The Development and Validation of Driver Education Performance Objectives Routledge

TRB's National Cooperative Highway Research Program (NCHRP) Report 715: Highway Safety Manual Training Materials provides training materials to aid in implementing the American Association of State Highway and Transportation Officials' Highway Safety Manual (HSM).

Immunization in Practice Eureka Math, A Story of Units: Grade 3, Module 7 Geometry and Measurement Word Problems
Common Core Eureka Math for Grade 3, Module 7 Created by teachers, for teachers, the research-based curriculum in this series presents a comprehensive, coherent sequence of thematic units for teaching the skills outlined in the CCSS for Mathematics. With four-color illustrations, complete lesson plans, reproducible student worksheets, and assessments, this resource is uniquely designed to support teachers in developing content-rich, integrated learning experiences that adhere to established standards and encourage student engagement. Developed by Common Core, a non-profit advocacy group dedicated to producing content-rich liberal arts curricula for America's K-12 schools, Common Core Mathematics is the most comprehensive CCSS-based mathematics curriculum available today. The modules are sequenced and paced to support the teaching of mathematics as an unfolding story that follows the logic of mathematics itself. They embody the instructional "shifts" and the standards for mathematical practice demanded by the CCSS. Each module contains a sequence of lessons that combine conceptual understanding, fluency, and application to meet the demands of each topic in the module. Formative assessments are included to support data-driven instruction. The modules are written by teams of master teachers and mathematicians. This Module addresses Geometry and Measurement Word Problems. Common Core Learning Standards Addressed in Grade 3, Module 7: 3.MD.4, 3.MD.8, 3.G.1

A Leadership Guide for Combination Fire Departments

DIANE Publishing

A must have for every combination fire department leader!

Leading a combination fire department is one of the greatest challenges a fire chief can face. To successfully lead this type of organization, fire chiefs must recognize the unique difficulties inherent in combination systems, and overcome them by applying lessons learned from other chiefs who have faced similar challenges. Authored by a team of seasoned fire service leaders, and modeled after the Chief Fire Officer's Desk Reference, *A Leadership Guide for Combination Fire Departments* is a compilation of the best practices and lessons learned through experience. It is designed to provide chief- and officer-level personnel with the tools necessary to lead today's combination service department.

Education and Training Information Exchange Transportation Research Board

Under certain adverse driving conditions, often times the driver of a vehicle has inadequate training or education and ends up taking wrongful action leading to severe crashes. The purpose of this research was to determine the state-of-the-art practices in educating drivers for safety in certain adverse driving conditions and to develop a realistic module of a driver education program addressing that topic. In addition, the research sought to determine whether any relevant laws and regulations related to driving in the State of Arizona need to be changed in order to properly address safety under adverse driving conditions. The study consisted of four main tasks, which included a literature review, statistical analysis of Arizona crash data, a survey of other states regarding their driver education programs, and targeted case studies of selected states and other private or semi-government agencies involved in driver education curriculum development and implementation. It is the recommendation of this report that Arizona continue its on-going efforts to convene a driver education task force consisting of both Arizona Department of Education and Motor Vehicle Department representatives with the goal of developing uniform standards for both driver education curriculum and training for driver education instructors to apply to both the public school driver education program and the professional driver training schools. In addition, because

Arizona does not have an existing state-level driver education curriculum, the state should adopt a complete driver education curriculum as opposed to a module geared towards adverse driving conditions. That said, should that effort not be possible, it is the recommendation of this report that one of the two adverse conditions related modules (Montana or Texas/Virginia). Both of these modules are well designed and thorough and both would serve Arizona well. They are similar in their coverage of adverse driving conditions. The choice between the two would come down to Arizona's preference between the NIDB model with which the Montana curriculum is more closely aligned, and the ADTSEA model with which the Virginia/Texas module is more closely aligned.

Manpower Development, Education, and Training Butterworth-Heinemann

Redundancy, restructuring, downsizing. There are few, if any, other management books on this important topic, and yet the pace of redundancies has only accelerated in recent years. Coupled with this, many companies that implement redundancies as a cost-cutting exercise often fail to achieve their goal. Whilst viewed as an uncomfortable topic by many, guidance on how to implement a redundancy programme that is fair, proportionate and ultimately leads to improved organisational performance, has never been more needed. This book fills this important gap. It takes the reader through a redundancy implementation strategy – Re-Focus, Re-Organise and Re-Build – that incorporates the key aspects of planning and analysis, fairness and justice, and prepares management for redundancy implementation through training. What will your communications include? What will be your strategy for implementation? What training does your management need? Various helpful template examples are included for employee consultation, communication and training. The book will be invaluable for business managers, HR professionals, employee representatives and HR students.

This practical guide contains seven modules targeted at district and health facility staff. It intends to meet the demands to improve immunization services so as to reach more infants in a sustainable way, building upon the experiences of polio eradication. It includes materials adapted from polio on planning, monitoring and use of data to improve the service, that can be used at any level. Revising the manual has been a team exercise. There are contributions from a large number of experts, organizations and institutions. This new edition has seven modules. Several new vaccines that have become more readily available and used in recent years have been added. Also the section on integration with other health interventions has been expanded as exciting opportunities and experiences have become evident in the years following the previous edition. Module 1: Target diseases and vaccines Module 2: The vaccine cold chain Module 3: Ensuring safe injections Module 4: Microplanning for reaching every community Module 5: Managing an immunization

session Module 6: Monitoring and surveillance Module 7: Partnering with communities.

Highway Safety Literature Jones & Bartlett Learning

Is emergency management education undoing an age-old tradition in the American Fire Service? Has the time arrived to educate emergency managers in college classrooms rather than in twenty years of tactical operations experience? Over one hundred forty-three (143) institutions of higher education are now offering certificate or degree programs in emergency management with no tactical operations experience required for admission. Resistance by veteran law enforcement officers and fire fighters may have to be overcome if we are to prepare emergency managers with required skill sets. Dr. Tom Phelan explores the skills being taught to emergency management students and addresses the concerns of experienced first responders in accepting their leadership. *Discusses the value of emergency management education in the post-9/11 world *Makes clear the need for educating emergency managers to prepare them for emergency manager leadership *Helps bridge the gap

between emergency management and first responders *Should be required reading in every college emergency management curriculum *The book is clear, concise, and an "easy read"
