Investigative journalist Michael Gross delves into the history of models and takes us into the private studios and hidden villas where models play and are preyed upon, going beyond modeling's carefully constructed facade of glamour to expose the scandal and untold truths that permeate the seemingly glamorous business. Here for the first time is the complete story of the international model business—and its evil twin: legalized flesh peddling. It's a tale of vast sums of money, rape both symbolic and of the flesh, sex and drugs, obsession and tragic death. At its heart is the most unholy combination in commerce: beautiful, young women and rich, lascivious men. Fashion insider Michael Gross has interviewed modeling's pioneers, survivors, and hangers-on, and he tells the story of the greats: Lisa Fonssagrives; Anita Colby, Candy Jones; Dorian Leigh and her sister Suzy Parker; Jean Shrimpton and Twiggy; Veruschka and Lauren Hutton; and today's supermodel trinity, Christy, Naomi and Linda.

Handbook Timing Belts St. Martin's Press

From the author of House of Outrageous Fortune For seventy-five years, it's been Manhattan's richest apartment building, and one of the most lusted-after addresses in the world. One apartment had 37 rooms, 14 bathrooms, 43 closets, 11 working fireplaces, a private elevator, and his-and-hers saunas; another at one time had a live-in service staff of 16. To this day, it is steeped in the purest luxury, the kind most of us could only imagine, until now. The last great building to go up along New York's Gold Coast, construction on 740 Park finished in 1930. Since then, 740 has been home to an ever-evolving cadre of our wealthiest and most powerful families, some of America's (and the world's) oldest money—the kind attached to names like Vanderbilt, Rockefeller, Bouvier, Chrysler, Niarchos, Houghton, and Harkness—and some whose names evoke the excesses of today's monied elite: Kravis, Koch, Bronfman, Perelman, Steinberg, and Schwarzman. All along, the building has housed titans of industry, political power brokers, international royalty, fabulous scam-artists, and even the lowest scoundrels. The book begins with the tumultuous story of the building's construction. Conceived in the bubbling financial, artistic, and social cauldron of 1920's Manhattan, 740 Park rose to its dizzying heights as the stock market plunged in 1929—the building was in dire financial straits before the first apartments were sold. The builders include the architectural genius Rosario Candela, the scheming businessman James T. Lee (Jacqueline Kennedy Onassis's grandfather), and a raft of financiers, many of whom were little more than white-collar crooks and grand-scale hustlers. Once finished, 740 became a magnet for the richest, oldest families in the

country: the Brewsters, descendants of the leader of the Plymouth Colony; the socially-registered Bordens, Hoppins, Scovilles, Thornes, and Schermerhorns; and top executives of the Chase Bank, American Express, and U.S. Rubber. Outside the walls of 740 Park, these were the people shaping America culturally and economically. Within those walls, they were indulging in all of the Seven Deadly Sins. As the social climate evolved throughout the last century, so did 740 Park: after World War II, the building's rulers eased their more restrictive policies and began allowing Jews (though not to this day African Americans) to reside within their hallowed walls. Nowadays, it is full to bursting with new money, people whose fortunes, though freshly-made, are large enough to buy their way in. At its core this book is a social history of the American rich, and how the locus of power and influence has shifted haltingly from old bloodlines to new money. But it's also much more than that: filled with meaty, startling, often tragic stories of the people who lived behind 740's walls, the book gives us an unprecedented access to worlds of wealth, privilege, and extraordinary folly that are usually hidden behind a scrim of money and influence. This is, truly, how the other half—or at least the other one hundredth of one percent—lives.

"Michael Gross's new book...packs [in] almost as many stories as there are apartments in the building. The Jackie Collins of real estate likes to map expressions of power, money and ego... Even more crammed with billionaires and their exploits than 740 Park" (Penelope Green, *The New York Times*). With two concierge-staffed lobbies, a walnut-lined library, a lavish screening room, a private sixty-seat restaurant offering residents room service, a health club complete with a seventy-foot swimming pool, penthouses that cost almost \$100 million, and a tenant roster that's a roll call of business page heroes and villains, Fifteen Central Park West is the most outrageously successful, insanely expensive, titanically tycoon-stuffed real estate development of the twenty-first century. In this "stunning" (CNN) and "deliciously detailed" (Booklist, starred review) *New York Times* bestseller, journalist Michael Gross turns his gimlet eye on the new-money wonderland that's sprung up on the southwest rim of Central Park. Mixing an absorbing business epic with hilarious social comedy, Gross "takes another gossip-laden bite out of the upper crust" (Sam Roberts, *The New York Times*), which includes Denzel Washington, Sting, Norman Lear, top executives, and Russian and Chinese oligarchs, to name a few. And he recounts the legendary building's inspired genesis, costly construction, and the flashy international lifestyle it has brought to a once benighted and socially déclassé Manhattan neighborhood. More than just an apartment building, 15CPW represents a massive paradigm shift in the lifestyle of New York's rich and famous—and is a bellwether of the city's changing social and financial landscape.

"The ground we walk on and grow crops in also just happens to be the most widely used building material on the planet. Civilizations throughout time have used it to create stable warm low-impact structures. The world's first skyscrapers were built of mud brick. Paul Revere Chairman Mao and Ronald Reagan all lived in earth houses at various points in their lives and several of the buildings housing Donald Judd's priceless collection at the Chinati Foundation in Marfa Texas are made of mud brick." "While the vast legacy of traditional and vernacular earthen construction has been widely discussed, little attention has been paid to the contemporary tradition of earth architecture. Author Ronald Rael founder of Eartharchitecture.org provides a history of building with earth in the modern era focusing particularly on projects constructed in the last few decades that use rammed earth mud brick compressed earth cob and several other interesting techniques. Earth Architecture presents a selection of more than 40 projects that exemplify new creative uses of the oldest building material on the planet."--BOOK JACKET.
