Profiles the personal qualities, political  
achievements, and life ambitions of  
Aaron Burr, Alexander Hamilton, and  
Thomas Jefferson.

Schirmer Pronouncing Pocket Manual of  
Musical Terms SUNY Press

Many Confederates believed that  
Abraham Lincoln himself was the  
sponsor of the Union army's heavy

destruction of the South. With John  
Wilkes Booth as its agent, the  
Confederate Secret Service devised a  
plan of retribution--to seize President  
Lincoln, hold him hostage, and bring the  
war-weary North to capitulation. The  
code word for this stratagem was "Come  
Retribution." But when Booth was  
stymied, the Secret Service took another  
course. They conspired to bomb the  
White House during a conference of  
senior Union officials. But this plot also  
failed. Next, the Confederates devised  
for Confederate forces to abandon  
Richmond and Petersburg and to link up

with General Joseph E. Johnston in the South before General Grant's forces were prepared to move. This plan was thwarted, however, when Grant took Richmond. By April 9, 1865, Lee was forced to surrender. Yet the willful, ardent Booth, smarting from the South's loss of the war, took decisive action at Ford's Theater during that spring night in 1865. Investigating the assassination from their perspective as career intelligence officers, William A. Tidwell and David Winfred Gaddy, joined by James O. Hall, one of the leading authorities on the assassination, find and follow the clues, interpret the clandestine evidence, and draw well-founded conclusions. They are the first to explore the Confederate Secret Service's link to the death of Lincoln. In

Come Retribution, originally published in 1988 and now available again in a paperback edition, they offer startling insights and give a new direction to the well-known and often-told story of Lincoln and Booth. "The facts presented and the inferences drawn are provocative," said Nathan Miller in The Baltimore Sun. "Every account of the Lincoln assassination published in the future will have to take account of the arguments presented in this book." [A How-to-do-it Manual for Selecting, Organizing, and Managing Personal Computers in Libraries](#) Taylor & Francis  
The author presents a lively in-depth look at the efforts and struggles of the New York City Housing Partnership to build moderate- and middle-income housing. Over the past decade, the

Partnership has built 12,000 units. In addition to providing a close-up look at the policies and politics of the Partnership, Orlebeke places their efforts in the broader context of a new urban paradigm. Charles J. Orlebeke, professor of urban planning and public affairs at the University of Illinois, served as Assistant Secretary for Policy Development Research at the Department of Housing and Urban Development.

Map projection concerns the science of mathematical cartography, the techniques by which the Earth's dimensions, shape and features are translated in map form, be that two-dimensional paper or two- or three-dimensional electronic representations. The central focus of this book is on the theory of map projections. Mathematical cartography also takes in map scales and their variation, the division of maps into sets of sheets and nomenclature, and addresses the problems of making measurements and conducting investigations which make use of geodetic measurements and the development of graphical methods for

solving problems of spherical trigonometry, marine- and aeronavigation, astronomy and even crystallography.

**Leadership for the Public Service** Great Lakes Books

Scientific management: technology spawned it, Frederick Winslow Taylor championed it, Thorstein Veblen dissected it, Henry Ford implemented it. By the turn of the century, practical visionaries prided themselves on having arrived at "the one best way" both to increase industrial productivity and to

regulate human behavior. Martha Banta takes a close look at texts ranging from mail order catalogs and popular romances to the works of Henry Adams and Nathanael West to trace the effects of the efficiency craze on the full fabric of American culture.

Built for the Great Exhibition of 1851, the Crystal Palace originally graced London's Hyde Park with Joseph Paxton's remarkable geometric design and groundbreaking use of glass elements, prefiguring the modern movement in architecture. After the exhibition a group of bankers, railway directors, and men of influence moved the structure to a new site in south London, rebuilt it to an even grander scale, and set about its

promotion as a "palace for the multitude." Here were exhibitions, concerts, and spectaculars to fill a splendid day out for Londoners of all classes and interests. Filled with plaster casts of great art treasures, life-sized models of dinosaurs, waterworks, and gardens, the Crystal Palace became a center of both education and entertainment from the Victorian era through its destruction by fire in 1936.

**Construction Glossary** SUNY Press  
In January 2000, Mercedes-Benz started to implement the Mercedes-Benz Production System (MPS) throughout its worldwide passenger car plants. This event is exemplary of a trend within the automotive industry: the creation and introduction of company-specific standardised production systems. It

gradually emerged with the introduction of the Chrysler Operating System (COS) in the mid-1990s and represents a distinct step in the process towards implementing the universal principles of lean thinking as propagated by the MIT-study. For the academic field of industrial sociology and labour policy, the emergence of this trend seems to mark a new stage in the evolution of the debate about production systems in the automotive industry (Jürgens 2002:2), particularly as it seems to undermine the stand of the critics of the one-best way model (Boyer and Freyssenet 1995). The introduction of company-level standardised production systems marks the starting point of the present study. At the core of it is a case study about the Mercedes Benz Production System (MPS).

**Caricature and the Culture of Conduct, 1841-1936** Wayne State University Press

Bickel, a military and business strategist in Washington, D.C., challenges military and strategic theories that treat particular bureaucratic structures, large corporations, and elites as the progenitors of doctrine. He looks at the role that mid-level combat officers play in creating military doctrine, and evaluates Marine civil and military pacification operations in Haiti, the Dominican Republic, and Nicaragua. He gives evidence of how field experience obtained before 1940 played a role in shaping the Marine Corps' Small Wars Manual and elements of doctrine that exist today. c. Book News Inc.  
*The Sea Island Mathematical Manual*

John Wiley & Sons

The only full bibliography on the Ford years, this volume offers a complete compilation of material pertaining to the life and political career of Gerald R. Ford. The documents included trace Ford's growth from his early days as a child in Grand Rapids, through his naval service in World War II, his 1948 election to Congress and 1965 selection as Republican Minority Leader, to his 1973 nomination and selection as Richard Nixon's vice-president and his 1974 accession to the presidency. The work contains over 350 references to manuscript material on the Ford years, as well as monograph, journal article, and memoir sources, including the first full listing of Ford's own writings available in print. Oral histories,

historiographical materials, iconography, and other audiovisual materials are also included. The bibliography is a particularly broad-based one, including short essays on the audiovisual and iconographic material available and a wide range of entries on available archival material. All the archival material presently available at the Gerald R. Ford Library is included. Most of the entries include a short annotation. The volume also provides an extensive chronology of the Ford years.

Projected Scenery Westview Press  
Selection, evaluation, acquisition and management of video materials are covered in this guide. Chapters include information about balancing a collection, criteria for evaluation, selection aids, purchasing, budgeting and developing a

collection policy.

Of all the PE exams, more people take the civil than any other discipline. The eight-hour, open-book, multiple-choice exam is given every April and October. The exam format is breadth-and-depth -- all examinees are tested on the breadth of civil engineering in the morning session; in the afternoon, they select one of five specialties to be tested on in-depth. Our civil PE books are current with the exam; they reflect the new format, and they reference all the same codes used on the exam.101 Solved Problems, for extra problem-solving practice. -- Practice problems in essay format cover a wide range of breadth-and-depth exam topics -- Includes full

solutions

*Barbaric Intercourse* New York : Drama  
Book Shop

*Barbaric Intercourse* tells the story of a century of social upheaval and the satiric attacks it inspired in leading periodicals in both England and America. Martha

Banta explores the politics of caricature and cartoon from 1841 to 1936, devoting special attention to the original *Life* magazine. For Banta, *Life* embodied all

the strengths and weaknesses of the Progressive Era, whose policies of reform sought to cope with the frenetic urbanization of New York, the racist laws of the Jim Crow South, and the rise of jingoism in the United States. *Barbaric Intercourse* shows how *Life's* take on these trends and events resulted in satires both cruel and enlightened. Banta also deals extensively with London's *Punch*, a sharp critic of American nationalism, and draws from images and writings in magazines as diverse as *Puck*, *The Crisis*, *Harper's Weekly*, and *The International Socialist Review*. Orchestrating a wealth of material, including reproductions of rarely seen political cartoons, she offers a richly layered account of the cultural struggles of the age, from contests over

immigration and the role of the New Negro in American society, to debates over Wall Street greed, women's suffrage, and the moral consequences of Western expansionism.

**SIMSOC** Great Lakes Books

With over 200 photographs chosen from thousands in the collection of Henry Ford Museum & Greenfield Village, *Beyond the Model T* gives attention to Henry Ford's numerous ventures outside of the auto industry. This revised edition, with 26 additional photographs and two new chapters, completes the portrait of Ford's life, giving depth to a man previously known only for the Model T. Through vivid photographs and narration, Ford's boundless energy and vision are revealed. An enthusiastic and courageous entrepreneur, Henry Ford

used profits from the Model T to launch projects in a multitude of areas, from education to rubber production. Ford R. Bryan presents an unknown Henry Ford, focusing on his experimental humanitarian and business enterprises—including those that failed. New to this edition are chronicles of factory and general hospitals, nursing schools and services, health clinics, and a research institute established by Henry Ford, and the more than a dozen commissaries Ford operated, selling a wide assortment of items to Ford employees and their families from pillow cases to children's shoes. These accounts give testimony to Ford's investment in the well-being of the working class, a category in which he included himself despite his wealth, and disclose his dreams for a country upon

which he undeniably left his mark.

This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant

scholarship and commentary on The Comedy of Errors that is published in obscure and difficult accessible

journals, newspapers, and other sources. This collection brings together these essays for the first time.
