Examining Local Efforts to Address the Continuing Foreclosure Crisis GRIN Verlag
 In *Foreclosed*, Christopher K. Odinet gives voice to the stories of homeowners that have been neglected, particularly those facing foreclosure and deep financial distress. The book reveals the powerful and often invisible mortgage servicing industry, the tremendous discretionary power it wields over the housing lives of most Americans, and the servicing problems that still persist today. In doing so, it unveils a quiet and dangerous market shift in mortgage servicing - namely, an ongoing move toward a shadow banking sector where regulation is weak - that threatens the stability of our housing finance system. Ultimately, the book demonstrates how the law does not afford homeowners the protection most think and how regulation of these mortgage middlemen remains weak. *Foreclosed* should be read by anyone concerned with the state of housing and home ownership in the United States.

Now in paperback-an inside look at Countrywide Home Loans and the mortgage crisis, from a former

mortgage lender executive. In July 2004, Adam Michaelson attended a high-level meeting at Countrywide Financial headquarters about a new loan product that would allow borrowers to pay less than their minimum monthly payment. The "finance jocks" believed that the booming housing market would only get bigger, supporting homeowners in a cycle of borrowing against their houses and refinancing later. They were wrong. And when the bottom dropped out, Countrywide suffered the consequences-as did millions of Americans. With an insider's knowledge and thorough reporting on the impact on American families and the ripple effects on the economy, Michaelson examines the marketing of a mirage and the bad business decisions that destroyed a company, confronts the ethical questions that have arisen in the wake of the foreclosure crisis, and offers creative proposals to prevent such a meltdown from ever happening again.

In the depths of the Great Recession, a cancer nurse, a car dealership worker, and an insurance fraud specialist helped uncover the largest consumer crime in American history—a scandal that implicated dozens of major executives on Wall Street. They called it foreclosure fraud: millions of families were kicked out of their homes based on false evidence by mortgage companies that had no legal right to foreclose. Lisa Epstein, Michael Redman, and Lynn Szymoniak did not work in government or law enforcement. They had no history of anticorporate activism. Instead they were all foreclosure victims, and while struggling with their shame and isolation they committed a revolutionary act: closely reading their mortgage documents, discovering the deceit behind them, and building a movement to expose it. Fiscal Times columnist David Dayen recounts how these ordinary Floridians challenged the most powerful institutions in America armed only with the truth—and for a brief moment they brought the corrupt financial industry to its knees.

The Secret of Mortgage Lending Success AuthorHouse

Part economic history, part public history, *A History of Mortgage Banking in the West* is an insider's account of how the mortgage banking sector worked over the last 150 years, including analysis of the causes of the 2007 mortgage crisis. Beginning with the land and railroad development acts that encouraged settlement in the west, E. Michael Rosser and Diane M. Sanders trace the laws, institutions, and individuals that contributed to the economic growth of the region. Using Colorado and the west as a case study for the nation's economic and property development as a whole since the late nineteenth century, Rosser and Sanders explain how farm mortgages and agricultural lending steadily gave way to urban development and housing mortgages, all while the large mortgage and investment firms financed the development of some of the state's most important water resources and railroad networks. Rosser uses his personal experience as a lifelong practitioner and educator of mortgage banking, along with a plethora of primary sources, academic archives, and industry publications, to analyze the causes of economic booms and busts as they relate to real estate and development. Rosser's professional acumen combined with Sanders's research experience makes *A History of Mortgage Banking in the West* a rich and nuanced account of the region's most significant economic events. It will be an important work for scholars and practitioners in regional and financial history, mortgage market practice and development, government housing and mortgage policy, and financial stability and of great significance to anyone curious about the role of the federal government in national housing policy and the inherent risk in mortgages.

This book continues the saga of how the author dealt with the mortgage crisis by working with the banks, real estate brokers, and a bankruptcy attorney, while meeting with other middle income homeowners in trouble and with activist groups fighting foreclosures. It describes her experiences attending a foreclosure prevention workshop seeking a loan modification, and going to a foreclosure auction. It concludes with what the author learned from navigating the system, selling her home,

renting in San Francisco, and turning her life around to gain success again. The book has gained growing support from individuals and groups active in this arena.
