### Reading Comprehension for Key Stage 1 SAGE

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching

writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

"Will fire imaginations and elicit the heart-pumping, wide-eyed response that has kept this tale alive and vigorous through the ages." — Bulletin of the Center for Children's Books (starred review)  
Long ago a Scandinavian

warrior fought three evils so powerful they threatened whole kingdoms. Standing head and shoulders above his comrades, Beowulf single-handedly saved the land of the Danes from a merciless ogre named Grendel and from his sea-hag mother. But it is his third terrible battle, with the death-dragon of the deep, in which he truly meets his match. Lovers of heroes, monsters, and the drama of battle will find this retelling as enthralling as it is tragic. Now in a handy black-and-white digest edition perfect for classroom use.

Knowledge, Values and  
Educational Policy focuses  
on what schools are for  
and what should be  
taught in them, how  
learning is possible across  
boundaries, and issues of  
diversity and equity.  
Policies and practices  
relating to schools are  
also considered. Within  
this volume,  
internationally renowned  
contributors address a  
number of fundamental  
questions designed to

take the reader to the  
heart of current debates  
around curriculum,  
knowledge transfer,  
equity and social justice,  
and system reform, such  
as: What are schools and  
what are they for? What  
knowledge should schools  
teach? How are learners  
different from each other  
and how are groups of  
learners different from  
one another, in terms of  
social class, gender,  
ethnicity, and disability?  
What influence does  
educational policy have  
on improving schools?  
What influence does  
research have on our  
understanding of  
education and schooling?  
To encourage reflection,  
many of the chapters also  
include questions for  
debate and a guide to  
further reading. Read  
alongside its companion  
volume, *Educational  
Theories, Cultures and  
Learning*, readers will be  
encouraged to consider  
and think about on some  
of the key issues facing  
education and  
educationists today.

Letts and Lonsdale  
Give students the essential thinking skills they need to thrive. Exclusively content-focused teaching may improve test scores, but it leaves students without the cognitive skills for success in an information-overloaded world where deep thinking, collaborative problem solving, and emotional intelligence is essential. In this book, David Hyerle presents case studies of schools and educators who have applied these powerful models, in some case system-wide, to remedy this situation, including: Visual learning tools including Hyerle's renowned Thinking Maps A language for students to improve their intellectual-emotional behaviors as they learn A system for developing students' abilities to ask questions in the context of a developing Community of Inquiry
