The field of Second Language Teacher Education (SLTE) is mainly concerned with the professional preparation of L2 teachers. In order to improve teaching in the multilingual and multicultural classroom of the 21st century, both pre- and in-service L2 teachers as well as L2 teacher educators must be prepared to meet the new challenges of education under the current circumstances, expanding their roles and responsibilities so as to face the new complex realities of language instruction. This volume explores a number of key dimensions of EFL teacher education. The sixteen chapters discuss a wide variety of issues related to second language pedagogy and SLTE. Topics discussed include the importance of SLA research; competency-based teacher education approach; classroom-based action research; SLTE models; the value and role of practicum experience abroad; the models of pronunciation teaching; multicultural awareness and competence; the influence of teachers' cognitions, emotions and attitudes on their emerging and changing professional identities; the potential of classroom materials and technology; and CLIL and ESP teacher education. English as a foreign language teacher education: Current perspectives and challenges will be of interest to teachers-in-training, teachers, teacher educators and to those educational researchers interested in how L2 teaching is actually learned in professional preparation programmes. Juan de Dios Martínez Agudo is Associate Professor of EFL Teacher Education at the University of Extremadura, Spain. His current research interests include Second Language Acquisition and English Teaching Methodology. His most recent books are *Oral Communication in the EFL Classroom* (2008), *Errors in the Second Language Classroom: Corrective Feedback* (2010) and *Teaching and Learning English through Bilingual Education* (2012).

Dual immersion, a popular new way to cultivate bilingualism, is capturing the attention of parents and educators alike. By bringing together children from diverse backgrounds to learn each other's languages in a natural setting, it has proved far more effective at cultivating fluency than traditional approaches. But how do these programs actually work? What goes on in dual immersion classrooms? And what is it that makes them so effective? *Diary of a Bilingual School* answers these questions with a unique mix of narratives and analysis. Depicting a year in the life of a second-grade classroom, it demonstrates what can happen when the instruction is bilingual and the curriculum is constructivist. The book focuses on Chicago's Inter-American Magnet School, one of the nation's most acclaimed dual immersion programs, where children thrive in an environment that unlocks their intellectual curiosity and enthusiasm for learning. Simultaneously, without conscious effort, they become proficient in two languages and at home in a culture that differs from their own. For those who want to discover the benefits of dual immersion for their children or for their students -- or who want to learn more about child-centered approaches to teaching - *Diary of a Bilingual School* is a must.

Environmentalists worry about too much carbon dioxide, but what's too little? What if global financiers manipulated the global warming crisis to gain control over humanity's resources, freedoms, and population? What if someone with the financial and technical abilities decided mankind was a virus and used carbon dioxide trapping technology to plunge population levels by crashing life-essential CO2 to new lows? These are questions Anna Picard must face in *The Carbon Trap*, the first book in *The Carbon Series*. At the height of the global warming crisis, the United Nations attempts to control all carbon emissions, and authorizes a series of programs it deems necessary to save humanity. A progressive US government enthusiastically endorses the UN Carbon Trapping program, and to help pay for it, will impose carbon taxes, draconian regulations, and... it will secretly sell Alaska. Anna Picard is an amoral fixer, an employee of Agenda 21 member and global financier Alexis Swanson had trained to help recruit his corporate army and neutralize his enemies. It is her job to unleash a global hacker network to help destroy the carbon based industries and funnel insider-trading profits to Swanson. One of her recruits is Dr. Sven Johansson, a brilliant geneticist and President of Snath Biotechnology, who designs life forms to trap CO2. But Sven has more ambitious

plans. At a UN conference in the Maldives held to impose draconian carbon regulations, not everyone is happy, some industrial executives realize data has been falsified. To protect her scheme, Anna frames one of the execs for murder. Her plans are complicated when she falls in love with Dr. Pete Heyward, the son of the man she framed for murder. Pete is a US Marine amputee who sees past her malevolent deeds and tries to rejuvenate the morality of her youth. After a series of genetically modified carbon trapping life forms is unleashed upon the Earth, Anna must confront the evils she helped unleash, and prevent an even bigger disaster from unfolding that would destroy most life on Earth. This is a high-tech ecological thriller that takes the reader from the Maldives, to the French Riviera, and the heartland of Texas. It introduces cutting edge technologies and concepts, used for the first time in a novel, that reveal striking implications for society.

This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing

on international studies, the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.

Assessing English for Professional Purposes provides a state-of-the-art account of the various kinds of language assessments

used to determine people's abilities to function linguistically in the workplace. At a time when professional expertise is increasingly mobile and diverse, with highly trained professionals migrating across national boundaries to apply their skills in English-speaking settings, this book offers a renewed agenda for inquiry into language assessments for professional purposes (LAPP). Many of these experts work in high-risk environments where communication breakdowns can have serious consequences. This risk has been identified by governments and professional bodies, who implement language tests for gate-keeping purposes. Through a sociological lens of risk and responsibility, this book: provides a detailed overview of both foundational and recent literature in the field; offers conceptual tools for specific purpose assessment, including a socially oriented theory of construct; develops theory and practice in key areas, such as needs analysis, test development, validation and policy; significantly broadens the scope of the assessment of English for professional purposes to include a range of assessment practices for both professionals and laypeople in professional settings. *Assessing English for Professional Purposes* is key reading for researchers, graduate students and practitioners working in the area of English for Specific Purposes assessment.

Wordplay can be seen as a genuine interface phenomenon. It can be found both in everyday communication and in literary texts, and it can fulfil a range of functions – it may be entertaining and comical, it may be used to conceal taboo, and it may influence the way in which the speaker's character is perceived. Moreover, wordplay also reflects on language and communication: it reveals surprising alternative readings, and emphasizes the phonetic similarity of linguistic signs that also points towards relations on the level of content. Wordplay unravels characteristics of literary language in everyday communication and opens up the possibility to analyze literary texts from a linguistic perspective. The first two volumes of the series *The Dynamics of Wordplay* therefore aim at bringing together contributions from linguistics and literary studies, focusing on theoretical issues such as basic techniques of wordplay, and its relationship to genres and discourse traditions. These issues are complemented by a series of case studies on the use of wordplay in individual authors and specific historical contexts. The contributions offer a fresh look on the multifaceted dynamics of wordplay in different communicative settings.
