Finding Perfect

Harlequin

When she was a girl, Lisa See spent summers in the cool, dark recesses of her family's antiques store in Los Angeles' Chinatown. There, her grandmother and great-aunt told her intriguing, colourful stories about their family's past - stories of missionaries, concubines, tong wars, glamorous nightclubs, and the determined struggle to triumph over racist laws and discrimination. They spoke of how Lisa's

great-great-grandfather emigrated from his Chinese village to the United States, and how his son followed him. As an adult, See spent five years collecting the details of her family's remarkable history. She interviewed nearly one hundred relatives and pored over documents at the National Archives, the immigration office, and in countless attics, basements, and closets for the intimate nuances of her ancestors' lives. The result is a vivid, sweeping family portrait that is at once particular and universal, telling the story not only of one family, but of the Chinese people in America - and of America itself, a country that both

welcomes and reviles its immigrants like no other culture in the world.

While today's business world is dominated by technology and data analysis, award-winning financial journalist and anthropology PhD Gillian Tett advocates thinking like an anthropologist to better understand consumer behavior, markets, and organizations to address some of society's most urgent challenges. Amid severe digital disruption, economic upheaval, and political flux, how can we make sense of the world? Leaders today typically look for answers in economic models, Big Data, or artificial intelligence platforms.

Gillian Tett points to anthropology—the study of human culture.

Anthropologists learn to get inside the minds of other people, helping them not only to understand other cultures but also to appraise their own environment with fresh perspective as an insider-outsider, gaining lateral vision. Today, anthropologists are more likely to study Amazon warehouses than remote Amazon tribes; they have done research into institutions and companies such as General Motors, Nestlé, Intel, and more, shedding light on practical questions such as how internet users really define themselves; why corporate projects fail;

why bank traders miscalculate losses; how companies sell products like pet food and pensions; why pandemic policies succeed (or not). Anthropology makes the familiar seem unfamiliar and vice versa, giving us badly needed three-dimensional perspective in a world where many executives are plagued by tunnel vision, especially in fields like finance and technology. "Fascinating and surprising" (Fareed Zararia, CNN), *Anthro-Vision* offers a revolutionary new way for understanding the behavior of organizations, individuals, and markets in today's ever-evolving world.

Fool's Gold

HarperCollins UK
"Photographed across four years and four continents, 'The Canary and The Hammer' details our reverence for gold and its role in humanity's ruthless pursuit of progress. Through a mix of image, text and archival material, the third book by British artist Lisa Barnard provides insight into the troubled history of gold and the complex ways it intersects with the global economy. Gold is ubiquitous in modern life; the mineral is concealed at the heart of much of the technology we use and is, most fundamentally, a potent symbol of value, beauty, purity, greed and political power. *The Canary and The Hammer* strives to connect these

disparate stories -- from the mania of the gold rush and the brutal world of modern mining, to the sexual politics of the industry and gold's often dark but indispensable role at the heart of high-tech industry.

Prompted by the financial crisis of 2008 and its stark reminder of the global west's determination to accumulate wealth, Barnard sets out to question gold's continued status as economic barometer amidst new intangible forms of technological high--finance. By addressing this through photography, Barnard in turn raises the question of how her chosen medium can respond to such abstract events and concepts. The result is an ambitious project,

one sketching a personal journey in which she ultimately tackles the complexity of material representation in these fragmented and troubling times."--

The winner of the Man Booker Prize, this "expertly written, perfectly constructed"

bestseller (The Guardian) is now a Starz miniseries. It is 1866, and Walter Moody has come to stake his claim in New Zealand's booming gold rush. On the stormy night of his arrival, he stumbles across a tense gathering of 12 local men who have met in secret to discuss a series of unexplained events: a wealthy man has vanished, a prostitute has tried to end her life, and an enormous cache of gold has been discovered in the home of a luckless drunk. Moody is soon drawn into a network of fates and fortunes that is as complex and exquisitely ornate as the night sky. Richly evoking a mid-nineteenth-century world of shipping,

banking, and gold rush boom and bust, *The Luminaries* is at once a fiendishly clever ghost story, a gripping page-turner, and a thrilling novelistic achievement. It richly confirms that Eleanor Catton is one of the brightest stars in the international literary firmament.

Three Little Words

HQN Books

From award-winning
Financial Times
journalist Gillian Tett,
who enraged Wall
Street leaders with her
news-breaking
warnings of a crisis
more than a year
ahead of the curve,
Fool's Gold tells the
astonishing unknown
story at the heart of
the 2008 meltdown.
Drawing on exclusive
access to J.P. Morgan
CEO Jamie Dimon and
a tightly bonded team
of bankers known on
Wall Street as the
"Morgan Mafia," as
well as in-depth
interviews with dozens
of other key players,
including Treasury
Secretary Timothy

Geithner, Gillian Tett
brings to life in
gripping detail how the
Morgan team's bold
ideas for a whole new
kind of financial
alchemy helped to
ignite a revolution in
banking, and how that
revolution escalated
wildly out of control.
The story begins with
the intense Morgan
brainstorming session
in 1994 beside a pool
in Boca Raton, where
the team cooked up a
dazzling new idea for
the exotic financial
product known as
credit derivatives. That
idea would rip around
the banking world,
catapult Morgan to the
top of the
turbocharged
derivatives trade, and
fuel an extraordinary
banking boom that
seemed to have
unleashed banks from
ages-old constraints of

risk. But when the Morgan team's derivatives dream collided with the housing boom—and was perverted through hubris, delusion, and sheer greed by titans of banking that included Citigroup, UBS, Deutsche Bank, and Merrill Lynch—catastrophe followed. Tett's access to Dimon and the J.P. Morgan leaders who so skillfully steered their bank away from the wild excesses of others sheds invaluable light not only on the untold story of how they engineered their bank's escape from carnage, but also on how possible it was for the larger banking world, regulators, and rating agencies to have spotted, and heeded, the terrible risks of a meltdown. A tale of

blistering brilliance and willfully blind ambition, *Fool's Gold* is both a rare journey deep inside the arcane and wildly competitive world of high finance and a vital contribution to understanding how the worst economic crisis since the Great Depression was perpetrated.

'I have learned to be content in whatever state] I am" (Phil. 4:11)
Anyone who lacks true contentment may find it in this book. If not, it will be because that one would not follow the very clear and simple instructions given. The teaching is from the Bible, yet it must be described as unique. Nowhere else will you find such unusual, but Biblically authenticated thoughts: He will teach you that contentment lies in subtraction, not in addition; that the ABC's of Christianity

are nothing like what you thought them to be; that there is a mystery of contentment, but that once you have learned the way from Christ's word, you will be able to attain such a depth of contentment as you never before dreamed existed. This is a key book for building up Christian maturity. *Christian Contentment*, what is it? "It is a sweet, inward heart thing. It is a work of the Spirit indoors. It is a box of precious ointment, very comforting and useful for troubled hearts in times of troubled conditions.

You're a genius. Nobody plays the financial markets better than you. What

could possibly go wrong? Quants - quantitative analysts - were the maths masterminds let loose on Wall Street in the belief that their brilliant, impregnable computer programs would always beat the market. But as the catastrophic events of 2007 and 2008 showed, their seemingly failproof methods were little more than ticking timebombs. Inspired by the 'Godfather of Quants' - maths-professor-turned-gambler Ed Thorp, who began applying skills learned at the Vegas tables to the financial markets back in the 1950s - the quants achieved extraordinary success and massive wealth. This book charts their rise from obscurity to boom and

then to bust, explaining why they were so confident - and how they got it so disastrously wrong. Pyrite Simon and Schuster
