Nominated as one of America's best-loved novels by PBS's The Great American Read. An American classic and great bestseller for over thirty years, *A Separate Peace* is timeless in its description of adolescence during a period when the entire country was losing its innocence to World War II. Set at a boys' boarding school in New England during the early years of World War II, *A Separate Peace* is a harrowing and luminous parable of the dark side of adolescence. Gene is a lonely, introverted intellectual. Phineas is a handsome, taunting, daredevil athlete. What happens between the two friends one summer, like the war itself, banishes the innocence of these boys and their world.

Technology in the Modern Corporation: A Strategic Perspective examines the role of technology in corporate planning and all that this relationship implies to corporate organization and strategy. Organized into 13 chapters, this book first discusses the management of corporate entrepreneurship; technological innovation and interdependence; and the rise and character of modern technology strategy. Subsequent chapters describe corporate research and development; corporate strategies for managing emerging technologies; approaches for the strategic management of technology; innovation and corporate strategy; and executive succession, strategic reorientations, and organization evolution.

Japanese foreign direct investment has played a leading role in Asian economies for more than two decades. This book, describing the changing industrial dynamics after the Asian currency crisis in 1997, focuses on corporate strategies of Japanese automobile and electronics companies in Asian nations, with detailed analysis of management issues and strategies from the viewpoint of both the home economy and the recipient host

economies. Among the cases presented are the global restructuring of the Korean automobile industry and the transfer of automotive technology to China via Taiwan. Other studies, from the electronics industry, look at production sites in Malaysia, backward integration in Singapore, and forward integration in Hong Kong. The contributions of specialists from Asia, Europe, and the United States collected here envision an ongoing process of globalization and provide valuable perspective and background for business management and East Asian studies.

This title was first published in 2000: This work is aimed at international managers or business students who are interested in emerging markets, particularly China. It provides conceptual backgrounds, analytical frameworks, managerial insights, business guidance, and practical evidence concerning partner selection for both foreign and Chinese investors. It addresses how foreign companies should select ideal Chinese firms as well as what Chinese firms are looking for from foreign investors. The book is divided into three parts. The first part presents an overview of multinational enterprises (MNEs) in China and outlines the economic environment facing these firms. The second part delineates how to select appropriate partner firms from both foreign and Chinese parents perspectives. The third part includes ten case studies showing how leading MNEs in the world adopt entry and co-operative strategies (including partner selection) that align properly with internal capabilities, external environment, and organizational needs. Based on a variety of archival and Internet sources, these case studies are prepared by the author for discussion purposes.

Chilton's original line of model-specific information covers older vehicles. Each manual offers repair and tune-up guidance designed for the weekend for the weekend mechanic, covering basic maintenance and troubleshooting. For the hobbyist or used car owner, this information is essential and unavailable elsewhere. All books are paperback.

Title 49 - Transportation: Department of Transportation Parts 400 - 599 Renniks Publications

This lucid and informative book analyzes the problems of clusters in transition through studies of agglomerations at different stages of development in various East Asian countries. The contributors reconsider industrial cluster policy within a more dynamic and long-term framework, and explore how regional transformations

can bring new insights to the theory of agglomeration and innovation. By identifying the factors and policies to promote upgrading, the authors establish the theoretical and policy basis for transforming industrial clusters from production-oriented to innovation-oriented agglomerations. They also study the important structural changes in the region, such as FTAs and the role of the WTO, and the consequent effects on clusters.

Researchers and students of Asian economics, industrial clusters and innovation will find this incisive book invaluable. It will also prove to be a compelling read for policymakers in developing countries or international development organizations.

Winner of a Shingo Research and Professional Publication Award
Toyota's sustained growth attracts the attention of economists and industrialists around the world eager to learn the secrets of Toyota's lasting success. In *Inside the Mind of Toyota: Management Principles for Enduring Growth*, Satoshi Hino examines the source of Toyota's strength: the fundamental thinking and management structures that lie beneath the creation of its famed Toyota Production System. From the perspective of a professional with 30 years experience in the auto industry, Hino presents a fresh and detailed analysis of Toyota's essential management system, from its very beginnings into the 21st century. The ultimate goal is not simply to mimic Toyota's formula, but to learn from it and, in doing so, surpass it. From the Translator's Foreword: Unlike most Toyota watchers, Hino urges us to set our sights not on replicating Toyota's success, but on surpassing it. This point is crucial, because it moves our attention away from slavish imitation of what is visible on the surface and challenges us to tap into deeper and more powerful mechanisms of excellence. This is not a cookbook and it is not 'Toyota Lite.' It deserves serious study, application and experimentation. Learn how Toyota thinks, Hino is telling us. Learn Toyota's strengths, make them your own and then exceed them. —Andrew Dillon, September

Small and Medium Scale Industry in Indian and the Model of Japan Government Printing Office

Within a few short months in 1997, Asian economies that had been considered not only healthy but "miraculous" suddenly fell off a precipice as investors withdrew massively first from Asian currencies and, in rapid order, from equity markets across the region. On October 27 1997, the turmoil in Asian markets spooked Wall Street in the largest single-day decline in history, a drop of 550 points. It was predicted that the Asian crash could drive the US trade deficit from \$191 billion to \$300 billion by 1998, creating huge new tensions in relations with some of the largest US trading partners. These wrenching changes, following a generation of success, raise numerous questions about the steps that led to the crisis, its likely outcome and the limits and constraints of "Asian capitalism". Edith Terry presents a blow-by-

blow account of the crisis, beginning with the 1996 collapse of the Bangkok Bank of Commerce. In her overview, she links the fall of the Asian miracle with the theme of globalization, arguing that the crisis demonstrates the urgency of dismantling restraints to trade, investment, and financial services, and that the United States should take leadership in pushing for new and sweeping reform through the World Trade Organization and in bilateral negotiations with its trading partners. The final section of the book deals with the rise of the "Asian miracle" - how the myth was created, who created it, why it succeeded for so long - and is informed by analysis of the Japanese prototype.

Labour in Globalising Asian Corporations Springer

The car industry is considered one of the most archetypal global industries. Nevertheless, it looks more like a world of regions rather than a fully integrated global one. Does regionalism prevail over or complement globalization? Moreover, is there still room for unilateral (go-it-alone) strategies? This volume addresses these questions from the perspective of the car industry, the most important industrial 'carrier' of these developments. *Cars, Carriers of Regionalism?* provides an integral account of the geo-economic and geo-political dilemmas and opportunities faced by the car industry in developed as well as developing countries at the start of the 21st century. All major regional integration initiatives are covered and their feasibility is assessed, including go-it-alone efforts. This volume - written by leading scholars who have participated to the GERPISA international network's four-year research programme Globalization or Regionalisation for the Auto Industry? - is intended for both academics and practitioners/managers.

Today's technologies are a world apart from the cars of a generation ago. That's why Chilton created a new breed of model-specific repair manuals -- so comprehensive they set the standard. Written in response to consumer studies, they give your customers exactly what they want and need in specific automotive information. Total Car Care provides the amateur

mechanic with two essential ingredients: -- In-depth information on all systems from headlights to exhaust -- Complete, easy-to-follow, illustrated, procedural directions for disassembly, removal, replacement and reinstallation Each volume lives up to its name with total information, including: -- Photographs and illustrations throughout -- Diagnostic and troubleshooting sections throughout -- Actual wiring and vacuum diagrams -- Complete electronic controls information -- Tune-up specs and maintenance schedules -- Emissions controls data, environmental and safety information

Concepts and Cases Macmillan International Higher Education Revised version of papers presented at the Workshop on Comparative Study on the Small and Medium Scale Industry in India and Japan, held at Tokyo during 8-9 March 1996.

Motor Vehicle Fuel Efficiency Act of 1989 Jorge Carrillo Viveros This book brings together conceptual and empirical analyses of the causes and consequences of changing business-government relations in China since the 1990s, against the backdrop of the country's increased integration with the global political economy. More specifically, it provides an interdisciplinary account of how the dominant patterns of interactions between state actors, firms and business organizations have changed across regions and industries, and how the changing varieties of these patterns have interacted with the evolution of key market institutions in China. The contributors to this edited volume posit that business-government relations comprise a key linchpin that defines the Chinese political economy and calibrates the character of its constitutive institutional arrangements. Edward Elgar Publishing

New Asian companies are emerging with global ambitions, as old western brands disappear or are overtaken. In this book, seventeen Euro Asia experts present conceptual and empirical regional research that reflects the emerging multiplicity in Asia and comprehensively shows how the 'old world' must respond, and what will define success and failure.
