While most famously associated with numerous mid-century architects, Brutalism was a style of visual art that was also adopted by painters, sculptors, printmakers, and photographers. Taking into account Brutalist work by eminent artists such as Richard Hamilton and Eduardo Paolozzi, as well as lesser-known practitioners like Nigel Henderson and Magda Cordell, this volume focuses on a ten-year period between 1952 and 1962 when artists refused a programmatic set of aesthetics and began experimenting with images that had no set focal point, using non-traditional materials like bombsite debris in their work, and producing objects that were characterized by wit and energy along with anxiety, trauma, and melancholia. This original study offers insights into how Brutalism enabled British artists of the mid-20th century to respond ethically and aesthetically to the challenges posed by the rise of consumer culture and unbridled technological progress. "Gerald and Sara Murphy took Paris by storm in the 1920s, inserting themselves into the avant-garde circles of dance, music, and art. Lively and engaging, Making It New sheds new light on the European fascination with the Murphys and provides key insights into their life and art."--Cecile Whiting, author of *Pop L.A.: Art and the City in the 1960s* "By telling and retelling the story of the Murphys from various viewpoints, Making It New aims to be the first comprehensive study of their contribution to Modern Art. This book should be of wide interest to both scholars and general readers."--Elizabeth Hutton Turner, author of *Americans in Paris: Man Ray, Gerald Murphy, Stuart Davis, Alexander Calder*

Arnold Schwartzman's stunning photographs of the finest examples of Art Deco from all over the world are collected here as a celebration of one of the world's most popular decorative styles. Art deco is the 20th century's most glamorous architectural style, and the one that shaped popular ideas of modern luxury. With over 200 photographs, this is a visual celebration of this very popular style. Unlike most other books on the subject that tend to be regionally specific, this book highlights Art Deco buildings from all over the world, from Australia to South America, with an emphasis on London, Los Angeles, New York, Chicago, Miami, and Paris. Art Deco features much careful and exacting detail, and of special interest in this book are photos that zoom in on murals, mosaics, flooring, ironwork, and other ornamental flourishes. Art Deco began in 1925 and quickly swept the globe becoming the style epitomizing Jazz Age glamor and sophistication. It drew from a variety of influences including ancient Egyptian, Moorish, and Mayan motifs but also modernist movements like Cubism, Fauvism, and De Stijl. Its influence was felt everywhere, from the skylines of New York to Shanghai, and it gained prominence not only with architects and designers but enjoyed a passionate following among the public as well.

This study of ancient Egyptian art reveals the evolution of aesthetic approaches to proportion and style through the ages. The painted and relief-cut walls of ancient Egyptian tombs and temples record an amazing continuity of customs and beliefs over nearly 3,000 years. Even the artistic style of the scenes seems unchanging, but this appearance is deceptive. In this work, Gay Robins offers

convincing evidence, based on a study of Egyptian usage of grid systems and proportions, that innovation and stylistic variation played a significant role in ancient Egyptian art. Robins thoroughly explores the squared grid systems used by the ancient artists to proportion standing, sitting, and kneeling human figures. This investigation yields the first chronological account of proportional variations in male and female figures from the Early Dynastic to the Ptolemaic periods. Robins discusses the proportional changes underlying the revolutionary style instituted during the Amarna Period. She also considers how the grid system influenced the overall composition of scenes. Numerous line drawings with superimposed grids illustrate the text.

This book takes its cue from a simple observation. During the last 30 years or so, the term style has all but disappeared from art critical or art historical terminology. For new art history it was an

increasingly problematic term, associated with the taxonomist and historicist concerns of "old" art history, not to speak of its fixation on the figure of the great artist. For contemporary art criticism the term seemed simply irrelevant: Faced with artistic activities that challenged traditional ideas of the work of art and its relation to aesthetics itself, new critical paradigms had to be invented. As interventions in social reality, an art of actions and events, replaced preoccupations with visual style and shape, the politics of social sites replaced the language of forms. But while style has all but disappeared from art historical and art critical discourse, artistic practice since the 1960's onwards has seemed increasingly focused on the stylistics of the life-environment, the way in which everyday life itself is formed, designed or stylized. This development calls for a new reading of the relationship between art and the question of style, one that approaches the question of style itself not just as an art historical "tool" or method of explanation but as a social site in which relations between appearance, recognition and social identity is negotiated. The question or crisis of the contemporary style site is related to the significance of stylistic issues in contemporary politics and economics that capitalizes on life itself and that is perhaps best understood through its particular production of subjectivity. The works discussed in this book treat style as precisely such a site, and should therefore be discussed in extension of what is generally known as "site specific practices" in art. However, the style site works radically change the notion of the politics of this type of art, and may in the end also contribute to open the question of the life-art practices of the avant-garde to new interpretations. Ina Blom is an Associate Professor at the Department of Philosophy, Classics, History of Art and Ideas at the University of Oslo. She has written extensively on modern and contemporary art and is also active as an art critic.

"Anthropology's engagement with art has a complex and uneven history. While material culture, 'decorative art', and art styles were of major significance for founding figures such as Alfred Haddon and Franz Boas, art became marginal as the discipline turned towards social analysis in the 1920s. This book addresses a major moment of renewal in the anthropology of art in the 1960s and 1970s. British anthropologist Anthony Forge (1929-1991), trained in Cambridge, undertook fieldwork among the Abelas of Papua New Guinea in the late 1950s and 1960s, and wrote influentially, especially about issues of style and meaning in art. His powerful, question-raising arguments addressed basic issues, asking why so much art was produced in some regions, and why was it so socially important? Fifty years later, art has renewed global significance, and anthropologists are again considering both its local expressions among Indigenous peoples and its new global circulation. In this context, Forge's arguments have renewed relevance: they help scholars and students understand the genealogies of current debates, and remind us of fundamental questions that remain unanswered. This volume brings together Forge's most important writings on the anthropology of art, published over a thirty year period, together with six assessments of his legacy, including extended reappraisals of Sepik ethnography, by distinguished anthropologists from Australia, Germany, Switzerland and the United Kingdom."--Provided by publisher.

Style is one of the oldest and most powerful analytic tools available to art writers. Despite the importance of style as an artistic, literary, and historiographic practice, the study of it as a concept has been intermittent, perhaps, as Philip Sohm argues, because style has resisted neat definition since the very origins of art history as a discipline. His analysis of the language that painters and their literate public used to characterize painters and paintings will enrich our understanding about the concept of style.
