farming techniques, the Ethiopian land tenure system and poverty. Continuing land degradation: Cause-effect in Ethiopia's ... Land degradation is a process in which the value of the biophysical environment is affected by a combination of human-induced processes acting upon the land. It is viewed as any change or disturbance to the land perceived to be deleterious or undesirable. Natural hazards are excluded as a cause; however human

activities can indirectly affect phenomena such as floods and bush fires. Land degradation - Wikipedia Ethiopia is among the poorest of countries and poverty and land and resource degradation appear to feed off each other. The irony is that Ethiopia is a country with high biodiversity and LAND DEGRADATION IN ETHIOPIA: ITS EXTENT AND IMPACT Land Degradation and Development published by John Wiley & Sons, Ltd. Introduction Soils have

played significant roles in the earth's life-support system through the provision of a multitude of essential ecosystem services (i.e. provisioning, regulating, cultural and supporting services) to humans and the environment (Keesstra et al., 2016b; Schwilch et al., 2016).
