Non-Calculator This book supports students preparing for the OCR GCSE exam. The practice papers in the book are carefully modelled after past papers and specifications of exam board to ensure that the papers as a whole provide a rich and varied practice to meet all requirements of GCSE mathematics with an appropriate difficulty. Papers are designed to teach students the most easily applicable, reusable and fastest solutions to typical problems, and utilise problems which target areas of maths which students typically forget under the pressure of an exam. Solutions provided have been reviewed by many students to ensure that they are easily understandable while being the fastest and most re-applicable. GCSE Mathematics for OCR Foundation Student Book

New 2017 Cambridge A Level Maths and Further Maths resources to help students with learning and revision. Written for the OCR A Level Further Mathematics specification for first teaching from 2017, this print Student Book covers the Pure Core content for the second year of A Level. It balances accessible exposition with a wealth of worked examples, exercises and opportunities to test and consolidate learning, providing a clear and structured pathway for progressing through the course. It is underpinned by a strong pedagogical approach, with an emphasis on skills development and the synoptic nature of the course. Includes answers to aid independent study.

Exam Board: OCR Level: GCSE Subject: Mathematics First Teaching: September 2015 First Exam: June 2017 ENDORSED FOR OCR Build your students' knowledge and understanding so that they can confidently reason, interpret, communicate mathematically and apply their mathematical skills to solve problems within mathematics and wider contexts; with resources developed specifically for the OCR GCSE 2015 specification by mathematics subject specialists experienced in teaching and examining GCSE. - Supports you and your students through the new specifications, with topic explanations and new exam-style questions, written in line with the new assessment objectives. - Measure progress and assess learning throughout the course with graduated exercises and worked examples. - Enables students to identify the appropriate remediation or extension steps they need in order to make the best progress, through easy to follow progression strands that help to identify gaps in learning. - Supports all abilities and provides full coverage of the GCSE grade range with three books, meaning that content is focused at the

right level for each student. - Offers a seamless five year progression when used in conjunction with KS3 Mastering Mathematics.

The administration of examinations for 15-19 year olds in England Nelson Thornes

Written to support and enhance assessment alongside the pupil texts, these resources offer a range of material for the OCR specification. They provide test questions for each chapter together with detailed mark schemes to make assessment easy. Two versions of each question are provided, one allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organised by unit/chapter is also included in this resource.

Free Standing Mathematics Qualification, Level 3 Hachette UK
Exam board: OCR Level: A-level Subject: Mathematics First teaching: September 2017 First exams: Summer 2019 Benefit from the expert input of experienced examiners and subject specialists including Heather Davis in this assessment-led Practice Book; tailored to the new 2017 specifications and packed with exam-style questions. - Thoroughly prepare your students for the exam with over 200 exam-style questions that are matched to the new specifications. - Provide structured support and extra practice with questions focused on problem-solving, modelling and technology. - Create opportunities for self-directed learning and assessment with answers at the back of the book, plus full step-by-step worked solutions and mark schemes supplied online. - Enhance learning with extra practice designed to supplement the textbooks and the My Revision Notes series.

Additional written evidence is contained in Volume 3, available on the Committee website at www.parliament.uk/educom
Issues and Techniques HarperCollins UK

The aim of this book is to provide an accessible text for students, covering each of the elements in the OCR GCSE (9-1) Computer Science specification J276. It will be invaluable both as a course text and in revision for students nearing the end of the course. It is divided into eight sections, each broken down into manageable chapters of roughly one lesson. Sections 5 and 6 of the textbook cover algorithms and programming concepts with a theoretical approach to provide students with experience of writing, tracing and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience. Each of the eight sections cover one of the major topics in this course, and each subtopic contains sample examination questions from past papers, which can be set as homework.

Key Maths Salem Press

There are 15 GCSE Mathematics higher papers and answers in this book. These are 5 sets of papers 1, 2 & 3 written as practice papers for GCSE Mathematics Higher Examination in May / June 2021. Papers are mainly focusing on Edexcel, AQA & OCR GCSE examinations as well as other similar examination boards.

Decision Mathematics Nelson Thornes

This book supports students preparing for the OCR GCSE exam.
