## BENJAMIN PRECIOUS

*Autocar* Yale University Press  
 Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be

too late!"

*It Happened at Niagara* Oxford University Press, USA

Examines the ways design teams can take a more creative approach to the design and expression of both active and passive environmental control systems. Case Studies from around the world, including many award-winning buildings.

*The 9th Symbol* Psychology Press

This classic presentation has never been superseded in its encyclopedic coverage of the subject, and its excellent exposition of fundamental theorems, equations, and detailed methods of solution. Topics include many aspects of the dynamics of liquids and gases and 3-dimensional problems on motion of solids through a liquid. 1932 edition.

*A History of the Works of Sir Joshua Reynolds, P.R.A.* Erika Blanchard

This report describes a computer model developed at Rand for generating estimates of organizational and

intermediate level maintenance personnel requirements for new U.S. Navy aircraft. NAVMAN provides a capability that does not currently exist for systematic estimation of personnel needs during the early stages of aircraft development (before information) about subsystem-peculiar personnel factors are available in detail). The model provides (1) an analytic tool for estimation, (2) capability for assessment of estimates prepared by the military services, and (3) a means for systematic exploration of the effects of changes in certain system and maintenance policy variables on personnel requirements. This volume provides an overview of Navy personnel planning methods and of the model features (data requirements, assumptions, and reports). **Revisiting the Role of Architecture for Surviving Development** Viking  
 This report is the second of two volumes that describes NAVMAN, a computer model developed for predicting the total

organizational and intermediate level maintenance personnel requirements for new U.S. Navy aircraft. This volume presents a detailed description of model operations, program and model variable listings, derivation and definition of model factors, and a reliability/maintainability data bank for current Navy aircraft.

**Preventing Car Theft and Crime in Car Parks** Tata McGraw-Hill Education

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: ...earth.  $r'$  = radius of moon, or other body.  $P$  = moon's horizontal parallax = earth's angular semidiameter as seen from the moon.  $f$  = moon's angular semidiameter.  $\text{Now} = P$  (in circular measure),  $r'-r = r$  (in circular measure);  $r':r::P:P'$ , or (radius of earth): (radius of moon):: (moon's parallax): (moon's semidiameter). Examples. 1. Taking the moon's horizontal parallax as  $57'$ , and its angular diameter as  $32'$ , find its radius in miles, assuming the earth's radius to be 4000 miles. Here moon's semidiameter =  $16'$ ;  $\therefore 4000::57':16'$ ;  $\therefore r = 400 \cdot 16 = 1123$  miles. 2. The sun's horizontal parallax being  $8''$ , and his angular diameter  $32V$  find his diameter in miles. ' Am. 872,727 miles. 3. The synodic period of Venus being 584 days, find the angle gained in each minute of time on the earth round the sun as centre. Am.  $1''-54$  per minute. 4. Find the angular velocity with which Venus crosses the sun's disc, assuming the distances of Venus and the earth from the sun are as 7 to 10, as given by Bode's Law. Since (fig. 50)  $S V: VA:: 7: 3$ . But  $Sr$  has a relative angular velocity round the sun of  $1''-54$  per minute (see Example 3); therefore, the relative angular velocity of  $A V$  round  $A$  is greater than this in the ratio of  $7: 3$ , which gives an approximate result of  $3''-6$  per minute, the true rate being about  $4''$  per minute. Annual ParaUax. 95. We have already seen that no displacement of the observer due to a change of position on the earth's surface could apparently affect the direction of a fixed star. However, as the earth in its annual motion describes an orbit of about 92 million miles radius round the sun, the different positions in space from which an observer views the fixed stars from time to time throughout the year must be separated ...

*Shakespeare's Use of Off-stage Sounds*  
Taylor & Francis

First published in 1999. Small businesses now constitute the most dynamic element of growth in the emerging markets of the Central and Eastern European region. This book argues that the small and medium sized enterprise (SME) sector has contributed more to the growth of these countries in transition than have privatized state enterprises and the public sector. In 1989 most of the countries of Eastern and Central Europe were still under an economic system dominated by state-owned enterprises. Since then a process of liberalization has been unleashed to promote free market policies. This has involved programs of privatization and restructuring of public enterprises, as well as the promotion of policies to enable a private sector to develop. Small businesses are creating thousands of new jobs while large companies are "retrenching and downsizing" their work force. In some countries of the region this process is much further along than in others. However, the SME sector has developed at a more rapid pace than has the privatization of the large public companies. There has been a flurry of new enterprises springing up throughout the region which are "trickling up" in a frequently hostile environment against tremendous odds, and yet managing to have a pronounced impact on their respective economies. Small businesses have taken over in sectors that used to be dominated by big enterprises, primarily in services and consumer products. They have provided a crucial outlet for pent-up entrepreneurial talent that had remained dormant during the long period of state domination. This work urges legislators, policy-makers, and development agencies alike to take account of the importance of the SME's in their legislation and planning. Given a more favorable environment, these small businesses will provide even greater impetus for economic growth. Equally important is for entrepreneurs themselves to be convinced of the rightness of their path in societies that have traditionally looked down upon profit-seekers as unscrupulous and selfish. If the CEE region is to achieve its full potential of economic growth, policies and support mechanisms to promote the SME sector will be needed to assure a favorable

environment.

**Pirates, Jack Tar, and Memory**

A twelfth-century poem by the creator of the Arthurian romance describes the courageous exploits and triumphs of a brave lord who tries to win back his deserted wife's love

*Handbook of Research on the Impact of Fandom in Society and Consumerism*  
Lefmann Press

These nine essays explore new directions and ways to pursue the elusive Jack Tar--the common sailor in the early modern world. We see him as a pirate, learn something of the ships he sailed, and share his experience in the Revolutionary War and War of 1812. We also see him as a spinner of yarns--a great story teller--helping to mold his own and our national identity, while contributing to the development of a unique American literature. We see some Jacks seeking social mobility. We see others challenging authority aboard ships and during shipwrecks. While Jack in some ways remains elusive, and it is impossible to calculate his movements, as sailor Nathaniel Ames wrote, these essays move us closer to an understanding of his eccentric path.

**NAVMAN, a Model for Estimating Maintenance Personnel Requirements for Navy Aircraft** Springer Science & Business Media

Alex has spent the majority of his adult life between two very different women—and he can't make up his mind. Sonia, his wife and business partner, is everything a man would want. Intelligent, gorgeous, charming, and ambitious, she worked tirelessly alongside him to open their architecture firm and to build a life of luxury. But when the seven-year itch sets in, their exhaustion at working long hours coupled with their failed attempts at starting a family get the best of them. Alex soon finds himself kindling an affair with his college lover, Ivona. The young Polish woman who worked in a Catholic mission is the polar opposite of Sonia: dull, passive, taciturn, and plain. Despite having little in common with Ivona, Alex is inexplicably drawn to her while despising himself for it. Torn between his highbrow marriage and his lowbrow affair, Alex is stuck within a spiraling threesome. But when Ivona becomes pregnant, life takes an unexpected turn, and Alex is puzzled more than ever by the mysteries of his heart. Peter Stamm, one of Switzerland's most acclaimed writers, is at his best exploring the complexities of human relationships. *Seven Years* is a distinct, sobering, and bold novel about the

impositions of happiness in the quest for love.

**The Sources of Innovation** IGI Global  
Daniel Bernoulli's *Hydrodynamica*, published in 1738, marks the first appearance of many topics central to modern science, from the kinetic theory of gases to the principles of jet propulsion. John Bernoulli's *Hydraulica*, published in 1743, supplements his son's book and deals primarily with hydraulics. 104 illustrations.

[NAVMAN: A Model for Estimating Maintenance Personnel Requirements for Navy Aircraft. Volume II. Technical Appendixes](#) Other Press, LLC

The book starts with the fundamentals of triboelectric nanogenerators (TENGs), and continues through to fabrication technologies to achieve flexible and stretchable. Then self-powered flexible microsystems are introduced and application examples are presented, including TENG-based active sensors, TENG-powered actuators, artificial intelligence and integrated systems. *Consumers Index to Product Evaluations and Information Sources* John Wiley & Sons

With more than 600 pages and heaps of cartoons, *Girl Stuff* has everything girls need to know about- friends, body changes, shopping, clothes, make-up, pimples (arrghh), sizes, hair, earning money, guys, embarrassment, what to eat, moods, smoking, why diets suck, handling love and heartbreak, exercise, school stress, sex, beating bullies and mean girls, drugs, drinking, how to find new friends, cheering up, how to get on with your family, and confidence. Each chapter includes facts, hints, inspiring lists, hundreds of quotes from real girls, and details for over 350 websites, books and other information. This completely revised edition, written in extensive consultation with more than 70 medical and practical experts, provides the most up-to-date and useful information possible. *Girl Stuff* is the ultimate teen guide. *Courier Mail* Kaz Cooke has come to the rescue... (*Girl Stuff*) goes way beyond the usual girly stuff of pimples, periods and pashing. It covers everything from physical changes and body image to teenage brains, moods, alcohol, drugs, confidence, friendship, relationships, mental health, money, school, work, feminism and marketing scams. *Herald Sun* The ultimate reference book for any girl. *Girlfriend* It has practical advice on diet, health, sex, and other embarrassing problems. *Good Health & Medicine* If

you're worried about your teenage daughter, buying this book may be one of the best things you can do to help guide her through. I wish I had this sort of information at my disposal during those testing years. *Manly Daily* Kaz doesn't preach, she talks to you like your best friend. *New Idea* *Girl Stuff* is the kind of book most girls will enjoy, read voraciously and refer to over and over again ... Cooke genuinely respects her readers and it shows. *Sydney Morning Herald* The book is filled with quotes from teenagers, giving it a chatty and informal style, but also a real insight into the mysterious minds of teens. *Sunday Examiner* Whether you're a teenage girl or the parent of one, you'll love (*Girl Stuff*), a guide to navigating those tricky pre-adulthood years... and its written in Cooke's inimitable, humorous style. *Sunday Herald Sun* A survival guide covering sex, love, pubic hair, cyber-safety, money, hair ironing, shopping, self-defence, homework, brain-care, how to change the world and a zillion other things that weigh heavily on girls' minds... *The Australian*

*Girl Stuff* GPO FCIC

Offers an insider's tour through the fast-paced, often sordid world of the professional political campaign.

*Hydrodynamics* RAND Corporation  
It has long been assumed that new product innovations are typically developed by product manufacturers, an assumption that has inevitably had a major impact on innovation-related research and activities ranging from how firms organize their research and development to how governments measure innovation. In this synthesis of his seminal research, von Hippel challenges that basic assumption and demonstrates that innovation occurs in different places in different industries. Presenting a series of studies showing that end-users, material suppliers, and others are the typical sources of innovation in some fields, von Hippel explores why this variation in the "functional" sources of innovation occurs and how it might be predicted. He also proposes and tests some implications of replacing a manufacturer-as-innovator assumption with a view of the innovation process as predictably distributed across users, manufacturers, and suppliers. Innovation, he argues, will take place where there is greatest economic benefit to the innovator.

*Seven Years*

Fans of specific sports teams, television series, and video games, to name a few, often create subcultures in which to

discuss and celebrate their loyalty and enthusiasm for a particular object or person. Due to their strong emotional attachments, members of these fandoms are often quick to voluntarily invest their time, money, and energy into a related product or brand, thereby creating a group of faithful and passionate consumers that play a significant role in multiple domains of contemporary culture. *The Handbook of Research on the Impact of Fandom in Society and Consumerism* is an essential reference source that examines the cultural and economic effects of the fandom phenomenon through a multidisciplinary lens and shapes an understanding of the impact of fandom on brand building. Featuring coverage on a wide range of topics such as religiosity, cosplay, and event marketing, this publication is ideally designed for marketers, managers, advertisers, brand managers, consumer behavior analysts, product developers, psychologists, entertainment managers, event coordinators, political scientists, anthropologists, academicians, researchers, and students seeking current studies on the global impact of this particularly devoted community.

#### **Industrial Relations**

"The Residential Design Codes are a Western Australian institution with a long tradition and a high level of acceptance in local government, industry and the community. ... The WAPC recognises the value of the R-Codes in their present form while believing that greater diversity in housing, more responsiveness to place and climate and more support for innovation is required. To this end new provisions for housing and planning whether or not as part of the R-Codes will be developed. In the meantime the R-Codes must be kept up-to-date .. This edition of the R-Codes embodies many minor changes and improvements ... [since ] 2002. From now on the R-Codes will be published in ring-binders ... new pages will be issued for insertion ..." - Updating the R-Codes [April 2008 cover sheet]

[The Years of Endurance 1793-1802](#)

Designed as an advanced survey of the field, this book describes the key research parameters of nanocarrier technologies. It is the first book with this topic. It comprises a collection of scientific articles from top research people in the field and provides an up-to-date source containing recent citation and bibliography. The book is an indispensable source of information for new researchers and scientists.
