The fifth edition of *Operating Systems: A Systematic View* offers a practical and applied introduction to operating system concepts, aimed at people interested in using (rather than designing) computers, operating systems, and networks. Instead of focusing on OS theory, the authors take a "systematic view" of the subject, where they provide insight into what is going on beneath the surface. The Intent is to show why operating systems are important to users and what, at a functional level, they do. Readers are guided through some of today's most widely used operating systems, including Linux, UNIX, and Windows 2000. Also included is coverage of several modern topics and technologies, with chapters on the Windows interface, Intel Pentium architecture, and Windows internals, as well as a section on network operating systems with chapters on client/server networks, Windows 2000, Novell, and the Internet.

Mass customization (MC) has been hailed as a successful operations strategy across manufacturing and service industries for the past three decades. However, the wider implications of using MC approaches in the broader industrial and economic environment are not yet clearly understood. *Mass Customization: Engineering and Managing Global Operations* presents emerging research on the role of MC and personalization in today's international operations context. The chapters cover MC in the context of global industrial economics and operations. Moreover, the book discusses MC topics that are relevant to the manufacturing and service sectors, such as:

- product platforms;
- learning curve modeling;
- additive manufacturing; and
-

service customization. Case studies in manufacturing (e.g., apparel and transportation) and services (e.g., banking and virtual worlds) are also included. *Mass Customization: Engineering and Managing Global Operations* is a valuable text for mass customization researchers and practitioners. Researchers will find a selection of chapters prepared by internationally renowned authors, comprising most of their recent research in MC. Engineering professionals will be drawn by the vivid discussion of operational aspects and methods of MC, as well as by the selection of cases illustrating their practical application.

The Eighth Edition of this bestselling introductory text features a comprehensive, updated survey of all key business functions: management, marketing, accounting, finance, and information technology. Core topics highlighted within these functional areas

include ethics and social responsibility, small business concerns, different forms of business ownership, and international business concepts. In light of current business conditions, this edition also addresses the nation's economic problems, corporate credibility and efforts to improve accounting standards, the dot-com meltdown, entrepreneurial businesses, diversity, globalization, e-business, and other timely issues. Likewise, the authors have integrated more information on employment trends to help students choose a career and compete in a fickle job market. Updated and enhanced coverage of e-Business--in boxed features, examples, illustrations, and discussions throughout the text--reflects this sector's growing importance. In addition, *Navigating the World of E-Business* (Chapter 4) has been completely revamped to cover key concepts, as well as the strategies and challenges facing current businesses. Pedagogical tools have also been revised, including all new Inside Business cases at the beginning of each chapter and closing Return to Inside Business features. These sections follow up on the opening case with additional information, posing questions that stress the practical application of chapter concepts. All boxed features that focus on real business or workplace issues have been replaced. These boxes cover major themes, including *Adapting to Change*, *Talking Technology*, *Examining Ethics* (with Issues to Consider that stimulate critical thinking and facilitate discussion), *Going Global*, and *Exploring Business*. Using the Internet boxes continue to point students to relevant web sites for more information on concepts, companies, or issues covered in each chapter--prompting them to conduct independent research. The Eighth Edition also features two new Spotlight features per chapter, illustrating facts with appealing and easy-to-understand visuals that help students to understand the material. Due to its loose-leaf format, this text sells for considerably less than standard hardcover books and also provides students with greater flexibility. They can insert their own notes or class handouts into any chapter, bring only the chapters they need to class, or organize the contents to follow their instructor's syllabus. The Study Guide is perforated and three-hole punched so that the materials can be easily integrated with the textbook. New! Building a Business Plan features now appear at the end of every

Part, helping students to write their own business plans incrementally over the course of a semester or during class. Chapter 6 also includes revised coverage of business plans. **New!** Running a Business, an ongoing video case featured at the end of each Part, provides students with an insider's vantage point of Finagle-A-Bagel, a bagel bakery and cafe. Through this firsthand look at one business's day-to-day operations, students gain a better understanding of the real challenges faced by entrepreneurs. Students can also practice applying what they have learned by analyzing the problems, solutions, and actions taken at Finagle-A-Bagel. **New!** All end-of-chapter videos are new and focus on companies such as Stonyfield Farm, New Belgium Brewing, Subway, Bay Partners, Remington, Wal-Mart, JetBlue, Financial Fusion, and Merrill Lynch Direct. These cases combine with three other video tools--one brief chapter overview and two key concept segments--for a total of 13 to 20 minutes of video per chapter. **New!** All photos and advertisements are new. As in past editions, captions clarify how these real-world visuals illustrate key concepts under review. **New!** The Business Bonus Pack: Your Guide to an A accompanies every new copy of the text and includes four Audio Review CDs, an HM eStudy CD-ROM, and helpful tips on how students can integrate these study aids with the textbook, study guide, and textbook web site in order to reach their academic goals. Remastered and edited to achieve complete compatibility with the Eighth Edition, the Audio Review CDs contain 10 to 12 minute summaries of key terms and topics for every chapter. The new HM eStudy CD-ROM includes learning objectives in essay-question format, glossaries, chapter summaries, brief chapter outlines that students can annotate, chapter previews with video overviews for selected chapters, ACE Practice Tests (different from those on the web site and in the printed study guide), and Business Plan worksheets. **New!** Master the Class, a game simulation by John Drea (Western Illinois University), allows instructors to review key concepts with their students in a fun and interactive way. This program is available on the HM ClassPrep CD-ROM and the instructors' web site. **New!** Eduspace is Houghton Mifflin's online learning tool. Powered by Blackboard, Eduspace is a customizable, powerful and interactive platform that provides instructors with text-specific online courses and content. It includes chapter homework and per-question feedback as well as At Issue and Discussion

questions for in-class discussion.

Worlds of E-Commerce Economic, Geographical and Social Dimensions THOMAS R. LEINBACH and STANLEY D. BRUNN, both of the University of Kentucky, USA *Worlds of Electronic Commerce* attempts to capture the enormous international impact of the recent explosion in information and communication technologies. It stands alone as the first book to tackle the major economic, social, and political issues that electronic commerce raises from interdisciplinary and international perspectives. Including contributions from leading international scholars from geography, economics, and public policy, it addresses theoretical and conceptual issues and presents case studies on how retailing, job searches, banking and finance, telecommunications, and government regulation are changing with the introduction and diffusion of the Internet and various electronic services. References to rapid developments in these fields are drawn from the United States, United Kingdom, Netherlands, Japan, Singapore, Australia, Russia, and the developing world. The implications of these developments on consumer behaviour, existing and new firms, regulatory agencies, and interstate economic development are also discussed. In summary, the book presents an excellent background for those wanting scholarly treatments of (a) the background of e-commerce, (b) the growing importance of Information and Communication Technologies, and (c) case studies related to specific services making use of e-commerce. *READERSHIP: Academics and Students in Information Economics, Information and Communications Technologies, Economics, Marketing, Retailing, Advertising, Communications, Technology Diffusion, Geography Dealing with Electronic Commerce*
