Industriële films worden gezien als een apart filmgenre van de twintigste eeuw. Ze werden geproduceerd en gesponsord door de overheid en grote bedrijven en moesten vooral aan de wensen van de sponsors voldoen, en niet zo zeer aan die van de filmmakers. In de hoogtijdagen werkten er duizenden mensen aan deze industriële films. Zo zijn er vakbladen en filmfestivals ontstaan door samenwerking met grote bedrijven als Shell en AT & T. Daarnaast hebben belangrijke regisseurs, zoals Buster

Keaton, John Grierson en Alain Resnais, aan deze films meegewerkt. Toch lijkt de industriële film geen spoor te hebben achtergelaten in het filmische culturele discours. Films that Work is het eerste boek waarin de industriële film en zijn opmerkelijke geschiedenis worden onderzocht.

Pervasive use of ethnic and religious stereotypes by law enforcement across Europe is harming efforts to combat crime and terrorism, according to this report released by the Open Society Justice Initiative. Ethnic profiling occurs most often in police decisions about who to stop, question, search, and, at times, arrest. Yet there is no evidence that ethnic profiling actually prevents terrorism or lowers crime rates. Throughout Europe, minorities and immigrant communities have reported discriminatory treatment by the police. From massive data mining operations to intimidating identity checks, ethnic profiling is often more of a public relations stunt than a real response to crime. The report, "Ethnic Profiling in the European Union: Pervasive, Ineffective, and Discriminatory", details widespread profiling in France, Germany, Italy, The Netherlands, and other EU member states.

As the world faces many serious challenges informed, courageous and mindful leadership is needed for a better future. The Tourism Education Futures Initiative (TEFI) is the collective effort of a group of innovative, thoughtful and committed

scholars and industry leaders seeking to provide vision, knowledge, and a framework for tourism education programs that promote global citizenship and optimism for a better world. This book consolidates some of TEFI's work as it seeks to be the leading, forward-looking network that inspires, informs and supports tourism educators and students to passionately and courageously transform the world for the better. It makes the case for why change is needed, and how tourism educators can respond to that change with strategies and values-based tools. The book contains papers published in special TEFI issues of the Journal of Teaching in Travel & Tourism (JTTC), which question and explore some of the most important theoretical, conceptual and practical issues facing tourism education now and into the future. The book concludes by integrating the special issues' key contributions with a brief conceptualisation of education futures before it outlines TEFI's framework for action over the coming years. Tourism educators worldwide will find that this volume serves two important purposes. On the one hand, it challenges educators to think both critically and proactively about tourism education, while on the other sharing examples of teaching and learning tools that seek to prepare our students for the future and to be global citizens that live lives of consequence. This book is a collection of articles from the Journal of Teaching in Travel and Tourism.

Strategies of German Car Companies in China Springer Nature

In 2009, the PRC overtook the USA as the biggest automotive market in the world in production as well as in sales. With economic problems like stagnating real income, rising raw material prices and credit-driven consumerism in the industrial countries the importance of the Chinese market for car companies will even grow. Saturated passenger car markets in the USA and Western Europe and low rates of motorization in new automotive markets like China focus the attention of the market participants on these new, growing markets. The focus of this study is on the passenger vehicle market and lines out why the Chinese market is profitable and attractive for international

manufacturers. Moreover, it shows how to deal with the problems and how to use the opportunities regarding the dimensions of internationalization. Firstly, the PEST-Analysis of the Chinese automobile market lines out the political-legal, economic, socio-cultural and technological factors. In such a rapidly changing and growing as well as culturally completely different country like the PRC, the framework conditions and circumstances are of big importance for foreign enterprises willing to do business there. The third chapter deals with possible internationalization strategies for China by showing possibilities of timing and market development strategies plus options for locating business markets. This is also further established in the fourth chapter, in which the internationalization strategies of two German enterprises are analyzed. Furthermore the fourth chapter analyses the internationalization strategies of VW and BMW. At the end of this thesis, the results are summarized in two SWOT-analyses of both firms including measures on how to deal with threats in the PRC and on how to benefit from strengths and opportunities.

The approach used on a given spend item should largely depend on the balance between supply power and demand power. That is the logic behind the bestselling Purchasing Chessboard®, used by hundreds of corporations worldwide to reduce costs and increase value with suppliers. The 64 squares in the Purchasing Chessboard provide a rich reservoir of methods that can be applied either individually or combined. And because many of these methods are not customarily used by procurement, the Purchasing Chessboard is also the perfect tool for helping buyers to think and act outside the box and find new solutions. A well-proven concept that works across all industries and all categories in any given situation, it is little wonder that business leaders and procurement professionals alike are excited by, and enjoy strategizing around, the Purchasing Chessboard. This second edition of The Purchasing Chessboard addresses the new realities of a highly volatile economic environment and describes the many—sometimes surprising—ways in which the Purchasing Chessboard is being used in today's business world. Yet despite all of the great achievements of procurement executives and their teams, they do not always receive the recognition they deserve. In response, the authors have developed and outlined within the book an unequivocal approach to measure procurement's impact on a company's performance—Return on Supply Management Assets (ROSMA®).
