Creating a Portfolio * Getting Work When it comes to comic books, one name says it all: Stan Lee. His characters are classics. His industry knowledge is vast. His creativity is boundless. And now, he's sharing what he knows with you, Grasshopper! His cohorts have always been—and still are—some of the best in the business: Jack Kirby, John Romita, Sr., Neal Adams, Gil Kane, Mike Deodato, Jr., Frank Cho, and Jonathan Lau, and many others, Stan includes their work here and discusses what exactly makes it so great. He touches on all the important stuff: anatomy, foreshortening, perspective, action, penciling, inking, hand lettering vs. digital lettering, color, character and costume design, panel flow, materials and tools, computers, file formats, and software. He includes an overview of the history and development of the comic book industry, and there's an extensive section on various types of covers—the super important element that makes the reader want to pick up that comic! In a world where good battles evil at every turn and the hero fights valiantly to get the girl, no stone is left unturned! Here you'll also find info on all the small details—that really aren't so small: word balloons, thought balloons, whisper balloons, bursts, sound effect lettering, and splash pages! And KA-BLAMMM! . . . once you've created your art, then what? Lest you think Stan would turn you out into the wilderness without a road map, fellow traveler, there's also information on preparing and submitting your portfolio, on getting work, and on suggested reading and schools. Stan Lee's How to Draw Comics features a cover that reunites long time collaborator John Romita Sr. and original cover artist of How to Draw Comics the Marvel Way. John Romita Sr. was most famous for his collaboration on The Amazing Spider-Man with Stan Lee! It's time for a new approach . . . "a cornucopia of cutting-edge, techno-savvy instructions to lead you down the freshly laid yellow brick road of creativity." It's time for a book that takes you on the new journey of creating comic books for the 21st century and beyond! Excelsior!

The Step-by-Step Way to Draw Unicorns, Elves, Cherubs, Trolls, and Many More Human Anatomy Made Amazingly Easy

The daily lives of ordinary people are replete with objects, common things used in commonplace settings. These objects are our constant companions in life. As such, writes Soetsu Yanagi, they should be made with care and built to last, treated with respect and even affection. They should be natural and simple, sturdy and safe - the aesthetic result of wholeheartedly fulfilling utilitarian needs. They should, in short, be things of beauty. In an age of feeble and ugly machine-made things, these essays call for us to deepen and transform our relationship with the objects that surround us. Inspired by the work of the simple, humble craftsmen Yanagi encountered during his lifelong travels through Japan and Korea, they are an earnest defence of modest, honest, handcrafted things - from traditional teacups to jars to cloth and paper. Objects like these exemplify the enduring appeal of simplicity and function: the beauty of everyday things.
