### A Brief History of Economic Thought

Gius. Laterza & Figli Spa

The first part of the study is dedicated to the US economy from the end of the Second World War to the present time; similarities and differences between the crisis of 1929 and the current one are examined. The second part is dedicated to Italy and Europe and, first of all, to the Euro. Advantages and disadvantages of the new currency are debated. As far as Italy is concerned, since the advent of the Euro, it has experienced a long period of stagnation. The new currency is for sure at least part of the problem. At the end of the study, three possible solutions to the crisis situation are examined in decreasing order of preference. The first is the reform of the Euro and of the European Central Bank which should have the same powers as every other central bank. The second would see Italy and, perhaps, other countries, leave the Euro. The last and the most disadvantageous would be to play along with Germany and adopt drastic economic measures to create trade surpluses at the expense of some countries. Clemente M. Apollonj Ghetti was born in Rome on the 27th June 1998. He attended Italian primary schools in Rome, from 2004 till 2013, while he became self-taught in economics. When he was just 15 years old, he wrote this book during the summer. In November 2013 he

presented applications and was admitted to Downside School, one of England's oldest and most distinguished schools. He started attending in the present academic year 2014-2015 the lower sixth form. At the Prize Day of May 2015, at the end of the school year, he has won the prize for Economics.

THE MOST INFLUENTIAL BOOK ON  
MODERN ECONOMICS The Wealth of  
Nations is an economics book like no  
other. First published in 1776, Adam  
Smith's groundbreaking theories provide  
a recipe for national prosperity that has  
not been bettered since. It assumes no  
prior knowledge of its subject, and over  
200 years on, still provides valuable  
lessons on the fundamentals of  
economics. This keepsake edition is a  
selected abridgement of all five books,  
and includes an Introduction by Tom  
Butler-Bowdon, drawing out lessons for  
the contemporary reader, a Foreword  
from Eamonn Butler, Director of the  
Adam Smith Institute, and a Preface  
from Dr. Razeen Sally of the London  
School of Economics.

Chiunque desidera migliorare la società  
in cui viviamo deve porsi il problema del  
potere. Non si tratta di elaborarne una  
teoria astratta, ma di analizzarne i  
diversi aspetti per un uso politico  
finalizzato alla riduzione delle

diseguaglianze di potere. È importante ragionare sul potere per comprenderne la natura, ma soprattutto per conoscerne la distribuzione nella società. Ecco perché questo libro non ha l'obiettivo di elaborare una teoria astratta del potere, ma di illustrarne i diversi aspetti per un uso politico, finalizzato alla realizzazione di riforme di struttura: un utilizzo trasformativo e non conservatore, volto al cambiamento e non alla difesa dell'esistente.

This work focuses on economic activities, especially in the era of globalization, taking into consideration, their relationship with some of the traditional values of the Church. It focuses particularly on the dignity of the human person and how such relationship can promote or alienate the human person from God, self, fellow humans, society and nature. Rev. Father Dr. Albert Okechukwu Ikpenwa holds B. Phil. and BD from Pontifical Urban University, Rome; Masters and Doctorate degrees from Alphonsian Academy "Alfonsianum", Higher Institute of Moral Theology of the Pontifical Lateran University, Rome.

Feltrinelli Editore

Adam Smith's contribution to economics is well-recognised, but in recent years scholars have been exploring anew the multidisciplinary nature of his works. The Adam Smith Review is a refereed annual review that provides a unique forum for interdisciplinary debate on all aspects of Adam Smith's works, his place in history, and the significance of his writings to the modern world. It is aimed at facilitating debate between scholars working across the humanities and social sciences, thus emulating the reach of the Enlightenment world which Smith helped to shape. The eighth volume of the series contains contributions from a multidisciplinary range of specialists, including Fonna Forman, Ryan Patrick Hanley, Dionysis Drosos, Matti Norri, Adelino Zanini, Cesare Cozzo, Estrella Trincado, Michaël Bizou, Carsten Herrmann-Pillath, Henrique Schnieder, The Right Honorable Gordon Brown, Gavin Kennedy, Iain McLean, Vernon Smith, Alan Lopez, John Thrasher, Tom Martin, Brian Glenney, Şule Özler, Paul A. Gabrinetti, Craig Smith, Michelle A. Schwarze, Edwin van de Haar, Farhad Rassekh, Lauren Brubaker, Gordon Graham and Eric Schliesser. Themes of the volume include: Translating Smith's Theory of Moral Sentiments Smith and China Adam Smith in Kirkcaldy Oligopoly and Technical Progress

In *Economics in Perspective*, renowned economist John Kenneth Galbraith presents a compelling and accessible history of economic ideas, from Aristotle through the twentieth century.

Examining theories of the past that have a continuing modern resonance, he shows that economics is not a timeless, objective science, but is continually evolving as it is shaped by specific times and places. From Adam Smith's theories during the Industrial Revolution to those of John Maynard Keynes after the Great Depression, Galbraith demonstrates that if economic ideas are to remain relevant, they must continually adapt to the world

they inhabit. A lively examination of economic thought in historical context, *Economics in Perspective* shows how the field has evolved across the centuries.

The concept of self-ownership was first articulated in anglophone political thought in the decades between the outbreak of the English Civil War and the Glorious Revolution. This book traces the emergence and evolution of self-ownership over the course of this period, culminating in a reinterpretation of John Locke's celebrated but widely misunderstood idea that "every Man has a Property in his own Person." Often viewed through the prism of libertarian political thought, self-ownership has its roots in the neo-Roman or republican concept of liberty as freedom from dependence on the will of another. As Lorenzo Sabbadini reveals, seventeenth-century writers believed that the attainment of this status required not only a specific kind of constitution but a particular distribution of property as well. Many regarded the protection of private property as constitutive of liberty, and it is in this context that the vocabulary of self-ownership emerged. Others expressed anxieties about the

corrupting effects of excessive concentrations of wealth or even the institution of private property itself. Bringing together canonical republican writers such as John Milton and James Harrington, lesser-known pamphleteers, and Locke, a theorist generally regarded as being at odds with neo-Roman thought, *Property, Liberty, and Self-Ownership in Seventeenth-Century England* is a bold, innovative study of some of the most influential concepts to emerge from this groundbreaking period of British history.

*La ricchezza delle nazioni* Guida (Napoli)  
L'economia è come il calcio: tutti ne parlano, molti ripetono meccanicamente le idee di altri, pochi sanno descriverne davvero i meccanismi. Nicola Porro ci mette in guardia dai rischi di un pensiero unico che non accetta voci fuori dal coro riscoprendo gli insegnamenti dei più importanti pensatori liberali, molti dei quali oggi ingiustamente trascurati. Parliamo di economisti, filosofi, statisti, persino romanzieri best seller, che nelle loro opere hanno spiegato, e in certi casi previsto, fenomeni con cui abbiamo a che fare quotidianamente. Le tasse e l'istruzione, il falso mito dell'uguaglianza e le profezie apocalittiche degli ambientalisti: in questo libro l'economia torna una disciplina che ci riguarda molto da vicino grazie ai grandi uomini che l'hanno raccontata. Da Thomas Jefferson a Vilfredo Pareto, dalla scuola austriaca di Mises e Hayek agli eroi nazionali Ricossa e Martino, da Houellebecq a Piketty, Nicola Porro ci conduce con linguaggio semplice, tono ironico e una punta di veleno politico, in un viaggio dentro l'attualità, che è anche un viaggio parallelo alla riscoperta dei nomi dimenticati di quella cultura liberale che ha contribuito in modo decisivo a creare l'impalcatura del

nostro paese, e dell'Europa che oggi mettiamo maldestramente in discussione.

This critical bibliography of Adam Smith takes as its starting point the Kress Library of Business and Economics' 1939 catalogue of its Vanderblue Collection of Smithiana. Since the bicentenary of *The Wealth of Nations* in 1976, the rate of international publication markedly accelerated, significantly extending the scope of this bibliography beyond 1939. Its scope has been further enlarged via the inclusion of essays on the diffusion process while the inclusion of all works in the chronological main bibliography gives an overview of the scope of this process. The notes appended to the entries provide a running commentary to

the gathering pace of publication and the entries are organised chronologically with systematic annotation throughout. Ricerche sulla natura, e le cagioni della ricchezza delle nazioni. Del Signor Smith. Tradotte per la prima volta in italiano
