 This highly anticipated third edition of the Handbook of Parenting brings together an array of field-leading experts who have worked in different ways toward understanding the many diverse aspects

of parenting. Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent, professional, and policymaker wonders about. Parenting is a perennially "hot" topic. After all, everyone who has ever lived has been parented, and the vast majority of people become parents themselves. No wonder bookstores house shelves of "how-to" parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence-based. The Handbook of Parenting is. Period. Each chapter has been written to be read and absorbed in a single sitting, and includes historical considerations of the topic, a discussion of central issues and theory, a review of classical and modern research, and forecasts of future directions of theory and research. Together, the five volumes in the Handbook cover Children and Parenting, the Biology and Ecology of Parenting, Being and Becoming a Parent, Social Conditions and Applied Parenting, and the Practice of Parenting. Volume 1, Children and Parenting, considers parenthood as a functional status in the life cycle: Parents protect, nurture, and teach their progeny, even if human development is more dynamic than can be determined by parental caregiving alone. Volume 1 of the Handbook of Parenting begins with chapters concerned with how children influence parenting. Notable are their more obvious characteristics, like child age or developmental stage; but subtler ones, like child gender, physical state, temperament, mental ability, and other individual-differences factors, are also instrumental. The chapters in Part I, on Parenting across the Lifespan, discuss the unique rewards and special demands of parenting children of different ages and stages – infants, toddlers, youngsters in middle childhood, and adolescents—as well as the modern notion of parent-child relationships in emerging adulthood, adulthood, and old age. The chapters in Part II, on Parenting Children of Varying Status, discuss common issues associated with parenting children of different genders and temperaments as well as unique situations of parenting adopted and foster children and children with a variety of special needs, such as those with extreme talent, born preterm, who are socially withdrawn or aggressive, or who fall on the autistic spectrum, manifest intellectual disabilities, or suffer a chronic health condition.

This completely new title is written to specifically cover the new IB Diploma Mathematical Studies syllabus. The significance of mathematics for practical applications is a prominent theme throughout this coursebook, supported with Theory of Knowledge,

internationalism and application links to encourage an appreciation of the broader contexts of mathematics. Mathematical modelling is also a key feature. GDC tips are integrated throughout, with a dedicated GDC chapter for those needing more support. Exam hints and IB exam-style questions are provided within each chapter; sample exam papers (online) can be tackled in exam-style conditions for further exam preparation. Guidance and support for the internal assessment is also available, providing advice on good practice when writing the project.

China's approach to nuclear deterrence has been broadly consistent since its first test in 1964, but it has recently accelerated nuclear force modernization. China's strategic environment is likely to grow more complex, and nuclear constituencies are gaining a larger bureaucratic voice. Beijing is unlikely to change official nuclear policies but will probably increase emphasis on nuclear deterrence and may adjust the definition of key concepts.

The formation and characteristics of a nation's middle class are shaped by historical context and the developmental path that has been followed. However, can the same be said of the ethnic Chinese middle classes in Taiwan, China, Hong Kong, and Macao? Given the divergent political and economic experiences under which the respective middle classes were created, established, shaped, and reshaped, can they still be characterized as a homogenous group of 'Chinese middle classes', or are they more unique within each country? Using systematic survey data analysis and case studies to examine and compare the emerging middle classes in Taiwan, Hong Kong, Macao and Urban China, this book explores whether the middle classes in these countries possess any uniquely 'Chinese' features, or if these are shared attributes that can be found in other non-Chinese middle classes in the Asia-Pacific region. It analyses the formation, profile, culture, lifestyles, mobility, and politics of the middle class groups in each country, and highlights the differences and similarities that emerge, and focuses in particular on increased mobility, financial resilience, class anxiety, and political interest and effectiveness. This book will be of great interest to students and scholars interested in Asian middle classes, Chinese studies, Chinese

societies, Chinese ethnicity and Chinese politics.

This book provides wide-ranging information on the progress achieved in the diagnosis, treatment and management of dentine hypersensitivity during the past few years. Recent advances in research, including innovations in the development of desensitizing agents, are fully described and detailed attention is paid to novel clinical approaches and potential future strategies in product development. Introductory chapters cover important aspects of physiology, prevalence and aetiology and advances in diagnosis and in vitro testing techniques for dentine hypersensitivity are discussed. Dentine hypersensitivity is a troublesome clinical condition that continues to perplex the clinician despite the vast array of available treatments that have been formulated to resolve the problem. There continues to be under-reporting of the condition by clinicians and uncertainty over aetiology, diagnosis and effective management. This book will hopefully contribute in combating these deficiencies and assist the clinician in delivering optimal patient care.

This fascinating study uses qualitative and quantitative data and insights from

interviews with judges, lawyers, government officials, entrepreneurs, bankers, consultants, and academics in China and abroad, to provide a new perspective on the problems that have hindered the implementation of the Enterprise Bankruptcy Law in China, and recent attempts at reform. The analysis provides unique insights into China's business world and its interaction with the judicial and political system in China. In addition, the book also provides important information about how the Enterprise Bankruptcy Law affects foreign companies, agencies and governments that are active in China. The author draws on empirical data, decided cases and her experience of how the law and surrounding practices deal with foreign stakeholders whose interests are affected by corporate bankruptcy in China. The book will improve understanding of how China's corporate bankruptcy law has been used in practice, what has limited its practical effectiveness, whether it is desirable for the law to be used more readily in China, and the possible options for its reform.

A look at how the desire to improve international status affects Russia's and China's foreign policies Deborah Welch Larson and Alexei Shevchenko argue that the desire for world status plays a key role in shaping the foreign policies of China and Russia. Applying social identity theory—the idea that individuals derive part of their identity from larger communities—to nations, they contend that China and Russia have used various modes of emulation, competition, and creativity to gain recognition from other countries and thus validate their respective identities. To make this argument, they analyze numerous cases, including Catherine the Great's attempts to westernize Russia, China's identity crises in the nineteenth century, and both countries' responses to the end of the Cold War. The authors employ a multifaceted method of measuring status, factoring in influence and inclusion in multinational organizations, military clout, and cultural sway, among other considerations. Combined with historical precedent, this socio-psychological approach helps explain current trends in Russian and Chinese foreign policy.

China's commitments in Central Asia illustrate how regional foreign policy works and how long-standing principles of Chinese foreign policy might be revised in the near future. China's rise has 'moved' Asia, which is why it seems that what we have traditionally regarded as the geographic and political scope of Asia might actually considerably change in the near future. Nadine Godehardt gives crucial insights into the Chinese expert discourse on Central Asia - analyzing how Chinese experts define Central Asia when they talk and write about policy issues related to China's immediate Western neighbourhood. In this context, she gives an inside perspective on Chinese voices whose meanings are rarely examined in Chinese International Relations studies.

Christianity and Confucianism: Culture, Faith and Politics, sets comparative textual analysis against the backcloth of 2000 years of cultural, political, and religious interaction between China and the West. As the world responds to China's rise and China positions herself for global engagement, this major new study reawakens and revises an ancient conversation. As a generous introduction to biblical Christianity and the Confucian Classics, *Christianity and Confucianism* tells a remarkable story of mutual formation and cultural indebtedness. East and West are shown to have shaped the mind, heart, culture, philosophy and politics of the other - and far more, perhaps, than either knows or would want to admit. Christopher Hancock has provided a rich and stimulating resource for scholars and students, diplomats and social scientists, devotees of culture and those who pursue wisdom and peace today.

This book addresses the past and changing contexts of Chinese and German teacher education under the impact of globalization and echoes "quality" issues of teacher education. This edited book provides a comprehensive discussion on other issues in the management and implementation of change in teacher education related to teacher education curricula for professional development of

teachers. A combination of chapters provides an overview, a review of literature and research as well as offering examples of teacher education practice and updated empirical research on these topics co-edited by two senior scholars and written by experts from Mainland China (including Hong Kong) and Germany. The volume addresses key issues on teacher standards, ICT in education and e-learning in teacher education, STEM education, vocational teacher education, university-school partnership in teacher education and teaching Chinese or German as a second language. This is an up-to-date academic book to look at profound issues related to quality in teacher education and teachers' professional development in mainland China and Germany. It will be a useful reference for graduate students and researchers in the field of international and comparative education, teacher education and curriculum studies, teacher educators and practitioners to learn from trends, best practice and challenges that have been encountered in Mainland China and Germany.
