This volume elucidates and explores the interrelationships and direct causal connection between serious international crimes, serious breaches to fundamental human rights, and gross affronts to human dignity that lead to mass forced migration. Forced migration most often occurs in the context of protracted armed conflict of a noninternational nature where terrorism, fierce fighting, deep animosity, tit-for-tat retaliation, and "rapid dominance" doctrine all lead to the commission of atrocity crimes. Accordingly, this volume makes a valuable contribution to the literature and to the cause of trying to resolve mass forced displacement at its root cause, to explore the course that it takes, and how it might be prevented. The collection comprises original research by leading legal scholars and jurists focusing on the three central themes of serious international crimes, human rights, and forced migration. The work also includes a Foreword from Sir Howard Morrison, QC, former President of the Appeals Division of the International Criminal Court. The book will be a valuable resource for students, academics, researchers, and policymakers working in the areas of international law, migration, human rights, and international criminal law.

This book examines the rapid development of the fundamental concept of a crime in international criminal law from a comparative law perspective. In this context, particular thought has been given to the catalyzing impact of the criminal law theory that has developed in major world legal systems upon the crystallization of the substantive part of international criminal law. This study offers a critical overview of international and domestic jurisprudence with regard to the construal of the concept of a crime (actus reus, mens rea, defences, modes of liability) and exposes roots of confusion in international criminal law through a comprehensive comparative analysis of substantive criminal laws in selected legal jurisdictions.

Concern for crime victims has been a growing political issue in improving the legitimacy and success of the criminal justice system through the rhetoric of rights. Since the 1970s there have been numerous reforms and policy documents produced to enhance victims' satisfaction in the criminal justice system. The Republic of Ireland has seen a sea-change in more recent years from a focus on services for victims to a greater emphasis on procedural rights. The purpose of this book is to chart these reforms against the backdrop of wider political and regional changes emanating from the European Union and the European Court of Human Rights, and to critically examine whether the position of crime victims has actually ameliorated. The book discusses the historical and theoretical concern for crime victims in the criminal justice system, examines the variety of forms of legal and service provision inclusion, and concludes by analysing the various needs of victims which continue to be unmet.

This book covers everything a legal practitioner needs to know about police powers in Ireland. There is no closer tie to criminal law than the powers of the police in the country. The book is a practical guide and includes cases not cited elsewhere. It starts with the history of Ireland's police force, their duties, and their powers. Then, the book details the importance of human rights (liberty, property rights, privacy, right to silence, rights of detained persons, etc.), the interpretation of legislation regarding police powers and the limitation of those powers, the relationship between the police and the public, and arrest and detention. The following key areas are covered: judges' rules * the questioning of suspects * adverse inference (i.e. when people fail to answer questions) * police powers to enter property and powers to search that property * stop and search of vehicles * observation, surveillance, and phone-tapping * evidence (seizure and retention) * forensic evidence * visual ID (parades, videos, photos, etc.) * entrapment * trial and remedies (civil proceedings) * Garda Ombudsman. The book also includes the following consolidated Irish legislation: Criminal Justice Act, 1984 (and other Acts relating to arrestable offenses and relevant offenses) * Offences Against the State 1939 to 1998 (scheduled offenses) * Misuse of Drugs Act 1977 and Criminal Justice (Drug Trafficking Offenses) Act 1996 * Criminal Justice Act 2007.

Following on from the earlier edited collection, *Loss of Control and Diminished Responsibility*, this book is the first volume in the *Substantive Issues in Criminal Law* series. It serves as a leading point of reference in the area relating to participation in crime and identifies the need for a consistent approach to the doctrinal and theoretical underpinnings of complicity liability. With a section on the UK analysing points of current interest, the book also has a large comparative section dealing with foreign jurisdictions and examines on the basis of a unified research grid how different legal systems treat core issues of participation in the context of criminal law. This book is a valuable reference resource for those in the criminal justice community in the UK and abroad and for academics, the judiciary and policy-makers.

Terrorism and Criminal Justice CRC Press

... this work is an important contribution to the global discourse on pursuing property, money or resources linked to crime. Michelle Gallant, *Journal of Business Law* Informed and informative, *Civil Forfeiture of Criminal Property* is a seminal work of impressive scholarship and strongly recommended for professional, academic, and governmental judicial studies collections in general, and criminal justice reference collections in particular. Library Bookwatch, *Midwest Book Review* This book is interesting because there is a dearth of writing on the subject. It must be read for that reason. Sally Ramage, *The Criminal Lawyer* Once called the monster that ate jurisprudence, civil forfeiture is now an established weapon in the fight against organized crime, terrorism, drug trafficking and corruption. This fine collection of essays covering civil forfeiture regimes in ten diverse jurisdictions, written by leading practitioners, provides a comprehensive and detailed overview of the jurisprudential, legal, political and practical dimensions of the new generation of these powerful and controversial laws. I commend this book to criminal, civil, comparative and human rights lawyers who have an interest in how serious and profit-motivated crime, and responses to it, develop over time and in different legal cultures. Arie Freiberg, *Monash University, Australia* In this book, which is the first of its kind, leading experts examine the civil and criminal forfeiture systems in Australia, Canada, China, Ireland, South Africa, the United Kingdom and the United States. In the fight against organized crime and international money laundering, there is a

global trend for countries to enact forfeiture and confiscation laws that are applied through the civil process rather than the traditional criminal justice system. The authors gathered here analyze the appeal these civil forfeiture laws have for governments for their potential to disrupt criminal organizations and for their quantifiable benefits to the state. But without the usual safeguards of the criminal process, civil forfeiture laws are controversial, attracting constitutional challenges, particularly on human rights grounds. This book will be of great interest to policy-makers in government, and law enforcement agencies who are thinking of reforming their own laws, as well as to law reform agencies or select parliamentary committees where the issue of reform is topical. It will also appeal to students in criminal law, criminology and human rights.

Legal Measures for Targeting the Proceeds of Crime Routledge

For the uninitiated, the Irish District Court is a place of incomprehensible, organised chaos. This comprehensive account of the court's criminal proceedings, based on an original study which involved observing hundreds of cases, aims to demystify the mayhem and provide the reader with descriptions of language, participant discourse and procedure in the typical criminal case. In addition, the book captures a recent and important change in the District Court: the advent of the immigrant or the Limited-English-proficient (LEP) defendant. It traces the rise of these defendants and explores the issues involved in ensuring access to justice across languages. It also provides an original description of LEP defendants and interpreters in District Court proceedings, ultimately considering how they have altered the institution and how the characteristics of the District Court affect how limited English proficient defendants access justice at this level of the Irish courts system.

Criminal Legislation in Ireland Aspen Publishers

This book examines the jurisprudence of the Supreme Court of Ireland since its creation in 1924. It sets out the origins of the Court, explains how it operated during the life of the Irish Free State (1922-1937), and considers how it has developed various fields of law under Ireland's 1937 Constitution, especially after the 're-creation' of the Court in 1961. As well as constitutional law, the book looks at the Court's views on the status and legal system of Northern Ireland, administrative law, criminal justice and personal and family law. There are also chapters on the Supreme Court's interaction with European Union law and with the European Convention on Human Rights. The argument throughout is that, while the Court has been well served by many of its judges, who on occasion have manifested a healthy degree of judicial activism, there are still several legal fields in which the Court has not developed its jurisprudence as clearly or as imaginatively as it might have done. It has often displayed undue conservatism and deference. For many years its performance was hampered by its extreme workload, generated by its inability to control the number of appeals brought to it. However, the creation of a new Court of Appeal in 2014 has freed up the Supreme Court to act in a manner more analogous to that adopted by supreme courts in other common law countries. The Court's future looks bright.
