Your Marriage God's Way Workbook W. W. Norton & Company

This wide-ranging collection analyzes the status and advancement of women both in a national context and collectively on a global scale, as a powerful social force in a rapidly evolving world. The countries studied—China, India, Indonesia, Iran, Egypt, Cameroon, South Africa, Italy, France, Brazil, Belize, Mexico, and the United States—represent a cross-section of economic conditions, cultural and religious traditions, political realities, and social contexts that shape women's lives, challenges, and opportunities. Psychological and human rights

perspectives highlight worldwide goals for equality and empowerment, with implications for today's girls as they become the next generation of women. Throughout these chapters, women's lived experience is compared and contrasted in such critical areas as: Home and work lives Physical, medical, and psychological issues Safety and violence Sexual and reproductive concerns Political participation and status under the law Impact of technology and globalism Country-specific topics Women's Evolving Lives is a forward-facing reference for psychology professionals of varied disciplines, as well as for colleagues in other fields, including women's and gender studies, sociology, anthropology, international studies, and education. The wide scope of concerns also makes this anthology relevant and instructive to readers in diverse non-academic settings.

During the colonial period in Guyana, the country's coastal lands were worked by enslaved Africans and indentured Indians. In "Creole Indigeneity," Shona N. Jackson investigates how their descendants, collectively called Creoles, have remade themselves as Guyana's new natives, displacing indigenous peoples in the Caribbean through an extension of colonial attitudes and policies. Looking particularly at the nation's politically fraught decades from the 1950s to the present, Jackson explores aboriginal and Creole identities in Guyanese society. Through government documents, interviews, and political speeches, she reveals how Creoles, though unable to usurp the place of aboriginals as First Peoples in the New World, nonetheless managed to introduce a new, more socially viable definition of belonging, through labor. The very reason for bringing enslaved and indentured workers into Caribbean labor became the organizing principle for Creoles' new identities. Creoles linked true belonging, and so political and material right, to having performed modern labor on the land; labor thus became the basis for their subaltern, settler modes of indigeneity. A contradiction for belonging under postcoloniality that Jackson terms Creole indigeneity. In doing so, her work establishes a new and productive way of understanding the relationship between national power and identity in colonial, postcolonial, and anticolonial contexts.

Routledge Handbook of Tourism and Sustainability from C. Michael Hall, Stefan Gössling, Daniel Scott is one of the winners of the ITB Book Awards 2016 in the category Specialist tourism literature! Sustainability remains one of the major issues in

tourism today. Concerns over climate and environmental change, the fallout from the global economic and financial crisis, and the seeming failure to meeting UN Millennium development goals have only reinforced the need for more sustainable approaches to tourism, however they be defined. Given the centrality of sustainability in tourism curricula, policies, research and practice it is therefore appropriate to prepare a state of the art handbook on the relationship between tourism and sustainability. This timely Handbook of Tourism and Sustainability is developed from specifically commissioned original contributions from recognised authors in the field, providing a systematic guide to the current state of knowledge on this area. It is interdisciplinary in coverage and international in scope through its authorship and content. The volume commences with an assessment of tourism's global environmental, e.g. climate, emissions, energy use, biodiversity, water use, land use, and socio-economic effects, e.g. economic impacts, employment and livelihoods, culture. This then provides the context for sections outlining the main theoretical frameworks and constructs that inform tourism and sustainability, management tools and approaches, and the approaches used in different tourism and travel industry sectors. The book concludes by examining emerging and future concerns in tourism and sustainability such as peak-oil, post-carbon tourism, green economy and transition tourism. This is essential reading for students, researchers and academics interested in the possibilities of sustainable forms of tourism and tourism's contribution to sustainable development. Its assessment of tourism's global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the sustainability

of tourism will be measured for years to come.

This text for pre-service and in-service English education courses presents current methods of teaching literature to middle and high school students. The methods are based on social-constructivist/socio-cultural theories of literacy learning, and incorporate research on literary response conducted by the authors. Teaching Literature to Adolescents – a totally new text that draws on ideas from the best selling textbook, Teaching Literature in the Secondary School, by Beach and Marshall – reflects and builds on recent key developments in theory and practice in the field, including: the importance of providing students with a range of critical lenses for analyzing texts and interrogating the beliefs, attitudes, and ideological perspectives encountered in literature; organization of the literature curriculum around topics, themes, or issues; infusion of multicultural literature and emphasis on how writers portray race, class, and gender differences; use of drama as a tool for enhancing understanding of texts; employment of a range of different ways to write about literature; integration of critical analysis of film and media texts with the study of literature; blending of quality young adult literature into the curriculum; and

attention to students who have difficulty succeeding in literature classes due to reading difficulties, disparities between school and home cultures, attitudes toward school/English, or lack of engagement with assigned texts or response activities. The interactive Web site contains recommended readings, resources, and activities; links to Web sites and PowerPoint presentations; and opportunities for readers to contribute teaching units to the Web site databases. Instructors and students in middle and high school English methods courses will appreciate the clear, engaging, useful integration of theory, methods, and pedagogical features offered in this text.

From Egypt to India, and from Botswana to London, worker, youth and middle class rebellions have taken on the political and bureaucratic status quo. When most people can no longer earn a decent wage, they pit themselves against the privilege of small, wealthy and often corrupt elites. A remarkable feature of the protests from the Arab Spring onwards has been the salience of images, songs, videos, humour, satire and dramatic performances. This collection explores the central role the aesthetic played in energising the massive mobilisations of young people, the disaffected, the middle classes and the apolitical silent majority. Discover how it fuelled solidarities and alliances among democrats, workers, trade unions, civil rights activists and opposition parties.

"Opinion polls, volatile voting patterns, and street protests

demonstrate widespread dissatisfaction with the current system, yet the popular response so far has largely been limited to the angry outcry of No! But negation, by itself, affects nothing. The dominant system doesn't dominate because people agree with it; it rules because we're convinced there is no alternative. We need to be able to imagine a radical alternative - a Utopia - yet we are haunted by the disasters of "actually existing" Utopias of the past century, from fascism to authoritarian socialism. In this re-issue of Thomas More's generative volume, scholar and activist Stephen Duncombe re-imagines Utopia as an open text, one designed by More as an imaginal machine freeing us from the tyranny of the present while undermining master plans for the future. Open Utopia is the first complete English language edition of Thomas More's Utopia that honors the primary precept of Utopia itself: that all property is common property. Open Utopia, licensed under Creative Commons, is free to copy, to share, to use. But Utopia is more than the story of a far-off land with no private property. It is a text that instructs us how to approach texts, be they literary or political, in an open manner: open to criticism, open to participation, and open to re-creation. Utopia is no-place, and therefore it is up to all of us to imagine it. In this volume ... Utopia is re-imagined and brought into the digital age as a participatory technology for undermining authority and facilitating new imagination"--Publisher's description

This practical manual of freshwater ecology and conservation provides a state-of-the-art review of the approaches and techniques used to measure, monitor, and conserve freshwater ecosystems. It offers a single, comprehensive, and accessible

synthesis of the vast amount of literature for freshwater ecology and conservation that is currently dispersed in manuals, toolkits, journals, handbooks, 'grey' literature, and websites. Successful conservation outcomes are ultimately built on a sound ecological framework in which every species must be assessed and understood at the individual, community, catchment and landscape level of interaction. For example, freshwater ecologists need to understand hydrochemical storages and fluxes, the physical systems influencing freshwaters at the catchment and landscape scale, and the spatial and temporal processes that maintain species assemblages and their dynamics. A thorough understanding of all these varied processes, and the techniques for studying them, is essential for the effective conservation and management of freshwater ecosystems.

Recent discussions of autobiographical writing have led to a new terminology (autographies, autre-biographies, nouvelle autobiographie, autofiction, faction, egolitterature, circonfession), and current approaches to autobiography and autofiction suggest that this literary field offers a renewal and even a revolution of life-writing. Exploring autobiographical expression from different perspectives, the thirty essays in this book were presented at an international conference held at Sodertorn University in 2014. As the essays in this anthology suggest, literary critics and authors alike are rethinking autobiographical writing and its definitions. Through the variety of papers, this anthology offers a thought-provoking overview of different approaches to autobiography and autofiction."

This book aims to provide the missing link in current debates around sustainability. The role of business, governments, NGOs and multilateral institutions are widely covered and many books discuss their possible actions, strategies and roles. But all of these organizations are made up of individuals. And it is individuals who will need to steer society and organizations toward a more just and equitable world. The book takes a holistic approach to sustainable development. The authors argue that this approach starts and ends with the human being. They believe that the personal dimension of sustainable development has been neglected and that it is clear that sustainable societies cannot be achieved without committed individuals who are convinced of the need to be part of the sustainability project. The authors frame their ideas around the Three Levels of Sustainability (TLS) framework which they argue addresses at least some of the weaknesses inherent in a fragmented approach to sustainability. Their approach encompasses societal, organizational and individual levels; and, by looking through the lens of how sustainability has evolved, provides a roadmap for producing the kind of leaders necessary for sustainable development in all of its dimensions – people, planet and profit. The focus on how the individual can contribute to these three dimensions is unique. To arrive at this multi-level and multi-dimensional framework, the book introduces and analyzes theories from sustainable development, corporate social responsibility and personal leadership and systemically looks for linkages between them that are useful for sustainability. This framework is placed firmly in its historical context. The authors are highly literate about the development and interpretations of

sustainability and bring us to their current position via informed discussions on the history of economics, business-and-environment, social development, the corporation and the profit principle, CSR, and measurement and reporting. The book has been designed as both a text for students as well as those already in management and leadership positions in the private, public or non-profit sectors and will also prove invaluable to those wishing to familiarize themselves with sustainability.

A comprehensive introduction to the syncretic religions developed in the Caribbean region Creolization—the coming together of diverse beliefs and practices to form new beliefs and practices—is one of the most significant phenomena in Caribbean religious history. Brought together in the crucible of the sugar plantation, Caribbean peoples drew on the variants of Christianity brought by European colonizers, as well as on African religious and healing traditions and the remnants of Amerindian practices, to fashion new systems of belief. Creole Religions of the Caribbean offers a comprehensive introduction to the syncretic religions that have developed in the region. From Vodou, Santería, Regla de Palo, the Abakuá Secret Society, and Obeah to Quimbois and Espiritismo, the volume traces the historical-cultural origins of the major Creole religions, as well as

the newer traditions such as Pocomania and Rastafarianism. This second edition updates the scholarship on the religions themselves and also expands the regional considerations of the Diaspora to the U. S. Latino community who are influenced by Creole spiritual practices. Fernández Olmos and Paravisini-Gebert also take into account the increased significance of material culture—art, music, literature—and healing practices influenced by Creole religions.

There have been many great and enduring works of literature by Caribbean authors over the last century. The Caribbean Contemporary Classics collection celebrates these deep and vibrant stories, overflowing with life and acute observations about society. Set in Belize City in the early 1950s, Beka Lamb is the record of a few months in the life of Beka and her family. Beka and her friend Toychie Qualo are on the threshold of change from childhood to adulthood. Their personal struggles and tragedies play out against a backdrop of political upheaval and regeneration as the British colony of Belize gears up for universal suffrage, and progression towards independence. The politics of the colony, the influence of the mixing of races in society, and the dominating presence of the Catholic Church are woven into the fabric of the story to provide a compelling portrait, 'a loving evocation of Belizean life and landscape'. Beka's vibrant character guides us through a tumultuous period in her own life and that of her country.

Suicide and Social Justice unites diverse scholarly and social justice perspectives on the international problem of suicide and suicidal behavior. With a focus on social justice, the book seeks to understand the complex interactions between individual and group experiences with suicidality and various social pathologies, including inequality, intergenerational poverty, racism, sexism, and homophobia. Chapters investigate the underlying and often overlooked connections that link rising rates and disproportionate concentrations of suicide within specific populations to wider social, political, and economic conditions. This edited volume brings diverse scholarly and social justice perspectives to bear on the problem of suicide and suicidal behavior, equipping researchers and practitioners with the knowledge they need to fundamentally rethink suicide and suicide prevention.
