The Internet is the
most remarkable thing

human beings have
built since the

Pyramids. John

Naughton's book

intersperses wonderful

personal stories with

an authoritative

account of where the

Net actually came

from, who invented it

and why and where it

might be taking us.

Most of us have no

idea how the Internet

works, or who created

it. Even fewer have any

idea what it means for

society and the future.

In a cynical age, John

Naughton has not lost

his capacity for

wonder. He examines

the nature of his own

enthusiasm for

technology and traces

its roots in his lonely

childhood and in his relationship with his father. *A Brief History of the Future* is an intensely personal celebration of vision and altruism, ingenuity and determination and, above all, of the power of ideas, passionately felt, to change the world.

Predators, Prey, and Other Kinfolk Adobe Press

A provocative call for environmentally sound gardening from PBS's Victory Garden host Roger Swain--who shows why gardeners are in the best position to become environmentalists through their garden techniques.

Groundwork displays the author's talents as a storyteller as well as writer, biologist, and gardener.

Aladdin and the

Wonderful Lamp St Martins Press

A feckless boy is lured by a wicked magician into a trap but the scheme backfires — the boy, Aladdin, is left with a magical lamp and a genie who showers him with riches. Aladdin's wealth makes him an

attractive suitor for the sultan's daughter, but when the evil sorcerer returns to kidnap the bride, the young hero must rescue his princess or die trying.

This classic retelling of the ever-popular Middle Eastern folktale has entranced readers for over a century.

Originally published in 1914 as part of *Sindbad the Sailor and Other Stories from The Arabian Nights*, this beautiful version by Laurence Housman features eight full-color

images by Edmund Dulac, one of the era's most famous illustrators.

Baker Books

On the northern slope of the island of Serendipity is a small, wonderful kingdom called the Land of Later. In this kingdom there lived a young, beautiful princess who everyone simply called Princess. The castle was governed by the king's simple rules. One of those rules was that when you woke in the morning, you cleaned your room and made your bed. Princess hated rules. Most of all, she hated doing anything at any time unless it was much, much later. This morning, as on others, she awoke, got dressed, and went outside and took a

walk instead of cleaning her room. Princess walked into the forest near the castle. "I should start back before I get lost," she whispered to a bunny on the path. Then she laughed, "I will go back but just, just a little later!" It was on the journey that Princess met a unicorn called Morgan. And it was on this journey, with the help of Morgan, that she learned that doing things now is always much better than later.

Anthony Jay shows you how the new science of management is a continuation of the old art of government. By looking at your own corporate organization in a political/historical context, you can fully understand its power structure - what Machiavelli wrote about statecraft in the sixteenth century holds true for business and management in the late twentieth century. Applying Machiavellian precepts to such modern corporations as General Motors, Apple Computer, and Microsoft, Jay discovers self-contained states with courtiers and diplomats, orthodoxy and heresy lurking under their smooth corporate veneers. Though humorous, Jay's message is clear.

To understand the workings of corporation or states, you must understand the nature and behavior of their leaders. And that hasn't changed since the Middle Ages.
