according to historical periods and contemporary relevance. As regards the ancient period, the contributors discuss the language of the Bible and the Mishnah, as well as that of the Dead Sea Scrolls, which provide an additional insight into what kind of Hebrew was used at the time of their writing. For the Middle Ages, the focus is on the Hebrew of the Genizah documents, mostly from Arabic speaking countries, and also on Hebrew printing in the city of Istanbul, which pioneered the first printing presses in the Ottoman Empire. With regard to the modern period, emphasis is placed on the renaissance of Hebrew, together with a comparison to the modernization of Turkish. Contributions to the symposium dealing with linguistics were devoted to the relations of Hebrew with Aramaic, on the one hand, and with Arabic on the other. A review of the current study of Hebrew in Erciyes and other Turkish universities provided a fitting conclusion to the programme. All in all, the symposium and the publication of its proceedings provided an introduction to the history of Hebrew as an ancient language revived today in the State of Israel.

**Handbook of Children's Literacy** Walter de Gruyter GmbH & Co KG

The Bible has played a critical role in the story of Judaism, modernity, and identity. Penny Schine Gold examines the arena of children's education and the role of the Bible in the reshaping of Jewish identity, especially in the United States in the 1920s and 1930s, when a second generation of Eastern European Jews engaged the task of Americanizing Jewish culture, religion, and institutions. Professional Jewish educators based in the Reform movement undertook a multifaceted agenda for the Bible in America: to modernize it, harmonize it with American values, and move it to the center of the religious school curriculum. Through public schooling, the children of Jewish immigrants brought America home; it was up to the adults to fashion a Judaism that their children could take back out into America. Because of its historic role in the development of Judaism and its cultural significance in American life, Gold finds, the Bible provided Jews with vital links to both the past and the present. The ancient sacred text of the Bible, transformed into highly abridged and amended "Bible tales," was brought into service as a bridge between tradition and modernity. Gold analyzes these American developments with reference to the intellectual history of eighteenth- and nineteenth-century Europe, innovations in public schooling and social theory, Protestant religious education, and later versions of children's Bibles in the United States and Israel. She shows that these seemingly simple children's books are complex markers of the pressing concerns of Jews in the modern world.

This edited volume brings together ten compelling ethnographic case studies from a range of global settings to explore how people build metalinguistic communities defined not by use of a language, but primarily by language ideologies and symbolic practices about the language. The authors examine themes of agency, belonging, negotiating hegemony, and combating cultural erasure and genocide in cultivating meaningful metalinguistic communities. Case studies include Spanish and Hebrew in the USA, Kurdish in Japan, Pataxó Hãhãe in Brazil, and Gallo in France. The afterword, by Wesley L. Leonard, provides theoretical and on-the-ground context as well as a forward-looking focus on metalinguistic futurities. This book will be of interest to interdisciplinary students and scholars in applied linguistics, linguistic anthropology and migration studies.
