PERFECT for fans of Roald Dahl. Think you know Dahl? Think again. There's still a whole world of Dahl to discover in a newly collected book of his deliciously dark tales for adults . . . In war, are we at our heroic best or our cowardly worst? Featuring the autobiographical stories from Roald Dahl's time as a fighter pilot in the Second World War as well as seven other tales of conflict and strife, Dahl reveals the human side of our most inhumane activity. Among other stories, you'll read about the pilot shot down in the Libyan desert, the fighter plane that vanishes inside a mysterious thick white cloud and the soldier who returns from war but has been shockingly changed by his experiences. Featuring extraordinary cover art by Charming Baker, whose paintings echo the dark and twisted world of Dahl's short stories. Roald Dahl reveals even more about the darker side of human nature in seven other centenary editions: Lust, Madness, Cruelty, Deception, Trickery, Innocence and Fear.

A rapturous novel of star-crossed love in a time of war—from the international bestselling author of The Secret of Clouds. During the last moments of calm in prewar Prague, Lenka, a young art student, and Josef, who is studying medicine, fall in love. With the promise of a better future, they marry—only to have their dreams shattered by the imminent Nazi invasion. Like so many others, they are torn apart by the currents of war. Now a successful obstetrician in America, Josef has never forgotten the wife he believes died in the war. But in the Nazi ghetto of Terezín, Lenka survived, relying on her skills as an artist and the memories of a husband she would never see again. Then, decades later and thousands of miles away, an unexpected encounter in New York leads to an inescapable glance of recognition, and the realization that providence has given Lenka and Josef one more chance. From the glamorous ease of life in Prague before the occupation to the horrors of Nazi Europe, The Lost Wife explores the power of first love, the resilience of the human spirit, and our capacity to remember.

Is science beautiful? Yes, argues acclaimed philosopher and historian of science Robert P. Crease in this engaging exploration of history's most beautiful experiments. The result is an engrossing journey through nearly 2,500 years of scientific innovation. Along the way, we encounter glimpses into the personalities and creative thinking of some of the field's most interesting figures. We see the first measurement of the earth's circumference, accomplished in the third century B.C. by Eratosthenes using sticks, shadows, and simple geometry. We visit Foucault's mesmerizing pendulum, a cannonball suspended from the dome of the Panthéon in Paris that allows us to see the rotation of the earth on its axis. We meet Galileo—the only scientist with two experiments in the top ten—brilliantly drawing on his musical training to measure the speed of falling bodies. And we travel to the quantum world, in the most beautiful experiment of all. We also learn why these ten experiments exert such a powerful hold on our imaginations. From the ancient world to cutting-edge physics, these ten exhilarating moments reveal something fundamental about the world, pulling us out of confusion and revealing nature's elegance. The Prism and the Pendulum brings us face-to-face with the wonder of science.
