*The Lawn* JHU Press  
 DigiCat Publishing presents to you this special edition of "Klee Wyck" by Emily Carr. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.  
Fundamentals of Recreation Springer Science & Business Media  
 In 2012 several retailers, including Amazon and Walmart, experimented with same-day delivery. Home delivery of pizzas had been a very successful model in the United States and had been copied all over the world. In contrast, home delivery attempts by companies like Kozmo and Urbanfetch had failed and both companies went bankrupt. The goal of this case is to build a framework that helps students identify the factors that influence the success or failure of home delivery models. After analyzing

and discussing the case, students should be able to: - Build a basic framework identifying supply chain drivers that are influenced by a firm's decision to offer same-day home delivery - Understand the tradeoffs that influence the success of a same-day home delivery model - Identify qualitative factors to be considered when deciding between non-U.S. facility locations, including transportation time variability, consumer perceptions, and cultural differences.

The Future of Same-day Delivery McGraw Hill Professional  
 Written by an international group of highly respected contributors, this fundamental reference work covers all aspects of polymer blends: science, engineering, technology and applications.

*Seven-Eleven Japan Co* Routledge

Examines the total cost of salt and calcium magnesium acetate (CMA), including the indirect cost of application and indirect costs to the environment, infrastructure, and motor vehicles. This report focuses on defining the true cost of salt, which is the most popular deicer and the standard of comparison for most other deicing products.

**Making the Geologic Now** DigiCat

At a time when interest in herbs and natural medicine has never been higher, the second edition of this essential guide shows how to identify more than 500 healing plants. 300+ color photos.

Reflections on Riding and Jumping AZ Books

The Earth has limited material and energy resources. Further development of the humanity will require going beyond our planet for mining and use of extraterrestrial mineral resources and search of power sources. The exploitation of the natural resources of the Moon is a first natural step on this direction. Lunar materials may contribute to the betterment of conditions of people on Earth but they also may be used to establish permanent settlements on the Moon. This will allow developing new technologies, systems and flight operation techniques to continue space exploration. In fact, a new branch of human civilization could be established permanently on Moon in the next century. But, meantime, an inventory and proper social assessment of Moon's prospective energy and material resources is required. This book investigates the possibilities and limitations of various systems supplying manned bases on Moon with energy and other vital resources. The book collects together recent proposals and innovative options and solutions. It is a useful source of condensed information for specialists involved in current and impending Moon-related activities and a good starting point for young researchers.

Highway Deicing WEDC, Loughborough University

This is a comprehensive book that documents the fundamentals of atmospheric icing and surveys the state of the art in eight chapters, each written by a team of experienced and internationally renowned experts. The treatment is detailed and richly illustrated.

Hog Outlook CRC Press

Lawns now blanket thirty million acres of the United States, but until the late nineteenth century few Americans had any desire for a front lawn, much less access to seeds for growing one. In her comprehensive history of this uniquely American obsession, Virginia Scott Jenkins traces the origin of the front lawn aesthetic, the development of the lawn-care industry, its environmental impact, and modern as well as historic alternatives to lawn mania.

Transactions of the Board of Trustees Dial Press Trade Paperback

Making the Geologic Now announces shifts in cultural sensibilities and practices. It offers early sightings of an increasingly widespread turn toward the geologic as source of explanation, motivation, and inspiration for creative responses to conditions of the present moment. In the spirit of a broadside, this edited collection circulates images and short essays from over 40 artists, designers, architects, scholars, and journalists who are actively exploring and creatively responding to the geologic depth of "now." Contributors' ideas and works are drawn from architecture, design, contemporary philosophy and art. They are offered as test sites for what might become thinkable or possible if humans were to collectively take up the geologic as our instructive co-designer-as a partner in designing thoughts, objects, systems, and experiences. A new cultural sensibility is emerging. As we struggle to understand and meet new material realities of earth and life on earth, it becomes increasingly obvious that the geologic is not just about rocks. We now cohabit with the geologic in unprecedented ways, in teeming assemblages of exchange and interaction among geologic materials and forces and the bio, cosmo, socio, political, legal, economic, strategic, and imaginary. As a reading and viewing experience, Making the Geologic Now is designed to move through culture, sounding an alert from the unfolding edge of the "geologic turn" that is now propagating through contemporary ideas and practices. Contributors include: Matt Baker, Jarrod

Beck, Stephen Becker, Brooke Belisle, Jane Bennett, David Benque, Canary Project (Susannah Saylor, Edward Morris), Center for Land Use Interpretation, Brian Davis, Seth Denizen, Anthony Easton, Elizabeth Ellsworth, Valeria Federighi, William L. Fox, David Gersten, Bill Gilbert, Oliver Goodhall, John Gordon, Ilana Halperin, Lisa Hirmer, Rob Holmes, Katie Holten, Jane Hutton, Julia Kagan, Wade Kavanaugh, Oliver Kellhammer, Elizabeth Kolbert, Janike Kampevd Larsen, Jamie Kruse, William Lamson, Tim Maly, Geoff Manaugh, Don McKay, Rachel McRae, Brett Milligan, Christian MilNeil, Laura Moriarity, Stephen Nguyen, Erika Osborne, Trevor Paglen, Anne Reeve, Chris Rose, Victoria Sambunaris, Paul Lloyd Sargent, Antonio Stoppani, Rachel Sussman, Shimpei Takeda, Chris Taylor, Ryan Thompson, Etienne Turpin, Nicola Twilley, Bryan M. Wilson.

**Klee Wyck** John Wiley & Sons

Part 1 of this collection assesses the causes of postharvest losses. Part 2 reviews advances in storage technologies, including management of insect pests using techniques such as fumigation, controlled atmospheres and biopesticides, as well as control of fungal contamination.

**Nutrition in Sport** Houghton Mifflin Harcourt

Manual giving guidance for the planning, design, construction, and operation and maintenance of ice control and ice suppression measures for Corps of Engineers projects. Discusses ice formation processes, physical properties and potential solutions to associated problems.

Tools for Homesteaders, Gardeners, and Small-scale Farmers

Pearson

Chemical Deicers and the Environment provides a complete discussion of chemical deicer technology and history in the United States and Canada. The book describes engineering applications, maintenance procedures, economic evaluations, in addition to environmental problems and concerns relative to the use of chemical deicing. It also provides a technical appraisal of the latest technology to stimulate further research and discussion directed toward achieving a more integrated approach for the application of new deicers that will protect motor vehicles, highways and infrastructures, and the environment. Chemical Deicers and the Environment will be a useful reference volume for scientists, legislators, transportation engineers, environmentalists, consultants, and concerned individuals interested in learning about the economic and environmental advantages and disadvantages of today's chemical deicers.

Scars, Marks & Tattoos Transportation Research Board

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

A Field Guide to Medicinal Plants and Herbs of Eastern and Central North America Burleigh Dodds Agricultural Sc

As sports have become more competitive over recent years researchers and trainers have been searching for new and innovative ways of improving performance. Ironically, an area as mundane as what an athlete eats can have profound effects on fitness, health and ultimately, performance in competition. Sports have also gained widespread acceptance in the therapeutic management of athletes with disorders associated with nutritional status. In addition, exercise has been one of the tools used for studying the control of metabolism, creating a wealth of scientific information that needs to be placed in the context of

sports medicine and science. *Nutrition in Sport* provides an exhaustive review of the biochemistry and physiology of eating. The text is divided into three sections and commences with a discussion of the essential elements of diet, including sections on carbohydrates, proteins, fats, vitamins and trace elements, and drugs associated with nutrition. It also discusses athletes requiring special consideration, including vegetarians and diabetics. The second section considers the practical aspects of sports nutrition and discusses weight control (essential for sports with weight categories and athletes with eating disorders), the travelling athlete (where travel either disrupts established feeding patterns or introduces new hazards), environmental aspects of nutrition (including altitude and heat), and the role of sports nutritional products.

**Engineering and Design** CRC Press

The different traditions that have inspired the contributors to this volume can be divided along three different orientations, one that is rooted predominantly in sociolinguistics, a second that is ethnomethodologically informed, and a third that came in the wake of narrative interview research. All three share a commitment to view self and identity not as essential properties of the person but as constituted in discursive practices and particularly in narrative. Moreover, since self and identity are held to be phenomena that are contextually and continually generated, they are defined and viewed in the plural, as selves and identities. In the attempt of moving closer toward a process-oriented approach to the formation of selves and identities, this volume sets the stage for future discussions of the role of narrative and discourse in this generation process and for how a close analysis of these processes can advance an understanding of the world around us and within this world, of identities and selves.

**Food, Nutrition and Sports Performance III** Mitchell Beazley Synthesizes the empirical literature on organizational structuring to answer the question of how organizations structure themselves --how they resolve needed coordination and division of labor. Organizational structuring is defined as the sum total of the ways in which an organization divides and coordinates its labor into distinct tasks. Further analysis of the research literature is needed in order to build a conceptual framework that will fill in the significant gap left by not connecting a description of structure to its context: how an organization actually functions. The results of the synthesis are five basic configurations (the Simple Structure, the Machine Bureaucracy, the Professional Bureaucracy, the Divisionalized Form, and the Adhocracy) that serve as the fundamental elements of structure in an organization. Five basic parts of the contemporary organization (the operating core, the strategic apex, the middle line, the technostructure, and the support staff), and five theories of how it functions (i.e., as a

system characterized by formal authority, regulated flows, informal communication, work constellations, and ad hoc decision processes) are theorized. Organizations function in complex and varying ways, due to differing flows -including flows of authority, work material, information, and decision processes. These flows depend on the age, size, and environment of the organization; additionally, technology plays a key role because of its importance in structuring the operating core. Finally, design parameters are described - based on the above five basic parts and five theories - that are used as a means of coordination and division of labor in designing organizational structures, in order to establish stable patterns of behavior. (CJC).

**Layout and Design of Shallow-draft Waterways** Smithsonian Institution

The purpose of this manual is to provide guidance for planning, layout and design of shallow-draft waterways.

**Handbook of Sports Medicine and Science** John Benjamins Publishing

This revealing book details recent developments in the study of the relationship between sulfur and the microbial agents that affect its metabolism. In recent years, new methods have been applied to study the biochemistry and molecular biology of reactions of the global sulfur cycle, the microorganisms involved and their physiology, metabolism and ecology. These activities have uncovered fascinating new insights for the understanding of aerobic and anaerobic sulfur metabolism.

*The National Parks* Water Resources Publication

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Polymer Blends Handbook John Wiley & Sons

Approach to the theory and development of recreation, written for the beginning student and for the interested citizen.
