Caerphilly Castle Routledge
 Architecture reflects not only a nation's history, but also how its people lived, worked, prayed and fought over the centuries. Since the publication of John B. Hilling's *The Historic Architecture of Wales* in 1976, there has been no other attempt at addressing the architecture of Wales as a whole, and this revised publication meets a long-felt need for a general survey of architecture in Wales. It covers two thousand years of architectural history, reflecting the nation's life from Roman times to the present century – less a revision of the original than a complete re-writing, taking into account recent research and recent buildings. The book is

illustrated with 268 colour and black-and-white photographs, drawings, plans and maps.

Medieval castles were not just showcases for the royal and powerful, they were also the centerpieces of many people's daily lives. A travel guide as well as a historical text, this volume looks at castles not just as ruined buildings, but as part of the cultural and scenic landscape. The 88 photographs illustrate the different architectural concepts and castle features discussed in the text. The book includes glossaries of terminology, an appendix listing all the castles mentioned and their locations, notes, bibliography and index.

As primary subjects are increasingly being taught on an interdisciplinary level, Russell Grigg and Sioned Hughes have created an innovative new text, *Teaching Primary Humanities*. This new text explores current debate, encourages reflection and provides clear guidance on planning, teaching and assessing the humanities from the Early Years to Key Stage 2. Through a blend of theory and real-life examples, Grigg and Hughes demonstrate the contribution that history, geography and religious education can make to enhancing children's thinking, literacy, numeracy and ICT skills. Whether you are a trainee or a practitioner, this book will develop your knowledge of how young children's understanding of place, time and community can be fostered through a play-based curriculum. It will also benefit teachers of older children looking to encourage more independent learning in their schools. About the authors: Dr Russell Grigg is Head of the South West Wales Centre of Teacher Education. He is a trained primary inspector for England and Wales. He has written widely in the field of history and primary education including *Wales in the Victorian Age* and *Becoming an Outstanding Primary Teacher*. Dr Sioned Hughes is Senior Lecturer in Initial Teacher Training at the South West Wales Centre of Teacher Education. She has published many educational materials, especially in primary geography. Her work on Patagonia was recognised by the Welsh Books Council as the 'Bestselling Children's Book' in 2011.

Zombies From History Boydell & Brewer

From the author of *The Norman Conquest* and *A Great and Terrible King* comes a sweeping and stunning history of the most magnificent castles in Britain. Beginning with their introduction in the eleventh century, and ending with their widespread abandonment in the seventeenth, Marc Morris explores many of the country's most famous castles, as well as some spectacular lesser-known examples. At times this is an epic tale, driven by characters like William the Conqueror,

King John and Edward I, full of sieges and conquest on an awesome scale. But it is also by turns an intimate story of less eminent individuals, whose adventures, struggles and ambitions were reflected in the fortified residences they constructed. Be it ever so grand or ever so humble, a castle was first and foremost a home. To understand castles—who built them, who lived in them, and why—is to understand the forces that shaped medieval Britain. A Guide by Counties Boydell & Brewer Ltd
This book acts as a stimulus to further debate and discussion about the archaeology and architecture of the medieval diocese of Llandaff. It presents work at Cardiff and Skenfrith castles and focuses on buildings at Caldicot and Raglan.

The Rough Guide to Wales Cambridge University Press

Ornamental Lakes traces the history of lakes in England, from their appearance in the early eighteenth century, through their development in the 1750s, and finally to their decline in the nineteenth century. Aside from the natural lakes in the Lake District, the bodies of water we see in England today are man-made, primarily intended to ornament the landscapes of the upper classes. Through detailed research, author Wendy Bishop argues that, contrary to accepted thinking, the development of lakes led to the dissolution of formal landscapes rather than following changes in landscape design. Providing a comprehensive overview of lakes in England, including data on who made these lakes, how, and when, it additionally covers fishponds, water gardens, cascades and reservoirs. Richly illustrated and accompanied by case studies across the region, this book offers new insights in landscape history for students, researchers and those interested in how landscapes evolve.

The Impact of the Edwardian Castles in Wales publishes the proceedings of a conference held in 2007, a year that marked the seventh centenary of the death of King Edward I, which set out to review recent scholarship on castles that he built in north Wales after two wars, in 1277 and 1282-83 and a Welsh uprising in 1294-95, and to rethink the effect that their building had upon Wales in the past, present and future. Building upon the seminal work of Arnold Taylor, whose study of the buildings and documentary evidence has been pivotal to Edwardian castle studies for more than fifty years, the volume includes papers which call into question the role of Master James of St George as the architect of the king's new castles; the role of Richard the Engineer, the nature of royal accommodation in the thirteenth century and a detailed look at how households worked, especially in the kitchen and accounting departments. New approaches to castle studies are encouraging a more holistic understanding of the Edwardian castles and their context and to this end papers consider their impact on Welsh society and its princes in the thirteenth century, notably Llywelyn

ab Iorwerth (Fawr , the Great) and his grandson, Llywelyn ap Gruffudd, prince of Wales. Their symbolism and meaning through the words of Welsh poets and the mythology behind Caernarfon Castle are also examined, so too is the role of Welshmen in Edward I's armies. The wider context is considered with papers on the Edwardian towns in Wales, the baronial castles in north Wales and Edward I in Scotland and Gascony. The castles still have powerful resonance and the Minister for Heritage in the Welsh Assembly Government considers their role and presentation in Wales today and in the future. Robert Liddiard concludes that the volume 'not only takes our knowledge of the Edwardian castles forward, but also informs the study of castles in the British Isles'.

Lonely Planet Great Britain Macmillan "Excavations at Wigmore Castle were carried out in 1996 and 1998 as a precursor to repair and consolidation of the castle by English Heritage. The castle had remained the honorial caput of the Mortimer family from the late 11th century through to 1425, an unusually long tenure amongst Marcher lordships. The Mortimer family became increasingly important players in the history of England. Thereafter the Mortimer inheritance passed to the Dukes of York and from there to the Crown. Evidence of the earliest castle was found during the excavations, including part of a substantial 12th-century timber building, part of which had been used as a kitchen. Here remains of a sequence of hearths, cooking pots and food remains were found. The construction of defences in stone probably began in the 12th century. The effect of conflict on the castle was indicated by the presence of

ballista balls, arrowheads, a possible crannequin and fragments of plate armour. A possible period of neglect occurred in the later 14th century but by the 15th century the castle was the scene of renewed activity including the rebuilding of the curtain wall. Dietary evidence and some of the artefacts indicate that there was high-status occupation, in which hunting played an important role that continued throughout the 15th century. By the 16th century the castle fabric was beginning to fall into disrepair and evidence of repairs and modifications were noted. Nevertheless, high-status occupation continued and the castle remained to play an important role as a secondary seat of the Council of the Marches. However, by the early 17th century decline at the castle appears to have been terminal. The castle was now owned by the Harley family and it is they who are credited with the pre-emptive slighting of the castle during the Civil War. The slighting is not evident in the excavated areas, and the area in and around the East Tower appears to have been derelict well before the mid-17th century. Pottery, clay pipe and other artefacts which can definitely be ascribed to the Civil War are few. An oxshoe found in the latest deposits may well be associated with the removal of fallen stone for building elsewhere. Thereafter the castle appears to have been little visited and almost total ruination had set in by the early 18th century. In 1995 the castle was taken into English Heritage Guardianship and has been consolidated and restored as a romantic ruin.
