The salient features of the present edition are: All the Problems and Solutions have been thoroughly revised in the light of up-to-date amendments in Income tax Law and Rules for Assessment Year 2020-21. Almost all numerical questions given at the end of the chapters of the authors' other publications on Income-tax (viz., Income-tax Law and Accounts, Aaykar Vidhan evam Lekhe, Law and Practice of Income-tax) have been solved in this book and the number printed within brackets at the end of the questions in other publications is the problem number of this book. The selection and sequence of the questions are well planned and systematic so as to cover all ticklish points within a reasonable number of questions. Wherever needed, detailed explanatory notes have been given at the end of solutions. Candidates preparing for C.A., Company Secretaries, Cost and Works Accountants, and Income-tax Departmental Examinations, will, particularly, find the book very useful. It will also be useful for candidates preparing for B.Com. and M.Com. Examinations of various Indian Universities.

*The Power of Questions to Open Doors, Uncover Solutions, and Spark Change* Vibrant Publishers  
Many leaders are unaware of the amazing power of questions. Our conversations may be full of requests and demands, but all too often we are not asking for honest and informative answers, and we don't know how to listen effectively to responses. When leaders start encouraging questions from their teams, however, they begin to see amazing results. Knowing the right questions to ask—and the right way to listen—will give any leader the skills to perform well in any situation, effectively communicate a vision to the team, and achieve lasting success across the organization. Thoroughly revised and updated, Leading with Questions will help you encourage participation and teamwork, foster outside-the-box thinking, empower others, build relationships with customers, solve problems, and more. Michael Marquardt reveals how to determine which questions will lead to solutions to even the most challenging issues. He outlines specific techniques of active listening and follow-up, and helps you understand how questions can improve the way you work with individuals, teams, and organizations. This new edition of Leading with Questions draws on interviews with thirty leaders, including eight whose stories are new to this edition. These interviews tell stories from a range of countries, including Singapore, Guyana, Korea, and Switzerland, and feature case studies from prominent firms such as DuPont, Alcoa, Novartis, and Cargill. A new chapter on problem-solving will help you apply questions to your toughest situations as a leader, and a new "Questions for Reflection" section at the end of each chapter will help you bring Marquardt's message into all of your work as a leader. Now more than ever, Leading with Questions is the definitive guide for becoming a stronger leader by identifying—and asking—the right questions.

Perhaps the least studied of Hildegard of Bingen's writings, Solutions to Thirty-Eight Questions is translated in this volume into English for the first time from the original Latin. In this work of exegesis, Hildegard (1098-1179) resolves thorny passages of Scripture, theological questions, and two issues in hagiographic texts. Solutions to Thirty-Eight Questions joins Hildegard's Homilies on the Gospels, which were directed to her nuns, as evidence of the seer's exegetical writing as well as her authority as an exegete. The twelfth-century saint wrote in standard genres of exegesis—homilies and solutions—and her interpretations of Scripture were widely sought, including by male audiences.
