The Politics of Uncertainty Routledge

Lane Hirabayashi examines the case of the late Dr. Tamie Tsuchiyama. Drawing from personal letters, ethnographic fieldnotes, reports, interviews, and other archival sources, *The Politics of Fieldwork* describes Tsuchiyama's experiences as a researcher at Poston, Arizona - a.k.a. The Colorado River Relocation Center. The book relates the daily life, fieldwork methodology, and politics of the residents and researchers at the Poston camp, as well as providing insight into the pressures that led to Tsuchiyama's ultimate resignation, in protest, from the JERS project in 1944. A multidisciplinary synthesis of anthropological, historical, and ethnic studies perspectives, *The Politics of Fieldwork* is rich with lessons about the ethics and politics of ethnographic fieldwork.

The Politics and Experience of Listening in the Media Age Penguin

How does the politics of working life shape modern organizations? Is our desire for meaningful, secure work increasingly at odds with corporate behaviour in a globalized economy? Does the rise of performance management culture represent an intensification of work, or create opportunities for the freewheeling individual career? This timely and engaging book, by leading authorities in the field, adopts the standpoint of the 'questioning observer'. It is for those who need an informed account of work that is accessible without being superficial. The book is unique in its multi-dimensional approach, weaving together analysis of individual work experience, political processes in organizations, and the wider context of the social structuring of markets. The book identifies central questions about working experience and answers them in a direct and lively manner. It has a strong analytical foundation based on a political economy framework, giving particular weight to the contradictory character of organizations. These contradictions turn on the competing demands placed on organizations and the different political projects of groups within them. This perspective integrates the

chapters, and permits numerous scholarly debates to be addressed - including those on identity projects, gender and work, power and participation, escalation in decision-making, and the meaning of corporate social responsibility. This book is suitable for undergraduate and graduate classes in Organizational Behaviour, Business Strategy and the Sociology of Work and Employment. It will also appeal to the general reader interested in grappling with the complexity of the changing environment of work.

The Subaltern Appeal to Experience Pantheon

In 2004, the French government instituted a ban on the wearing of "conspicuous signs" of religious affiliation in public schools. Though the ban applies to everyone, it is aimed at Muslim girls wearing headscarves. Proponents of the law insist it upholds France's values of secular liberalism and regard the headscarf as symbolic of Islam's resistance to modernity. *The Politics of the Veil* is an explosive refutation of this view, one that bears important implications for us all. Joan Wallach Scott, the renowned pioneer of gender studies, argues that the law is symptomatic of France's failure to integrate its former colonial subjects as full citizens. She examines the long history of racism behind the law as well as the ideological barriers thrown up against Muslim assimilation. She emphasizes the conflicting approaches to sexuality that lie at the heart of the debate--how French supporters of the ban view sexual openness as the standard for normalcy, emancipation, and individuality, and the sexual modesty implicit in the headscarf as proof that Muslims can never become fully French. Scott maintains that the law, far from reconciling religious and ethnic differences, only exacerbates them. She shows how the insistence on homogeneity is no longer feasible for France--or the West in general--and how it creates the very "clash of civilizations" said to be at the root of these tensions. *The Politics of the Veil* calls for a new vision of community where common ground is found amid our differences, and where the embracing of diversity--not its suppression--is recognized as the best path to social harmony.

Prey Into Hunter Routledge

In focusing on the practices, politics and ethics of listening, this

wide-ranging book offers an important new perspective on questions of media audiences, publics and citizenship. Listening is central to modern communication, politics and experience, but is commonly overlooked and underestimated in a culture fascinated by the spectacle and the politics of voice. *Listening Publics* restores listening to media history and to theories of the public sphere. In so doing it opens up profound questions for our understanding of mediated experience, public participation and civic engagement. Taking a cross-national and interdisciplinary approach, the book explores how listening publics have been constituted in relation to successive media technologies from the invention of writing to the digital age. It asks how new practices of listening associated with sound and audiovisual media transform a public world forged in the age of print. Through detailed histories and sophisticated theoretical analysis, *Listening Publics* demonstrates the embodied and critical activity of listening to be a rich concept with which to rethink the practices, politics and ethics of media communication.

The Politics of Presence Univ of California Press

Increased environmental awareness, more demands on local governments, a newly invigorated citizen activism, and a decaying and overburdened infrastructure have made taking care of our garbage one of the major policy making challenges facing local communities. Luton uses the case study of Spokane WA to analyze the public administration and socio-political context of solid waste policy making. Luton's thorough exploration of Spokane's experience as opens a window onto contemporary issues of solid waste management as well as the complex social and political environment in which public administrators must operate. His integration of systems theory in the analysis adds to the book's value as a teaching tool for courses on policy making, urban planning, public administration, and the environment. He examines the complex combination of ecological, political, social and relational dynamics that affect such policies, providing insight into inter-governmental public policy making.

**Somatics, Healing, and Social Justice** MIT Press

John E. McDonough affords a rare glimpse into the practice of state politics in this insider's account of the fascinating interface

between political science and real-life politics. A member of the Massachusetts House of Representatives for thirteen years and a skilled storyteller, McDonough eloquently weaves together stories of politics and policy with engaging theoretical models in a way that illuminates both the theory and the practice. By providing a link between scholarship and the world of experience, he communicates much about the essence of representative democracy. In the process, he demonstrates how politics extend beyond the public sphere into many aspects of life involving diverse values and interests. McDonough describes the nature of conflict, the role of interests, agenda setting, the nature and pace of change, the use of language, and more. Accessible, insightful, and original, his stories touch on a broad range of issues—including health care politics, campaigns, and elections; a street gang called the X-men; the death penalty; campaign finance reform, and tenants versus landlords. To the author, politics is everywhere and political dynamics are universal. While the setting for this book is one legislature, the lessons and insights are intended for everyone.

Experiences and Politics of AIDS in South Africa Indiana University Press

In 'The Politics of Experience' and the visionary 'Bird of Paradise', R.D. Laing shows how the straitjacket of conformity imposed on us all leads to intense feelings of alienation and a tragic waste of human potential. He throws into question the notion of normality, examines schizophrenia and psychotherapy, transcendence and 'us and them' thinking, and illustrates his ideas with a remarkable case history of a ten-day psychosis. 'We are bemused and crazed creatures,' Laing suggests. This outline of 'a thoroughly self-conscious and self-critical human account of man' represents a major attempt to understand our deepest dilemmas and sketch in solutions. 'Everyone in contemporary psychiatry owes something to R.D. Laing' Anthony Clare, the Guardian.

A Legislator's Stories of Government and Health Care Yale University Press

The Open Access version of this book, available at <http://www.tandfebooks.com/>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. There has been an enormous increase in interest in the use of evidence for public policymaking, but the vast majority of work on the subject has failed to engage with the political

nature of decision making and how this influences the ways in which evidence will be used (or misused) within political areas. This book provides new insights into the nature of political bias with regards to evidence and critically considers what an 'improved' use of evidence would look like from a policymaking perspective. Part I describes the great potential for evidence to help achieve social goals, as well as the challenges raised by the political nature of policymaking. It explores the concern of evidence advocates that political interests drive the misuse or manipulation of evidence, as well as counter-concerns of critical policy scholars about how appeals to 'evidence-based policy' can depoliticise political debates. Both concerns reflect forms of bias – the first representing technical bias, whereby evidence use violates principles of scientific best practice, and the second representing issue bias in how appeals to evidence can shift political debates to particular questions or marginalise policy-relevant social concerns. Part II then draws on the fields of policy studies and cognitive psychology to understand the origins and mechanisms of both forms of bias in relation to political interests and values. It illustrates how such biases are not only common, but can be much more predictable once we recognise their origins and manifestations in policy arenas. Finally, Part III discusses ways to move forward for those seeking to improve the use of evidence in public policymaking. It explores what constitutes 'good evidence for policy', as well as the 'good use of evidence' within policy processes, and considers how to build evidence-advisory institutions that embed key principles of both scientific good practice and democratic representation. Taken as a whole, the approach promoted is termed the 'good governance of evidence' – a concept that represents the use of rigorous, systematic and technically valid pieces of evidence within decision-making processes that are representative of, and accountable to, populations served.

Sister Style Columbia University Press

In this book, France's leading medical anthropologist takes on one of the most tragic stories of the global AIDS crisis—the failure of the ANC government to stem the tide of the AIDS epidemic in South Africa. Didier Fassin traces the deep roots of the AIDS crisis to apartheid and, before that, to the colonial period. One person in ten is infected with HIV in South Africa, and President Thabo Mbeki has initiated a global controversy by funding questionable

medical research, casting doubt on the benefits of preventing mother-to-child transmission, and embracing dissidents who challenge the viral theory of AIDS. Fassin contextualizes Mbeki's position by sensitively exploring issues of race and genocide that surround this controversy. Basing his discussion on vivid ethnographical data collected in the townships of Johannesburg, he passionately demonstrates that the unprecedented epidemiological crisis in South Africa is a demographic catastrophe as well as a human tragedy, one that cannot be understood without reference to the social history of the country, in particular to institutionalized racial inequality as the fundamental principle of government during the past century. Art, Politics, and the Nature of Experience Gallaudet University Press

Originally published in 1969, based on the talks R. D. Laing gave in 1967 and 68, this book was intended by the author to evoke questions rather than provide answers. Using concepts of schizophrenia, R.D. Laing demonstrates that we tend to invalidate the subjective and experiential and accept the proper societal view of what should occur within the family.

**A study of schizophrenia and culture in Turkey** The Politics of Experience

When it first appeared in 1933, Experience and its Modes was not considered a classic. But as philosophical fashion moved away from the analytic philosophy of the 1930s, this work began to seem ahead of its time. Arguing that experience is 'modal', in the sense that we always have a theoretical or practical perspective on the world, Michael Oakeshott explores the nature of philosophical experience and its relationship to three of the most important 'modes' of non-philosophical experience - science, history and practice - seeking to establish the autonomy and superiority of philosophy. In recognition of its enduring

importance, this book is presented in a fresh series livery for a new generation of readers, featuring a specially commissioned Preface written by Paul Franco.

**Self-Identity, Late Modernity, and the Politics of Immediacy** North Atlantic Books

In this book Maurice Bloch synthesises a radical theory of religion.

**The Politics of Catastrophe** John Wiley & Sons

In this classic work of feminist political thought, Iris Marion Young challenges the prevailing reduction of social justice to distributive justice. The starting point for her critique is the experience and concerns of the new social movements that were created by marginal and excluded groups, including women, African Americans, and American Indians, as well as gays and lesbians. Young argues that by assuming a homogeneous public, democratic theorists fail to consider institutional arrangements for including people not culturally identified with white European male norms. Consequently, theorists do not adequately address the problem of an inclusive participatory framework. Basing her vision of the good society on the culturally plural networks of contemporary urban life, Young makes the case that normative theory and public policy should undermine group-based oppression by affirming rather than suppressing social group differences. Danielle Allen's new foreword contextualizes Young's work and explains how debates surrounding social justice have changed since — and been transformed by — the original publication of *Justice and the Politics of Difference*.

**Research in an American Concentration Camp** U of Minnesota Press

'The capacity to affect and to be affected'. This simple definition opens a world of questions - by indicating an openness to the world. To affect and to be affected is to be in encounter, and to be in encounter is to have already ventured forth. Adventure: far from being enclosed in the interiority of a subject, affect concerns an immediate participation in the events of the world. It is about intensities of experience. What is politics made of, if not adventures of encounter? What are encounters, if not adventures of relation? The moment we begin to speak of affect, we are already venturing into the political dimension of relational encounter. This is the dimension of experience in-the-making. This is the level at which politics is emergent. In these wide-ranging interviews, Brian Massumi explores this emergent politics

of affect, weaving between philosophy, political theory and everyday life. The discussions wend their way 'transversally': passing between the tired oppositions which too often encumber thought, such as subject/object, body/mind and nature/culture. New concepts are gradually introduced to remap the complexity of relation and encounter for a politics of emergence: 'differential affective attunement', 'collective individuation', 'micropolitics', 'thinking-feeling', 'ontopower', 'immanent critique'. These concepts are not offered as definitive solutions. Rather, they are designed to move the inquiry still further, for an ongoing exploration of the political problems posed by affect. Politics of Affect offers an accessible entry-point into the work of one of the defining figures of the last quarter century, as well as opening up new avenues for philosophical reflection and political engagement.

**Re-Writing Latin American Experiences** University of Pittsburgh Press

In 1965, the United States government enacted legislation to provide low-income individuals with quality health care and related services. Initially viewed as the friendless stepchild of Medicare, Medicaid has grown exponentially since its inception, becoming a formidable force of its own. Funded jointly by the national government and each of the fifty states, the program is now the fourth most expensive item in the federal budget and the second largest category of spending for almost every state. Now, under the new, historic health care reform legislation, Medicaid is scheduled to include sixteen million more people. Laura Katz Olson, an expert on health, aging, and long-term care policy, unravels the multifaceted and perplexing puzzle of Medicaid with respect to those who invest in and benefit from the program. Assessing the social, political, and economic dynamics that have shaped Medicaid for almost half a century, she helps readers of all backgrounds understand the entrenched and powerful interests woven into the system that have been instrumental in swelling costs and holding elected officials hostage. Addressing such fundamental questions as whether patients receive good care and whether Medicaid meets the needs of the low-income population it is supposed to serve, Olson evaluates the extent to which the program is an appropriate foundation for health care reform.

**The Politics of the Veil** University of Notre Dame Press

Why is uncertainty so important to politics today? To explore the underlying reasons, issues and challenges, this book's chapters address finance and banking, insurance, technology regulation and critical infrastructures, as well as climate change, infectious disease responses, natural disasters, migration, crime and security and spirituality and religion. The book argues that uncertainties must be understood as complex constructions of knowledge, materiality, experience, embodiment and practice. Examining in particular how uncertainties are experienced in contexts of marginalisation and precarity, this book shows how sustainability and development are not just technical issues, but depend deeply on political values and choices. What burgeoning uncertainties require lies less in escalating efforts at control, but more in a new - more collective, mutualistic and convivial - politics of responsibility and care. If hopes of much-needed progressive transformation are to be realised, then currently blinkered understandings of uncertainty need to be met with renewed democratic struggle. Written in an accessible style and illustrated by multiple case studies from across the world, this book will appeal to a wide cross-disciplinary audience in fields ranging from economics to law to science studies to sociology to anthropology and geography, as well as professionals working in risk management, disaster risk reduction, emergencies and wider public policy fields.

**The Politics of Religious Experience** Routledge

"Experience" is a thoroughly political category, a social and historical product not authored by any individual. At the same time, "the personal is political," and one's own lived experience is an important epistemic resource. In *Anaesthetics of Existence* Cressida J. Heyes reconciles these two positions, drawing on examples of things that happen to us but are nonetheless excluded from experience. If for Foucault an "aesthetics of existence" was a project of making one's life a work of art, Heyes's "anaesthetics of existence" describes antiprojects that are tacitly excluded from life—but should be brought back in. Drawing on critical phenomenology, genealogy, and feminist theory, Heyes shows how and why experience has edges, and she analyzes phenomena that press against those edges. Essays on sexual violence against unconscious victims, the temporality of drug use, and childbirth as a limit-experience build a politics of experience while showcasing Heyes's much-needed new

philosophical method.

*The Politics of Immunity* Penguin UK

How do political appointees chosen to head government agencies deal with the powerful political forces that surround them? In a fascinating and instructive book Philip B. Heymann draws on his own experience and on the successes and failures of such prominent officials as Casper Weinberger, Anne Burford Gorsuch, Les Aspin, Edwin Meese, and Joseph Califano in order to explore

the political context of high-level government management. Not only has Heymann written a superb manual for would-be presidential appointees, he has written an insightful political history of the past decade and a half. -Issues in Science and Technology Great help to incumbents as well as newcomers, and one classic-to-be in its field. -The Bureaucrat In my opinion, Heymann has written the most interesting book on the politics of

management since Chester Barnard. -Theodore R. Marmor, Yale University A marvelous combination of analytics commentary and case illustrations, *The Politics of Public Management* is filled with insights that are both powerful and original. -Richard E. Neustadt, Harvard University

*Politics of Affect* OUP Oxford

Published in the year 2002, *Selected Works RD Laing: Self & Other V2* is a valuable contribution to the field of Major Works.
