Thirty years ago, David Leavitt first appeared on the literary scene with a gutsy story collection that stunned readers and reviewers. Just twenty-three, he was hailed as a prodigy of sorts: “remarkably gifted” (The Washington Post), with “a genius for empathy” (The New York Times Book Review) and “a knowledge of others' lives . . . that a writer twice his age might envy” (USA Today). “Regardless of age,” wrote the New York Times, “few writers so effortlessly achieve the sense of maturity and earned compassion so evident in these pages.” In “Territory,” a well-intentioned, liberal mother, presiding over her local Parents of Lesbians and Gays chapter, finds her acceptance of her son's sexuality shaken when he arrives home with a lover. In the title story, a family extended through divorce and remarriage dances together at the end of a summer party-in the recognition that they are still bound by the very forces that split them apart. Tender and funny, these stories reveal the intricacies and subtleties of the dances in which we all engage.

How Not to Kill Your Houseplant Ryland Peters & Small

When Anna-Theresa Bauer, MD, was only fifteen years old, pads of fat appeared for no reason in her thighs and hips. And this wasn't just weight gain from puberty. No matter what she ate, how little she ate, or how much she exercised, the fat just kept on growing. As an adult, Dr. Bauer set herself the task of finally figuring out why she couldn't stop the fat. What she discovered would set her free-and now she wants to share that freedom with you. It was never her fault. She had a disease called lipedema, and like millions of other women worldwide, she had no idea such a condition even existed. If you're a woman who just can't stop gaining weight in your lower body, no matter what you do, you may in fact have lipedema. And with Dr. Bauer's help, you can overcome the disease you never knew you had. You don't have to feel like you're trapped in your own body any longer. Dr.

Bauer's discovery allowed her to finally bloom, to become the beautiful swan she always knew she was. Are you ready to join her?

Monkâ??s House in Sussex is the former home of Leonard and Virginia Woolf. It was bought by them in 1919 as a country retreat, somewhere they came to read, write and work in the garden. From the overgrown land behind the house they created a brilliant patchwork of garden rooms, linked by brick paths, secluded behind flint walls and yew hedges. The story of this magical garden is the subject of this book and the author has selected quotations from the writings of the Woolfs which reveal how important a role the garden played in their lives, as a source of both pleasure and inspiration. Virginia wrote most of her major novels at Monkâ??s House, at first in a converted tool shed, and later in her purpose-built wooden writing lodge tucked into a corner of the orchard. Caroline Zoob lived with her husband, Jonathan, at Monkâ??s House for over a decade as tenants of the National Trust, and has an intimate knowledge of the garden they tended and planted. The photographer, Caroline Arber, was a frequent visitor to the house during their tenancy and her spectacular photographs, published here for the first time, often reveal the garden as it is never seen by the public: at dawn, in the depths of winter, at dusk. The photographs and text, enriched with rare archive images and embroidered garden plans, take the reader on a journey through the various garden â??roomsâ??. (including the Italian Garden, the Fishpond Garden, the Millstone Terrace and the Walled Garden). Each garden room is presented in the context of the lives of the Woolfs, with fascinating glimpses into their daily routines at Rodmell. This beautiful book is an absorbing account of the creation of a garden which will appeal equally to gardeners and those with an interest in Virginia and Leonard Woolf.

“What would the world look like if girls grew up reading fairytales made from the magic they carry inside themselves? Breathtakingly beautiful, is what.” —Lidia Yuknavich, national bestselling author In her debut children’s book, Rebecca Solnit reimagines a classic fairytale with a fresh, feminist Cinderella and new plot twists that will inspire young readers to change the world, featuring gorgeous silhouettes from Arthur Rackham on each page. In this modern twist on the classic story, Cinderella, who would rather just be Ella, meets her fairy godmother, goes to a ball, and makes friends with a prince. But that is where the familiar story ends. Instead of waiting to be rescued, Cinderella learns that she can save herself and those around her by being true to herself and standing up for what she believes. “Being a princess is absolutely fine if that’s what you choose. It’s having those choices taken away from you that make for big problems. Cinderella in Solnit’s book is given that choice. She’s allowed to say what her dreams are, and then she goes out and attains them. And they’re not huge ridiculous dreams but small, happy, manageable ones. Ultimately, that’s the gift Ms. Solnit is giving kids with this book.” —School Library Journal “This is a reminder of hope and possibility, of kindness and compassion, and—perhaps most salient—imagination and liberty. Through the imaginations of our childhoods, can we find our true selves liberated in adulthood?” —Chelsea Handler “This is, hands down, a wonderful book—one that even the jaded reader will clasp upon completion with a contented sigh.” —The New York Times

From Orson Scott Card, the internationally bestselling author of Ender’s Game, comes the first novel in the Pathfinder trilogy, the riveting story of Rigg, a teenager who possesses a special power that allows him to see the paths of people’s pasts. A powerful secret. A dangerous path. Rigg is well trained at keeping secrets. Only his father knows the truth about Rigg’s strange talent for seeing the paths of people’s pasts. But when his father dies, Rigg is stunned to learn just how many secrets Father had kept from him—secrets about Rigg’s own past, his identity, and his destiny. And when Rigg discovers that he has the power not only to see the past, but also to change it, his future suddenly becomes anything but certain. Rigg’s birthright sets him on a path that leaves him caught between two factions, one that wants him crowned and one that wants him dead. He will be forced to question everything he thinks he knows, choose who to trust, and push the limits of his talent...or forfeit control of his destiny.

A new play by a rising Mexican playwright is premiering, and Eve and her lover, Silvio Aguilar, are there -- the writer is Silvio's friend from their barrio days. When the lead actress is a no-show, Eve quickly uncovers that Silvio has complicated past ties to the missing diva. But there is no time for hurt, betrayal, or suspicion -- not when there are signs of a struggle at the actress's bungalow. To make matters worse, an eager young reporter, whom Eve is mentoring, keeps insinuating herself into the case at every turn, crossing ethical lines that could bring Eve down with her. . . or get them both killed.

Indoor hanging baskets? Who needs them! Learn all about the Japanese art of creating pot-less suspended plants, known as kokedama, from New Zealand hanging plant extraordinaire and botanist, Coraleigh Parker. Coraleigh's moss ball creations, featuring orchids, air plants, cacti, succulents, flowering bulbs, tropical plants and even small trees and herbs, are suspended in mid-air and supported by nothing more than a series of strings, intricately wrapped, cocoon style, around a root ball. Kokedamas are very simple to make and have a magical quality; by suspending them in the air with string, with Coraleigh’s help and 25 easy-to-follow projects, you can create a hanging garden inside your home in no time. Decorating with indoor plants has never been more popular and, following on from terrariums, concrete pot planting and the obsession with fern, cacti and succulents, contemporary kokedama is the next trend that’s spreading fast. Kokedama is the ultimate botanical trend as it offers everything through a single, versatile and inexpensive craft: you can turn any of your favourite plants into a kokedama “on a string”!

“Fascinating...full of optimism...this quick, accessible read will appeal to anyone with interest in how plants continue to surprise us.” —Library Journal Do plants have intelligence? Do they have memory? Are they better problem solvers than people? The Revolutionary Genius of Plants—a fascinating, paradigm-shifting work that upends everything you thought you knew about plants—makes a compelling scientific case that these and other astonishing ideas are all true. Plants make up eighty percent of the weight of all living things on earth, and yet it is easy to forget that these innocuous, beautiful organisms are responsible for not only the air that lets us survive, but for many of our modern comforts: our medicine, food supply, even our fossil fuels. On the forefront of uncovering the essential truths about plants, world-renowned scientist Stefano Mancuso reveals the surprisingly sophisticated ability of plants to innovate, to remember, and to learn, offering us creative solutions to the most vexing technological and ecological problems that face us today. Despite not having brains or central nervous systems, plants perceive their surroundings with an even greater sensitivity than animals. They efficiently explore and react promptly to potentially damaging external events thanks to their cooperative, shared systems; without any central command centers, they are able to remember prior catastrophic events and to actively adapt to new ones. Every page of *The Revolutionary Genius of Plants* bubbles over with Stefano Mancuso’s infectious love for plants and for the eye-opening research that makes it more and more clear how remarkable our fellow inhabitants on this planet really are. In his hands, complicated science is wonderfully accessible, and he has loaded the book with gorgeous photographs that make for an unforgettable reading experience. *The Revolutionary Genius of Plants* opens the doors to a new understanding of life on earth.
