International Standard Banking Practice (ISBP) for the examination of documents under documentary credits, answers the most relevant questions practitioners have concerning how UCP 500, ICC's universally used rules on documentary credits, are to be integrated into day-to-day practice. The product of more than two years

of work by the ICC Banking Commission, ISBP is based on the official Opinions issued by the Banking Commission in response to queries submitted by users of UCP 500. The text provides responses to the key questions relating to the examination of drafts, multimodal transport documents, insurance documents, certificates of origin and a range of other documents associates with letters of credit. This publication reflects international standard banking practice for all parties to a documentary credit. Figures show that 60%-70% of credits are rejected for discrepancies on first presentation. The new ISBP, by encouraging a uniformity of practice

worldwide, is expected to cut these figures dramatically and, by doing so, to facilitate the flow of world trade.

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid

use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual

and societal considerations into its risk-benefit framework for opioid approval and monitoring.

In eastern nations of the

world, the interest in economic growth has been in the centrestage in view of the persistently high rates of unemployment and resurgence of recessionary pressures on these economies due to spillover effects from other developed economies undergoing recessionary phases. Entrepreneurial activities not only open up new doorways of income generation for individuals residing in the economy but is also looked upon now as panacea to treat unemployment by most governments, provided such ventures turn out to be revenue generating for the entrepreneur after all the risk he is willing to undertake. Entrepreneurship contributes to the development of

innovative technologies, processes as well as business systems which in turn influences the prevailing market structures in the economy disrupting the competition existing in the markets. Nonetheless it bound to impact the capital formation in the economy and thus the growth of the economy. The inter relations between credit extension by commercial banks, entrepreneurship and economic growth are investigated in this paper empirically using autoregressive models.

The anthrax incidents following the 9/11

Focusing on diverse partnerships as the framework for

public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation.
