Actuarial notation is a shorthand method to allow actuaries to record mathematical formulas that deal with interest rates and life tables. Traditional notation uses a halo system where symbols are placed as superscript or subscript before or after the main letter. Example notation using the halo system can be seen below.

Actuarial notation - Wikipedia

alf one has social interest then one evidences or enacts a “useful” style of life. If one does not have social interest then one is self-absorbed and is concerned only with one’s self. Such a style of life is “useless.” The condition of being useless is not pathological.
