**** Limited Time Offer! ****It is human
nature to shy away from facing the hard
realities of life. Most of us also have a
tendency to defer important tasks. As a
result, we often ignore our insurance
needs, delay our regular health check-

ups, and avoid our routine maintenance
tasks. However, the fact remains that
even if we avoid a potential risk, it may
still materialize. In fact, lack of
preparation may cause us to suffer
devastating consequences in the event
of a mishap. Unfortunately, many people
have a false notion that they would
never fall prey to unfortunate incidents,
especially when it comes to natural
calamities. However, depending on
fortune is never a great strategy, while
relying on disaster assistance from the
government is not a plan. A catastrophe
may force us to live without the basic
facilities, such as, water supplies,
electricity services, medical services,
and phone services. Depending upon the

severity of a disaster, it may take days or weeks to get back to a normal situation. In order to ensure that you and dear ones don't end up compromising your basic survival needs during that crucial phase, you should prepare well in advance. Knowledge and correct information are the first steps to survival. There are generic preparations that are appropriate for every emergency situation. However, concrete and careful

planning is needed for you and your family to survive during emergency situations. For instance, you prepared a basic prep kit that includes a first aid kit, matches, bottled water, and no-cook food items. This kit can be easily packed in your car for emergency cases while on the road. This is a life saver. However, this kit will do only a little help if you are facing complex situations such as freezing water. You do not have enough proper supplies to meet the exacting needs of the situation because you as the prepper did not anticipate the additional gear you will need.

The lights go out, the power shuts off, cars crash, and all electronic devices cease to work. In the blink of an eye, the world has gone dark and cold. This is what will happen as a result of an EMP attack on the United States. We will have been officially thrown back to the Stone Ages, and things could remain that way for ten years. During that time, over 90% of the population will die from starvation, dehydration, disease, murder, and suicide. The only question is: are you prepared? That's why I decided to write a series of in-depth books that discuss the specifics on how to get prepared for an EMP attack like I've just described. The purpose behind these books is to help educate people who are new to disaster preparedness, people such as

yourself, on concepts you can easily apply in your own life so you can become more prepared for EMP attacks and other disaster. For the next book in the EMP Attack Survival Guide Series, we will be discussing the topic of urban survival during an EMP Attack.

Specifically, since urban survival is such a broad subject, this will be the first book in a three book miniseries of EMP Attack Urban Survival Books. In this book, we will cover the following topics on urban survival: - Basic Urban Survival Skills - Security Options - Protecting Your Home - Alternate Heat and Light Sources - Caring For Your Pets - Stockpiling An Emergency Pantry By the end of this book, you will have gained much more important knowledge on what it takes to survive an EMP attack in an urban

setting.

***** Homesteading: Homesteading For Survival - Homesteading Projects For Preppers Many of the myths that surround the prepper community are caused by the prepper television shows. While these are entertaining and do sometimes contain some good hints and tips, it is important to remember that these are just television programs with editing and careful selection. The producers purposely pick the people who would be deemed the most extreme or perhaps the "nuttiest" because they are the ones that make good television. The real preppers are the ones that are not doing stunts for TV. They are the ones with the right mindset and mental attitude and they are doing these things quietly for their families, not parading their choices for everyone to see.

Homesteading and/or prepping takes a lot of hard work and dedication but it is very rewarding to know that you are not only becoming more and more self-reliant but that you can also have fun and be a little creative at times as well. This is not all about gloom and doom, after all. These projects are easy enough for most people to handle and will help expand your range of skills in the process. In this book, you will find a collection of my favorite DIY homesteading projects with step-by-step instructions. Enjoy! Createspace Independent Publishing Platform

Plan . Prepare . Survive! A practical low-cost prepping blueprint that will teach you how to survive the end of the world, as we know it, with easy to follow step-

by-step instructions to guide you every step of the way. It should be common knowledge, to anyone with a brain and common sense that the world that we live in can be thrown into chaos at any moment by natural disaster, economic collapse, electromagnetic pulse, viral pandemic, or any number of other disasters... Even the federal government suggests everyone have a "survival kit" on hand at all times, however, they only recommend a three-day to a one-week supply of essential items, which is not sufficient to protect you and your family after an end of the world as we know it event strikes. But, where do you start? You start With The Prepper's Guide to Surviving the End of the World as We Know It - this must read 176-page paperback prepper book teaches you

how to survive even if things never return to normal.
