An Introduction to Greek

Epigraphy; Volume 1 OUP Oxford
Excerpt from An Introduction to Greek Epigraphy, Vol. 1 Every effort has been made to keep an courant with the periodical literature, but some of the more recent epigraphical information could find a place only in the Addenda and Addenda nova. While the last sheets are being printed off, I read in the latest number of the Wiener Studien (1887, p. 223 sqq.) A. Bauer's opinion that neither the Delphian tripod with intertwined serpents (no. 259) nor the memorial at Olympia (see p. 260) was intended to com memorate especially the battle of Plataeae. He contends that Pausanias (v. 23. 1, x. 13. 9) was the first to refer it to Plataeae: the other writers quoted by Roehl (iga 70) represent both as memorials erected by the Greeks generally who fought against the Persians, and especially by those whose names appear on them, and who must have been contributors to the expense of erecting them.  Univ of California Press
 The Oxford Handbook of Hellenic Studies is a unique collection of some seventy articles which together explore the ways in which ancient

Greece has been, is, and might be studied. It is intended to inform its readers, but also, importantly, to inspire them, and to enable them to pursue their own research by introducing the primary resources and exploring the latest agenda for their study. The emphasis is on the breadth and potential of Hellenic Studies as a flourishing and exciting intellectual arena, and also upon its relevance to

the way we think about ourselves today.
An Introduction to Greek Epigraphy

 Ancient Documents and their Contexts contains the proceedings of the First North American Congress of Greek and Latin Epigraphy(San Antonio, Texas, 4-5 January 2011). It gathers seventeen papers presented at this conference,

ranging from technical discussions of epigraphic formulae and palaeography to broad consideration of inscriptions as social documents and visual records. *Illustrated Introduction to Latin Epigraphy* Franklin Classics Trade Press Greek Epigraphy and Religion explores the insights provided by inscribed texts into the religious practices of the ancient Greek world.

The papers study material ranging geographically from Epiros to Egypt and chronologically from the Classical to the Roman period. **Ancient Documents and their Contexts** Routledge Introduces a wide variety of Greek inscriptions on stone slabs, pottery, bronzes, and other small objects, from simple names to more complicated texts, some in local dialects with distinctive

alphabets. *An Introduction to Greek Epigraphy* Palala Press In 1887, when the first volume of this work was published, Greek epigraphy was not systematically studied or taught in English universities, and the book was specifically written to fulfil a need for 'a popular work, giving a classification of Greek inscriptions according to their age, country and

subject, and a selection of texts by way of samples, under each class'. At a time when the value of some Greek letters (those peculiar to one city's version of the alphabet and so known rarely in surviving inscriptions) was not universally agreed, and when excavation was regularly providing new materials for study, the book was widely welcomed as a tool for research. The

first volume contains a historical sketch of the Greek alphabet and a sequence of inscriptions showing its development across the Mediterranean area and Asia Minor until the end of the fifth century CE.

Scholar's Choice Greek

inscriptions form a valuable resource for the study of every aspect of life and death in the Greco-Roman world. They are primary witnesses to society's laws and institutions; social structures; public cults and private associations; and, of course, language. An Introduction to Greek Epigraphy provides students and classicists with the tools to take advantage of

the social and historical weight of these treasures. The book begins by examining letter forms, ancient names, and ancient calendars, knowledge of which is essential in reading inscriptions of all kinds. B. H. McLean discusses the classification of inscriptions into their various categories and analyzes particular types of inscriptions, including decrees, honorary

inscriptions, dedications, funerary inscriptions, and manumission inscriptions. Finally, McLean includes special topics that bear upon the interpretation of specific features of inscriptions, such as Greek and Roman administrative titles and functions. Well-organized and clear as well as insightful and original, McLean's Introduction to Greek Epigraphy is an excellent

source for beginners, nonspecialists, and specialists alike. The volume will be useful to students and scholars studying epigraphy and to those who study politics, governmental organization, archaeology, and ancient history or culture. B. H. McLean is Professor of New Testament, Knox College, University of Toronto. [An Introduction to Greek Epigraphy](#) Univ of California

This book provides a general introduction to the grammar and syntax of Hellenistic, or New Testament, Greek. With twenty-four chapters, it is suitable for two-semester courses. Each lesson is structured around equipping students to read passages drawn directly from the Greek New Testament. In addition to the traditional Erasmian system, students are offered the option of using a historical Greek system of pronunciation similar to that used in early Christian preaching and prayer. The book includes extensive reference tools, including paradigms for memorization, grammatical appendices and illustrations. The text is accompanied by a website that offers a workbook of passages for translation. Each chapter of the grammar concludes with a vocabulary list of Greek terms that appear in that lesson's assigned passage for translation, found in the online workbook. Audio recordings of all vocabulary words and translation passages, using the historical Greek system of pronunciation, are provided online. *The inscriptions of Attica. 2* An Introduction to Greek Epigraphy of

the Hellenistic and Roman Periods from Alexander the Great Down to the Reign of Constantine (323 B.C.-A.D. 337)
Excerpt from An Introduction to Greek Epigraphy, Vol. 2: The Inscriptions of Attica In the Commentary following each text the editors have endeavoured where it was possible to treat the particular text as typical and as illustrative of others of the same class. In many instances,

with the view of avoiding repetition in the notes, a prefatory 'remark' introduces a special category of inscriptions, such as no. Vi (p. 127) on the formulae of decrees after b.c., or no. Viii (p. 145) on the Ephebic inscriptions. It happens not unfrequently that an inscription may be classed under more than one head. Thus a document which may be technically a decree or a pendant to a

decree falls more naturally under another head, such as that of finance 3 the so-called 'hecatompedon' inscription (no. 132) is a case in point. Central to the work are its photos. Professor Gordon presents 100 Latin inscriptions arranged in chronological order and illustrated by the best available photographs.

The inscriptions, which range in date from the sixth century B.C. to A.D. 525, are collated with standard texts and are accompanied by translations and full annotation. They are preceded by an original introduction dealing with important aspects of Latin epigraphy and followed by several appendices on such special topics as Roman numerals. The photographs of these

inscriptions reveal the close relationship between Latin inscriptions and our present-day type fonts by way of the humanistic hand of fifteenth-century European scholars. This book will be of interest not only to students and scholars of epigraphy but to those interested in the history of typography as well.
