## CAYDEN DAPHNE

### Male Reproductive System Review Flashcards | Quizlet

Concept Review Section Male Reproductive[DOC]  
 Concept Review Section Male Reproductive System Answers The testes are a pair of male gonads that produce sperm and reproductive hormones. Each testis is approximately 2.5 by 3.8 cm (1.5 by 1 inch) in size and divided into wedge-shaped lobes by septa.

Coiled in each wedge are seminiferous tubules that produce sperm. Concept Review Section Male Reproductive System Answers Concept Review (26 points) Section: Male Reproductive System (15 points) Complete the following sentences by using the terms below. Some terms may be used more than once, others not at all. fertilization epididymis ejaculation. testosterone erection vas deferens. scrotum infertility urethra. reproduction testes semen. penis sperm Concept Review -

Elizabethtown Area School District The reproductive tissues of male and female humans develop similarly in utero until about the seventh week of gestation when a low level of the hormone testosterone is released from the gonads of the developing male. Testosterone causes the primitive gonads to differentiate into male sexual organs. 18.3 Human Reproduction - Concepts of Biology | OpenStax CONCEPT REVIEW SECTION MALE REPRODUCTIVE SYSTEM certainly provide much

more likely to be effective through with hard work.
