SUMMERS PEARSON

Performance-based Fire Engineering for Civil Engineering Structural Design

Forgotten Books
Masters Theses in the
Pure and Applied Sciences
was first conceived,
published, and
disseminated by the
Center for Information
and Numerical Data
Analysis and Synthesis
(CINDAS)* at Purdue
University in 1957,
starting its coverage of
theses with the academic
year 1955. Beginning with
Volume 13, the printing
and dissemination phases
of the activity were
transferred to University
Microfilms/Xerox of Ann
Arbor, Michigan, with the
thought that such an
arrangement would be
more beneficial to the
academic and general
scientific and technical
community. After five
years of this joint
undertaking we had
concluded that it was in
the interest of all
concerned if the printing
and distribution of the
volumes were handled by
an international

publishing house to
assure improved service
and broader
dissemination. Hence,
starting with Volume 18,
Masters Theses in the
Pure and Applied Sciences
has been disseminated on
a worldwide basis by
Plenum Publishing
Corporation of New York,
and in the same year the
coverage was broadened
to include Canadian
universities. All back
issues can also be
ordered from Plenum. We
have reported in Volume
39 (thesis year 1994) a
total of 13,953 thesis
titles from 21 Canadian
and 159 United States
universities. We are sure
that this broader base for
these titles reported will
greatly enhance the value
of this important annual
reference work. While
Volume 39 reports theses
submitted in 1994, on
occasion, certain uni-
versities do report theses
submitted in previous
years but not reported at
the time.

Wood Preservation

Forgotten Books
Excerpt from Wood
Preservation: Thesis for
the Degree of Bachelor of
Science in Civil
Engineering There are two
ways in which the

situation may be met. One
is to prolong the life of the
forest by wise use; the
other is to prolong the life
of the timbers in service
by treating them with
some preservative. It is
the second of these
methods of economy.
About the Publisher
Forgotten Books publishes
hundreds of thousands of
rare and classic books.
Find more at
www.forgottenbooks.com
This book is a
reproduction of an
important historical work.
Forgotten Books uses
state-of-the-art
technology to digitally
reconstruct the work,
preserving the original
format whilst repairing
imperfections present in
the aged copy. In rare
cases, an imperfection in
the original, such as a
blemish or missing page,
may be replicated in our
edition. We do, however,
repair the vast majority of
imperfections
successfully; any
imperfections that remain
are intentionally left to
preserve the state of such
historical works.

Engineering Education

Allied Publishers
Peterson's Graduate
Programs in Engineering
& Applied Sciences

contains a wealth of information on colleges and universities that offer graduate degrees in the fields of Aerospace/Aeronautical Engineering; Agricultural Engineering & Bioengineering; Architectural Engineering, Biomedical Engineering & Biotechnology; Chemical Engineering; Civil & Environmental Engineering; Computer Science & Information Technology; Electrical & Computer Engineering; Energy & Power engineering; Engineering Design; Engineering Physics; Geological, Mineral/Mining, and Petroleum Engineering; Industrial Engineering; Management of Engineering & Technology; Materials Sciences & Engineering; Mechanical Engineering & Mechanics; Ocean Engineering; Paper & Textile Engineering; and Telecommunications. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate

distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. As an added bonus, readers will find a helpful "See Close-Up" link to in-depth program descriptions written by some of these institutions. These Close-Ups offer detailed information about the specific program or department, faculty members and their research, and links to the program Web site. In addition, there are valuable articles on financial assistance and support at the graduate level and the graduate admissions process, with special advice for international and minority students. Another article discusses important facts about accreditation and provides a current list of accrediting agencies.

Proceedings Peterson's Excerpt from The Transmission of Pressure Through Sand: Thesis for the Degree of Bachelor of Science in Civil Engineering; College of Engineering, University of Illinois, 1913 Experiments have been made on the transmission of pressure 'through sand and other materials, and it has been

found that under uniform conditions reliable results can be obtained. These tests, however, have been laboratory experiments, the conditions being much.
