In the west, the design of new towns has always been based on an ideal model in accordance with the ideas of that moment. In the case of the latest generation of new towns in Asia, however, only quantitative and marketing principles seem to play a role: the number of square metres, dwellings or people, or the greenest, most beautiful

or most technologically advanced town. "Rising in the east" shows which design principles these premises are based on.

A soup-to-nuts introduction to small, economical sailing craft

sailing and are often considered to be the entry level to cruising under sail. Author Brian Gilbert shows how trailer sailers can be the ideal craft for a lifetime of enjoyment, including serious, long-distance cruising. This book covers all the bases, including how to inspect, buy, and equip a boat; how to trailer, sail, navigate, and cruise in small boats; how to use communications and navigation

The author buys a long-dead vintage

BMW sight-unseen, travels a thousand miles to where it sits, gets it running, and drives it home. During the twelve-day trip, he finds that what began as a story of man-versus-machine turns into something else entirely-- a story of the kindness of strangers, and how doors sometimes open exactly when you need them to. "Rob Siegel is a writer with the mind of a mechanic and a mechanic

with the mind of a writer. He's also an old-school romantic of the best kind, and one of the few people who understands what car culture really means to the people invested in it-free of stereotype, cliché, or pat sentiments you've read a thousand times before. Like all of his writing, *Ran When Parked* focuses heavily on the why behind the hobby. It's a mix of casual, long-form blog

entry; detailed how-to; and emotive confessional; most of all, he seems to believe the world would be a better place if everyone else followed on his crazy path and devoted their free time to resurrecting old iron. Rethinking Infrastructure in Latin America and the Caribbean Penguin "Every once in a while an author arrives with the rare talent to

combine reality with romance. This is Janis Reams Hudson." —RT BOOK REVIEWS The stigma of his heritage has made Hawk accustomed to ridicule in Comanche County. But even as their childhood friendship blossoms into a passion neither of

them can keep at bay, they know that Abby's father will never accept their love. Then, after an evening with Abby, Hawk is ambushed and beaten. Believing him dead, Abby spends four years mourning him. But when, against all odds, he storms back into her life, her hope for a love that never had a chance to truly be realized is restored. States' digital radio transition, chronicling the technological and policy development of the HD Radio broadcast standard. A story laced with anxiety, ignorance, and hubris, the evolution of HD Radio pitted the nation's largest commercial and public broadcasters against the rest of the radio industry and the listening public in a pitched battle over defining

the digital future of the medium. The Federal Communications Commission has elected to put its faith in "marketplace forces" to govern radio's digital transition, but this has not been a winning strategy: a dozen years from its rollout, the state of HD Radio is one of dangerous malaise, especially as newer digital audio distribution technologies fundamentally redefine the

public identity of "radio" itself. Ultimately, Radio's Digital Dilemma is a cautionary tale about the overarching influence of economics on contemporary media policymaking, to the detriment of notions such as public ownership and access to the airwaves—and a call for media scholars and reformers to engage in the continuing struggle of radio's digital transition in hopes of reclaiming

these important principles. *Spending Better to Achieve More* CreateSpace Enjoy the journey, slowly! This breathtaking travel book celebrates taking the scenic route.
