were seven distinct

components. CLEF is by
now an established
international evaluation
initiative and, in 2007, 81
groups from all over the
world submitted results
for one or more of the

di?erent evaluation
tracks. Full details
regarding the design of
the tracks, the
methodologies used for
evaluation, and the
results obtained by the
participants can be found
in the di?erent sections of
these proceedings. As
always the results of the
campaign were reported
and discussed at the
annual workshop, held in

Budapest, Hungary, 19-21 September, immediately following the eleventh European Conference on Digital Libraries. The workshop plays an important role by providing the opportunity for all the groups that have participated in the evaluation campaign to get together to compare approaches and exchange ideas.

This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar

published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely

short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

This trilingual book has 8,000 word entries with transliteration. It is a vocabulary powerhouse, with the 5,000 most commonly used English words (written and/or spoken), plus a combined total of 3,000 Tigrinya and Amharic word entries. In

order to help with phonetic pronunciation, English words are written in Geez scripts (ሀ), while Tigrinya and Amharic word meanings are Romanized. Thus, it is a great reference book for ESL/ELL students to use for standardized testing. It is equipped with a concise yet informative introduction of the Tigrinya and Amharic languages. Both Tigrinya and Amharic are Semitic (Afro-Asiatic) languages derived from an ancient Ethiopian language, Geez; moreover, both languages

share the same unique Geez alphabet, albeit with some pronunciation differences. Both languages are written from left to right. The quantity and uniqueness of the letters in the alphabet might be intimidating at the beginning, but there are some easy patterns that enable learning them faster. Once you have mastered the alphabet, it is rare to misspell words of Tigrinya or Amharic. Tigrinya and Amharic are official languages in Eritrea and Ethiopia

respectively; Tigrinya is spoken in both countries. The total population who speak the two languages in the two countries, including those who speak them as a second language, is estimated to be about 55 million people.
