Stock indexes are the only asset class that have a predictably upward bias over time, making them favorable trading vehicles. E-mini Stock Index Futures trade at a fraction of the cost of regular futures. Micro E-mini Stock Index Futures trade at only one-tenth the cost of the E-minis, making them a good "stepping stone" for less experienced traders. The author has created three models to profitably trade both types of e-minis in trending and non-trending markets, as well as all levels of market corrections. He has successfully traded these models for more than seven years. With Model 1 and Model 2 it is reasonable to earn an average of \$4,000 a month with the e-minis and \$400 a month with the micro e-minis, trading only one contract on a part-time basis. There are guidelines to assist the newer trader in proceeding safely and methodically and growing his or her account with minimal risk. You can begin trading the micro e-minis with as little as \$1500. All information necessary for your success is in this book.
