## **MASON PITTS**

---

The Tongue and Quill Oxford University Press, USA

Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial

intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. *Autonomous Horizons: The Way Forward* identifies issues and makes recommendations for

the Air Force to take full advantage of this transformational technology.

The Story of How Johnny Mitchell and His Fighter Pilots Took on Admiral Yamamoto and Avenged Pearl Harbor Rowman & Littlefield

Large Print. Arthur Dare and Susan Aragon, political rivals for the California Governorship fall in love at the starts of their campaigns. They pledge a clean campaign that sticks strictly to the issues, knowing it's all but impossible. They oppose each other on most political issues. Perhaps opposites do attract. Their romance catapults them from also-ran to front-runner status. When they meet for paparazi covered dates, and along the political trail, the candidates debate the major issues facing

California. They actually agree on some things, but neither is afraid to oppose the other, and neither fears political bosses, or even the public. Refreshingly, they say and do what they believe is right for California. Behind the scenes, their organizations cause each other vast trouble, driving the candidates apart. It's hard to contain their passionate staffs. Unauthorized mud flies. There is far more at stake than mere issues. Powerful, national, criminal forces abound, seeking to make thousands of billions. First, California will have to elect the 'right' governor, not one of this new pair of romantics. Developers covet the land occupied by a large city's downtown airport. Secret international energy forces oppose drilling rights and solar and wind farms

that might harm wildlife. A mastermind, who is a US Senator, may have been caught committing a murder in a limo, via a traffic vivillante's camera, or was it really him? Flash Points opens locked doors and takes you behind the political scenes, into the intrigue and major deal making inherent there. Nothing political happens by coincidence. So, who will be Governor and who will be First Spouse? At the last debate, Susan is slightly ahead, but she commits political suicide and then rips out a speech that may save the day. "Sweet fancy mother of Moses, she does have a flair for the dramatic!" a national commentator exclaims on TV. Even Arthur stands to applaud her. They figure they will be about ten votes apart in November. Will David Mitchell, author, loves answering

every one of your emails personally. He even answers for his characters, adopting their points of view. His characters get websites and email addresses, to help flesh out the book and keep its size manageable. If you love this twisty tale, there are others by Will David Mitchell at MachBooks.Com, with new arrivals about once a month for your enjoyment. Enjoy!

2021-2022 Walter de Gruyter

Compared to armies and navies, which have existed as professional fighting services for centuries, the technology that makes air forces possible is much newer. As a result, these services have had to quickly develop methods of preparing aviators to operate in conditions ranging from peace or routine security to full-scale war. The first book to address the history and scope of air power professionalization through learning programs, *Educating Air Forces* offers valuable new insight into strategy and tactics worldwide. Here, a group of

international experts examine the philosophies, policies, and practices of air service educational efforts in the United States, France, Italy, Germany, Australia, Canada, and the UK. The contributors discuss the founding, successes, and failures of European air force learning programs between the Great War and World War II and explore how the tense Cold War political climate influenced the creation, curriculum, and results of various programs. They also consider how educational programs are adapting to soldiers' needs and the demands of modern warfare. Featuring contributions from eminent scholars in the field, this volume surveys the learning approaches globally employed by air forces in the past century and evaluates their effectiveness. *Educating*

Air Forces reveals how experiential learning and formal education are not only inextricably intertwined, but also necessary to cope with advances in modern warfare.

#### Congressional Record World Book

The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve

Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

#### **Dial Up!** Yearling

Charlotte Perkins Gilman's 1892 short story, The Yellow Wallpaper is a valuable piece of American feminist literature that reveals attitudes toward the psychological health of women in the

nineteenth century. Diagnosed with "temporary nervous depression - a slight hysterical tendency" by her physician husband, a woman is confined to an upstairs bedroom. Descending into psychosis at the complete lack of stimulation, she starts obsessing over the room's yellow wallpaper: "It is the strangest yellow, that wall-paper! It makes me think of all the yellow things I ever saw - not beautiful ones like buttercups, but old foul, bad yellow things. But there is something else about that paper - the smell! ... The only thing I can think of that it is like is the color of the paper! A yellow smell."

**Earthrise** eBook Partnership

This book, Space Capstone Publication *Spacepower: Doctrine for Space Forces*, is capstone doctrine for the United

States Space Force and represents our Service's first articulation of an independent theory of spacepower. This publication answers why spacepower is vital for our Nation, how military spacepower is employed, who military space forces are, and what military space forces value. In short, this capstone document is the foundation of our professional body of knowledge as we forge an independent military Service committed to space operations. Like all doctrine, the SCP remains subject to the policies and strategies that govern its employment. Military spacepower has deterrent and coercive capacities - it provides independent options for National and Joint leadership but achieves its greatest potential when integrated with other forms of military

power. As we grow spacepower theory and doctrine, we must do so in a way that fosters greater integration with the Air Force, Army, Navy, Marine Corps, and Coast Guard. It is only by achieving true integration and interdependence that we can hope to unlock spacepower's full potential.

Is interrogational torture effective? What  
do we mean by 'effective'? How brutal  
can torture get and still be considered  
justifiable? In this book, John W.  
Schiemann adopts game theory in an  
attempt to answer these questions,

walking the reader through the logic of interrogational torture - and finding that it is far more brutal than proponents believe.

*Space Capstone Publication Spacepower Crown*

Jenny Betteridge launches her first collection of short stories, including two prize-winning tales. Jeff and Susie have been together for 10 years and live in their own separate homes, staying with each other at weekends. Geoff thinks it's an ideal arrangement; he doesn't have to put up with Susie's nagging. But Susie has other ideas. Chrissie, a young teacher, meets one of her ex-pupils when he offered her a lift on a rainy night. They fall in love, but Connor is 16 years her junior and their relationship is fraught with difficulties, especially when

Chrissie is introduced to Connor's mother. Ruth is regarded as odd by her young office colleagues because she is rather old-fashioned and lives alone with her cat. After humming an old song she heard on the radio, she starts receiving text messages containing lines from the song. But who is sending them? Exasperated by his wife Miranda's infidelities, Ben decides to consult a counsellor, Faith. But his visit to Faith lead to sinister and unexpected consequences. An Ideal Arrangement, Short Stories will take your mind on a roller coaster ride into the lives of everyday people, concealing unexpected twists and turns. Dare you take a glimpse into their lives?

Although the current world order is still dominated by the US, there is increasing international concern over the possibility of regional security dilemmas arising from smaller powers' attempts to develop Weapons of Mass Destruction. A study of US-North Korean interaction using the security dilemma as a conceptual frame of analysis is thus not only hugely topical, but also particularly relevant for the 21st century on theoretical as well as empirical grounds. Is there the prospect of a security dilemma contagion if North Korea acquire nuclear weapons capability leading to an Asia Pacific wide nuclear arms race? This book examines this contentious issue in-depth and explores the difficult choices policymakers face as a result of the uncertainty in

international politics.

Directory of American Scholars: History  
Causey Enterprises, LLC

This volume explores the interplay of syntactic variation and genre. How do genres emerge and what is the role of syntax in constituting them? Why do certain constructions appear in certain types of text? The book takes the concept of genre as a reference-point for the description and analysis of morpho-syntactic variation and change. It includes both overviews of theoretical approaches to the concept of genre and text type in linguistics and studies of specific syntactic phenomena in English, German, and selected Romance languages. Contributions to the volume make use of insights from attempts for text classification and rhetorical views

on genre and reach from quantitative, corpus-based methodology to qualitative, text-based analyses. The types of texts investigated cover spoken, highly interactive, and written forms of communication, including selected genres of computer-mediated communication. Corpus data come from both synchronic and diachronic linguistic corpora, such as LOB, Brown, FLOB, Frown, ARCHER, and ICE-Jamaica. This spectrum both in approaches and data is meant to provide a theoretical foundation as well as a realistic view of the inherent complexity of form-function relationships in syntax. At the same time, genre is treated as a category relevant beyond discourse studies, consisting of forms and conventions at all levels of linguistic analysis, including

syntax. The book is therefore of interest to linguists and graduate students in the area of syntax, discourse analysis, and pragmatics, as well as to sociolinguists and corpus linguists working on register variation.

Does oil wealth lead to political poverty?

It often looks that way, but Carbon Democracy tells a more complex story. In this magisterial study, Timothy Mitchell rethinks the history of energy, bringing into his grasp as he does so environmental politics, the struggle for democracy, and the place of the Middle East in the modern world. With the rise of coal power, the producers who oversaw its production acquired the ability to shut down energy systems, a threat they used to build the first mass

democracies. Oil offered the West an alternative, and with it came a new form of politics. Oil created a denatured political life whose central object – the economy – appeared capable of infinite growth. What followed was a Western democracy dependent on an undemocratic Middle East. We now live with the consequences: an impoverished political practice, incapable of addressing the crises that threaten to end the age of carbon democracy – namely, the disappearance of cheap energy and the carbon-fueled collapse of the ecological order.

#1 NEW YORK TIMES BESTSELLER • A special 20th anniversary edition of the beloved book that changed millions of lives—with a new afterword by the author Maybe it was a grandparent, or a teacher, or a colleague. Someone older, patient and wise, who understood you when you were young and searching, helped you see the world as a more profound place, gave you sound advice to help you make your way through it. For Mitch Albom, that person was Morrie Schwartz, his college professor from

nearly twenty years ago. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded, and the world seemed colder. Wouldn't you like to see that person again, ask the bigger questions that still haunt you, receive wisdom for your busy life today the way you once did when you were younger? Mitch Albom had that second chance. He rediscovered Morrie in the last months of the older man's life. Knowing he was dying, Morrie visited with Mitch in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final "class": lessons in how to live. Tuesdays with Morrie is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world.

*Flash Points* Lulu.com

The Middle East is spinning out of control, but what does that mean to a simple fast-order cook in Central California? Everything-his family, his love life, his future, his purpose. And it may be that he means a great deal to the Middle East. Some are willing to kill him and others are willing to risk their lives to protect him. This adventure takes the reader to Turkey, Iran, and Arabia. Themes of historical religions of the Middle East, modern interpretations, truth, understanding, and what the future holds for this volatile region are interwoven throughout the book. Romance and its seeming impossibility provide a metaphor for all that is wonderful about this region, and all that may be suffocating hope. The unspoken

question through most of the book asks is something more happening as this adventure unfolds?
