Written for pre-service and in-service early childhood professionals in child care, preschool, or kindergarten through third grade settings, *ART & CREATIVE DEVELOPMENT FOR YOUNG CHILDREN*, 8th Edition, takes a child-centered approach to art education. Updated throughout, the book includes an in-depth discussion of technology to aid teachers in understanding the role that technology can play in children's visual art appreciation and production. Guidelines for establishing an inclusive art program in classrooms for young children are included for early childhood professionals. Activities and recipes make the text a valuable resource for in-service teachers. *World History, the Human Experience* Springer Science & Business Media  
This concise commentary on the Apocrypha, excerpted from the *Fortress Commentary on the Bible: The Old Testament and Apocrypha*, engages readers in the work of biblical interpretation. Contributors from a rich diversity of perspectives connect historical-critical analysis with sensitivity to current theological, cultural, and interpretive issues. Introductory articles describe the challenges of reading the Old Testament in ancient and contemporary contexts, relating the biblical theme of "the people of God" to our complex, multicultural world, and

reading the Old Testament as Christian Scripture, followed by an "Introduction to the Apocrypha." Each chapter (Tobit through 4 Maccabees) includes an introduction and commentary on the text through the lenses of three critical questions: The Text in Its Ancient Context. What did the text probably mean in its original historical and cultural context? The Text in the Interpretive Tradition. How have centuries of reading and interpreting shaped our understanding of the text? The Text in Contemporary Discussion. What are the unique challenges and interpretive questions that arise for readers and hearers of the text today? The Apocrypha introduces fresh perspectives and draws students, as well as preachers and interested readers, into the challenging work of interpretation.

Prepare for the NCLEX with this fun, full-color review! Illustrated Study Guide for the NCLEX-RN® Exam, 9th Edition uses colorful drawings and mnemonic cartoons to cover the nursing concepts and content found on the NCLEX-RN examination. A concise outline format makes studying easier, and the Evolve companion website includes 2,500 NCLEX exam-style review questions (including alternate item formats) - allowing you to create practice exams, identify your strengths and weaknesses, and review answers and rationales. Written by NCLEX expert JoAnn Zerwekh, this study guide offers a clear, visual way to remember key facts for the NCLEX exam. UNIQUE! Mnemonic cartoons provide a fun, easy way to review and remember key nursing concepts and disease processes. UNIQUE! The integrated systems

approach incorporates pediatric, adult, maternity, and older adult lifespan considerations in each body system chapter. Practice questions on the Evolve companion website are available in both study and quiz modes and separated by content area, allowing you to customize your review based on your personal study needs. UNIQUE! Appendixes for each chapter summarize medications and nursing procedures for quick reference. Alternate item format questions on Evolve prepare you for the interactive question types on the NCLEX examination, including priority drag-and-drop and hot-spot (illustrated point-and-click) questions. Answers and rationales for all review questions show why correct answers are right and incorrect options are wrong. Separate chapters on pharmacology and nursing management help you to focus on these areas of emphasis on the NCLEX examination. Nursing Priority boxes make it easier to distinguish priorities of nursing care. Pharmacology tables make key drug information easy to find, with high-alert medications noted by a special icon. Special icons distinguish pediatric and adult disorders, and identify content on Self-Care and Home Care. UPDATED content reflects the most recent NCLEX-RN test plan and incorporates important clinical updates. NEW! 2,500 review questions are now included on the Evolve companion website, adding more 200 questions to the total on the previous edition. NEW! Addition of SI Units and removal of trade-name drugs reflects changes in the NCLEX-RN test plan. NEW! Additional alternate item questions are included on Evolve, and new questions incorporating video are also added. NEW! Test Alert! boxes in the book highlight key concepts frequently found on the NCLEX

examination. NEW! Additional memory notecard-type illustrations are included in the book to accommodate visual learners.

This volume outlines the belief that nursing homes can and should support the physical, psychological, and social needs of residents, and that residents can thrive in nursing homes when these needs are met. The book's contributors explore the role that palliative or comfort care plays in enhancing the quality of life of nursing home residents as well as the medical, familial, psychological, cultural, and financial issues that influence decision-making about end-of-life care. The book is designed to be a tool to prepare social workers to advocate for a greater incorporation of palliative care and psychosocial care into the culture of nursing home care. The book includes discussions of the psychosocial needs of nursing home residents and families, the financing of long-term care and end-of-life care, ethical issues in chronic care and end of life, trends and characteristics in nursing home care, rituals and grief at end-of-life, and considerations for the future. Each chapter includes case examples to further illustrate points made.

Transforming Universities with Digital Distance Education explores the ways in

which higher education stakeholders can apply and leverage the benefits of online learning. Systems-wide access, scale and quality are achievable goals but require forms of teamwork and financial modelling beyond those at the instructor or programme level. This book's organisational view tackles the systems and practices that will help senior managers and decision-makers guide an entire institution away from dysfunction—incremental progress, insufficient capacity, high costs and generic products—and towards the macro-level implementation and operations of effective online pedagogies.

This uniquely in-depth book offers a blow-by-blow account of the sometimes problematic dynamics of conducting collaborative fieldwork in ethnography. Tracing the interplay between co-researchers at various points of contact in both professional and personal relations, the analysis draws out the

asymmetries which can develop among team members nominally working towards the same ends. It details the often complex dialogues that evolve in an attempt to navigate conflicting interests, such as team members' resistances to particular methodological 'recipes' or research protocols. The authors show that such debates can create an open forum to negotiate new practices. A key element of this publication is that it goes beyond an analysis of more traditional power relations in research teams comprising members at different academic pay grades. As well as drawing attention to gender-related dynamics in research collaborations, the authors use themselves as an exemplar to demonstrate how differences in age, experience, knowledge, professional skills and background can be exploited to generate positive outcomes constituting much more than the apparent sum of their parts. In doing so, the authors reveal the delightful, surprising and yet challenging aspects of research collaboration that are often absent from the qualitative literature.

The use of mobile technology for learning in organizations and the workplace is spreading widely with the development of infrastructure and devices that allow ubiquitous learning and training. Since learning, teaching, and training in a mobile-saturated

environment is a developing field, implications for a combined overview of these topics may be beneficial both for research and practice in the broader view of a user's lifespan. Mobile Technologies in Educational Organizations is a collection of innovative research on the methods and applications of mobile technologies in learning and training and explores best practices of mobile learning in organizations and the workplace. While highlighting topics including ethics, informal education, and virtual reality, this book is ideally designed for teachers, administrators, principals, higher education professionals, instructional designers, curriculum developers, managers, researchers, and students.

This book of conference proceedings contains papers presented at the Art and Design International Conference (AnDIC 2016). It examines the impact of Cyberology, also known as Internet Science, on the world of art and design. It looks at how the rapid growth of Cyberology and the creation of various applications and devices have influenced human relationships. The book discusses the impact of Cyberology on the behaviour, attitudes and perceptions of users, including the way they work and communicate. With a strong focus on how the Cyberology world influences and changes the methods and works of artists, this book features topics that are relevant to four key players - artists, intermediaries, policy makers, and the audience - in a cultural system, especially in the world of art and design. It examines the development, problems and issues of traditional cultural values, identity and new trends in contemporary art. Most importantly, the book attempts to discuss the past, present and future of art and design whilst looking at some underlying issues that need to be addressed collectively.

Guided Math Lessons in Fourth Grade provides detailed lessons to help you bring guided math groups to life. Based on the bestselling Guided Math in Action, this practical book offers 16 lessons, taught in a round of three—concrete, pictorial and abstract. The lessons are based on the priority standards and cover fluency, word problems, fractions and place value. Author Dr. Nicki Newton shows you the content as well as the practices and processes that should be

worked on in the lessons, so that students not only learn the content but also how to solve problems, reason, communicate their thinking, model, use tools, use precise language, and see structure and patterns. Throughout the book, you'll find tools, templates and blackline masters so that you can instantly adapt the lesson to your specific needs and use it right away. With the easy-to-follow plans in this book, students can more work effectively in small guided math groups—and have loads of fun along the way! Remember that guided math groups are about doing the math. So doing mathematical sketches to show what they understand and can make sense of the abstract numbers. When students are given the opportunities to make sense of the math in hands-on and visual ways, then the math begins to make sense!
