 Figure 1  
 Definition of API starting material  
 Definition of API starting material (ICH Q7A 1.3, see chapter E.6 ICH Q7A: Good Manufacturing Practice for Active Pharmaceutical Ingredients)  
 An "API Starting Material" is a raw material, intermediate, or an API that is used in the production of an API and that is incorporated as a significant structural fragment into the structure of the API.  
 Active Pharmaceutical Ingredients  
 Pharmaceutical raw materials include both active pharmaceutical ingredients (API) and inactive ingredients or excipients. API are bulk drugs that are pharmaceutically active and generate a desired pharmacological effect, whereas, excipients are pharmacologically inactive substances that are generally used as a carrier of the API in the drug.  
 Active Pharmaceutical Ingredients (API) Micronization ...  
 Active Pharmaceutical Ingredients are a biologically active part of drugs that produce/suppresses specific effects to cure symptoms or disease. API manufacturing in India has become cheaper in terms of overall cost, employment, and drug discoveries.
