This volume offers an overview of the context of internationalisation in which plurilingualism becomes a strategic axis for universities and in which university language centres serve as the key

instrument to implement this process. It focuses on three key areas in which language centres are working together with governments across Europe, namely: language policy and internationalisation; specific training for the university community; and language testing and accreditation. The contributors to this book are all policy makers, instructors or evaluators from university language centres involved in the internationalisation of their institutions through languages. They teach and evaluate not only 'regular' students, but students with very specific needs, such as lecturers delivering content courses in English, students in mobility programmes or administrative staff in contact with international students. The book also includes the presentation of the first national higher education language policy in Europe, developed by the Language Policy Commission of the Board of Rectors of Spanish Universities and endorsed by all public and private universities in Spain.

The International Society for Military Ethics in Europe (EuroISME) dedicated its 4th annual conference, held May 25-28, 2014 in Koblenz, to the topic of "Didactics of military ethics: from theory to practice". Even though some contributions also take a theoretical approach to this subject,

these proceedings nevertheless intend to provide helpful suggestions regarding the practical communication of findings on military ethics and thus try to encourage a wider debate.

The three pocketbooks comprising the 'English Through Pictures Series' are the remarkable invention of I A Richards and Christine Gibson, who designed them to help the learner speak, read and write English in the quickest and clearest possible way -- through pictures. The authors have made a careful selection of the most widely useful English words, choosing those with the power to define other words, and have put them to work in key patterns that offer the learner the ability to communicate successfully in English. Book 1 contains a vocabulary of 250 such words, with an additional 500 developed in Book 2; these 750 words are then used in Book 3 to build a command of 1000 words which, by their defining power, hold the possibility of understanding as much as another 20,000 words of English. Throughout 'English Through Pictures', responsibility for learning is placed directly on the learner, who from the very start enjoys the ability to put essential words to work creating key sentence patterns where meaning is clearly shown in pictures. These simplified drawings allow learners to focus on the

sentence and to enjoy growing confidence as they successfully take control of language, with the workbooks in Books 1 and 2 challenging and reinforcing their growing competence as both speakers and readers. Motivated and inspired, learners will soon find to their delight that fluent communication in English -- the common language of today's world -- lies well within their grasp. 'English Through Pictures' has already been used successfully by millions of learners in over forty countries.
