Search for ISBN 9781680922936. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that

covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization. *Managerial Accounting (16th Edition)* Guan Li Kuai Ji (Ying Wen Ban Yuan Shu Di 16 Ban) *Managerial Accounting: The Cornerstone of Business Decision-Making* Management accounting has been the basic toolbox in business administration for decades. Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments. At the same time, business in general, and management accounting in particular, is becoming more and more international. English clearly has evolved as the "lingua franca" of international business. Academics, students as well as practitioners exchange their views and ideas, discuss concepts and communicate with each other in English. This is certainly also true for management accounting and control. Management Accounting is becoming more and more international. ?Management Accounting and Control? is a new textbook in English covering concepts and

instruments of management accounting at an introductory level (primarily at the Bachelor level, but also suited for general management and MBA courses due to a strong focus on practical relevance). This textbook covers all topics that are relevant in management accounting in business organizations that are typically covered in German and Central European Bachelor courses on management accounting and control. After a general introduction to the field of management accounting and control the book discusses cost management as an extension of cost accounting. Typical cost management instruments such as target costing, life cycle costing and process-based costing approaches are explained in detail. Differences between Anglo-American activity-based costing (ABC) and German process-based costing are highlighted. The book then turns to an extensive discussion of planning and budgeting tasks in management accounting with a strong focus on the practical application of the topic such as developing a budget in practice. Another chapter is dedicated to a comparison of traditional budgeting with modern /alternative budgeting approaches. A major part of the book is dedicated to the broad area of performance management. The relevance of financial statement information for performance management purposes is discussed in detail. In addition, the most widely spread financial performance indicators are illustrated using real-world examples. The book also includes detailed content on value-based management control concepts. In a consecutive chapter, performance measurement is linked with strategy while extensively discussing the Balanced Scorecard as a key tool in strategic performance management. The remaining parts of the book deal with management reporting as one of the main

operative tasks in management accounting practice. The book closes with insight into new fields and developments that currently influence management accounting practices and research and promise to play an increasingly important role in the future.

Cost Accounting II [CBCS BAWN] McGraw Hill

This text is written as an integrated work in managerial accounting, and is intended for use as a basic text for students

after completing a first semester or quarter course in financial accounting at either the undergraduate or graduate level. This text is organized around the following major areas of managerial accounting: An Overview of Managerial Accounting. In this section, the text discusses the uses of managerial accounting and contrasts the type and use of information provided by managerial accounting and financial accounting (Chapter 1). Chapter 2 focuses on basic cost information and behavior. In this chapter we distinguish between the different types of costs incurred by organizations. In addition, this chapter discusses the behavior of these costs with changes in activity as well as the effect of cost behavior on managerial decisions. Cost Accumulation. Chapters 3 through 5 illustrate the process through which the organization accumulates costs with its products and services. In Chapter 3, we focus on production and service processes that require different levels of effort across individual jobs (job-order costing). Chapter 4 illustrates the cost accumulation process for manufacturing environments characterized by the production of a large number of similar products (process costing). Chapter 5 focuses on the process through which overhead costs are accumulated with the organization's inventory and services. The dedication of an entire chapter to overhead costs is considered necessary given the importance of controlling overhead costs to organizations in manufacturing inventory and providing services. The Use of Managerial Accounting Information. Chapters 6 through 11 describe various uses of managerial accounting information. Topics discussed in these chapters include variable costing and cost-volume-profit analysis (Chapter 6), standard costing and determination of variances (Chapter 7), budgeting

(Chapter 8), responsibility accounting (Chapter 9), short-term managerial decisions (Chapter 10), and capital budgeting (Chapter 11). In these chapters, the basic principles of cost behavior and cost accumulation discussed in the preceding two sections are applied to important decisions facing managers in today's business world.
