Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

Strategic Marketing Planning concentrates on the critical 'planning' aspects that are of vital importance to practitioners and students alike. It has a clear structure that offers a digest of the five principal dimensions of the strategic marketing planning process. Leading authors in this sector, Wilson and Gilligan offer current thinking in marketing and consider the changes it has undergone over the past few years. Issues discussed include: * Emarketing, strategic thinking and competitive advantage * The significance of vision and how this needs to drive the planning process * Hypercompetition and the erosion of competitive advantage * The growth and status of relationship marketing * Each chapter contains a series of expanded illustrations

After the Second World War many American military vehicles become surplus stock and soon found their way into the hands of farmers and land owners across Great Britain. The subsequent heavy use and the real possibility of difficulties obtaining spares led Maurice Wilks, the Rover Car Company Chief Engineer, to design and build a replacement. Not only would the new Land Rover fill a gap in Rover's portfolio, but also bring in much needed post-war money. Intended as a stop gap, the Land Rover would cease production almost 68 years later, after a production run that had produced over two million vehicles. During that time it would transform how the military saw and used motor transport. From utilitarian General Service truck to cutting-edge weapon's platform the Land Rover would prove its worth time and again. This latest LandCraft title looks at the design and development of the Land Rover as well as the military specific variants designed and built, including the famous SAS Pink Panther, the nimble Light Weight and powerful Forward Control gun tractor. The title will also look at those key conversions that took place on standard Land Rovers throughout the duration of its life span. From the humble beings of the box like Series 1 to the formidable firepower and pace of the WOLF WMIK, the Land Rover was a constantly improved military vehicle. Through numerous trials, lessons learned and operational requirements the Land Rover was a vehicle that grew with the times. This LandCraft title removes some of the mystique that surrounds the myriad versions and how the Land Rover developed. It also includes the story of the design and development of the exclusively military Light Weight and Forward Control versions. It also charts how the Land Rover became a virtual barometer for the technological and engineering developments that have occurred over the past 70 years. It demonstrates how the Land Rover's flexibility to change was its core strength. How the innovation of Rover and military mechanical engineers created a series of unbeatable military trucks. This section also looks at the smaller, important developments and variations in design which showed how adaptable the Land Rover really was. From specialist signals line layers to first responder fire and rescue vehicles, to the unit- and theater-led changes, the Land Rover was a vehicle that took all in its stride, proving its versatility. For the modeler there is nothing more important than the little things and this image-rich section of LandCraft's Land Rover title delivers the goods. Filled with crisp images, that chart the Land Rovers development, combined with detailed accompanying text, forms an enviable visual guide for the enthusiast and modeller alike.

Innovation in Marketing is a unique collection of empirical material describing both systems innovation and the launch of new products. This ranges from the development of new high tech items such as the Organiser from Psion, to the transfer of a major brand such as Virgin Direct to a new market. Based on this the authors have developed a clear analytical model for managing innovation with a marketing perspective. Doyle and Bridgewater illustrate the key themes using case materials and the entirely new new work it contains on the linkage between innovation and shareholder value. This gives the student and professional a new decision making perspective. The key themes that structure the book are: Marketing and innovation - the model, innovation and strategy, marketing strategies and shareholder value, best practice in innovation management, effectiveness in innovation.

NT World Book

Drawing upon cutting edge research from academia but expressed clearly and concisely for the busy person seeking practical inspiration, Leading Innovation, Creativity and Enterprise will feature numerous case examples from companies such as Virgin, Pfizer, Roche and Fuji Film. The book deals with questions such as: What are the roots of creativity and imagination? · How can we create the physiological and mental states under which creativity happens naturally rather than having to rely on creative thinking tools? · What kind of leadership is required to make creativity and innovation business as usual behaviours in your enterprise? · What is the role of technique in engendering creativity within teams? What are the most effective and reliable recipes for team based creativity? · What ensures that creativity turns into innovation? What stops it? In exploring these questions, the book will show you how to produce and lead creative teams, as well as build an innovative company culture.

Land Rover Discovery Series II Workshop Manual 1999-2003 MY Praeger

This comprehensive pictorial overview of Rover cars and car-derived vans covers the 60 years from 1945 to 2005. It describes and illustrates all of the great classic Rovers up to and including the SD1, and goes on to look at the models inherited from British Leyland that attracted Rover badges. It finishes with the models designed in conjunction with Honda; the later British-designed cars - and even the final City Rover. There is also consideration of some Rover models that were designed but, for various reasons, did not enter production, and can now only be seen as prototypes in museums. A title in Veloce's popular Pictorial History series, this book describes all of the postwar models with illustrations and technical data for each.

Success and failure in the UK car manufacturing industry MIT Press

Although initially sparked by the collapse of MG Rover, this inquiry into the UK automotive industry was broadened to examine the following subjects: the principal reasons for the different records of success by different companies; how companies arrive at investment and closure decisions; the role played by trade unions; the appropriate Government response to closure announcements and what the Government could do to help the supply chain and workforce if plants are closed. Overall it foresees mixed prospects for car manufacturing in this country and thinks it is important that the industry and Government put extra effort into improving skills, increasing R&D, adopting lean manufacturing techniques and strengthening the local supply chain.
