Children and Drug Safety traces the development, use, and marketing of drugs for children in the twentieth century, a history that sits at the interface of the state, business, health care providers, parents, and children. This book illuminates the historical dimension of a clinical and policy issue with great contemporary significance—many of the drugs administered to children today have never been tested for safety and efficacy in the pediatric population. Each chapter of Children and Drug Safety engages with major turning points in pediatric drug development; themes of children's risk, rights, protection and the evolving context of childhood; child-rearing; and family life in ways freighted with nuances of race, class, and gender. Cynthia A. Connolly charts the numerous attempts by Congress, the Food and Drug Administration, the American Academy of Pediatrics, and leading pediatric pharmacologists, scientists, clinicians, and parents to address a situation that all found untenable.

Curriculum Implementation McGraw Hill Professional

As South Africa transitioned from apartheid to democracy, changes in the political landscape, as well as educational agendas and discourse on both a national and international level, shaped successive waves of curriculum reform over a relatively short period of time. Using South Africa as a germane example of how curriculum and pedagogy can interact and affect educational outcomes, *Pedagogy in Poverty* explores the potential of curricula to improve education in developing and emerging economies worldwide, and, ultimately, to reduce inequality. Incorporating detailed, empirical accounts of life inside South African

classrooms, this book is a much-needed contribution to international debate surrounding optimal curriculum and pedagogic forms for children in poor schools. Classroom-level responses to curriculum policy reforms reveal some implications of the shifts between a radical, progressive approach and traditional curriculum forms. Hoadley focuses on the crucial role of teachers as mediators between curriculum and pedagogy, and explores key issues related to teacher knowledge by examining the teaching of reading and numeracy at the foundational levels of schooling. Offering a data-rich historical sociology of curriculum and pedagogic change, this book will appeal to academics, researchers and postgraduate students in the fields of education, sociology of education, curriculum studies, educational equality and school reform, and the policy and politics of education.

This Handbook presents in-depth research conducted on a myriad of issues within the field of financial literacy. Split into six sections, it starts by presenting prevalent conceptions of financial literacy before covering financial literacy in the policy context, the state and development of financial literacy within different countries, issues of assessment and evaluation of financial literacy, approaches to teaching financial literacy, and teacher training and teacher education in financial literacy. In doing so, it provides precise definitions of the construct of financial literacy

and elaborates on the state and recent developments of financial literacy around the world, to show ways of measuring and fostering financial literacy and to give hints towards necessary and successful teacher trainings. The book also embraces the diversity in the field by revealing contrasting and conflicting views that cannot be bridged, while at the same time making a contribution by re-joining existing materials in one volume which can be used in academic discourse, in research-workshops, in university lectures and in the definition of program initiatives within the wider field of financial literacy. It allows for a landscape of financial literacy to be depicted which would foster the implementation of learning opportunities for human beings for sake of well-being within financial living-conditions. The Handbook is useful to academics and students of the topic, professionals in the sector of investment and banking, and for every person responsible for managing his or her financial affairs in everyday life.
