There are a lot of books out there that show collections of logos. But David Airey's "Logo Design Love" is something different: it's a guide for designers (and clients) who want to understand what this mysterious business is all about. Written in reader-friendly, concise language, with a minimum of designer jargon, Airey gives a surprisingly clear explanation of the process, using a wide assortment of real-life examples to support his points. Anyone involved in creating visual identities, or wanting to learn how to go about it, will find this book invaluable. - Tom Geismar, Chermayeff & Geismar In Logo Design Love, Irish graphic designer David Airey brings the best parts of his wildly popular blog of the same name to the printed page. Just as in the blog, David fills each page of this simple, modern-looking book with gorgeous logos and real world anecdotes that illustrate best practices for designing brand identity systems that last. David not only shares his experiences working with clients, including

sketches and final results of his successful designs, but uses the work of many well-known designers to explain why well-crafted brand identity systems are important, how to create iconic logos, and how to best work with clients to achieve success as a designer. Contributors include Gerard Huerta, who designed the logos for Time magazine and Waldenbooks; Lindon Leader, who created the current FedEx brand identity system as well as the CIGNA logo; and many more. Readers will learn: Why one logo is more effective than another How to create their own iconic designs What sets some designers above the rest Best practices for working with clients 25 practical design tips for creating logos that last

La contabilizzazione dei costi del personale rappresenta, anche per gli addetti ai lavori, un'operazione non sempre facile e spesso fonte di dubbi: la presente guida ha l'obiettivo di illustrare, in maniera semplice e mediante l'ausilio di esempi pratici, come contabilizzare il costo del personale, evitando problematiche legate al non corretto appostamento delle voci nel bilancio di esercizio - soprattutto in presenza di eventi particolari, come la malattia, gli infortuni e così via - e alle conseguenti ripercussioni,

in termini di imposizione fiscale. In virtù di questa considerazione, al fine di appostare correttamente tutte quelle voci di bilancio utili al calcolo delle imposte, è necessario valutare gli aspetti relativi agli oneri contributivi ed assicurativi, al fine dell'eventuale deduzione dalla base imponibile IRAP. La disamina, alle cui fondamenta soggiacciono i principi contabili, si caratterizza per il gran numero di esempi - che, di fatto, rappresentano una sintesi delle casistiche più comuni che possono incontrarsi in azienda - volti a consentire un rapido approccio al lettore, soprattutto in quelle situazioni di particolare urgenza, come nel caso di dover calcolare il costo per esigenze di budget. Viene, infine, proposto un caso concreto di contabilizzazione del costo, partendo dal cosiddetto "cedolone", vale a dire il riassunto avvenuto nel periodo di lavoro considerato. How to Build Max-Performance Mitsubishi 4G63t Engines Lulu.com

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and

tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

At seventeen, Lech Blaine walked away unharmed from a car crash that killed three of his friends and left two in comas. On a May night in 2009, seven boys in Toowoomba, Queensland, piled into a car. They never arrived at their destination. The driver made a routine error, leading to a head-on collision. In the aftermath, rumours about speed and drink driving erupted. There was intense scrutiny from media and police. Lech used alcohol to numb his grief and social media to show stoicism, while secretly spiralling towards depression and disgrace. This is a riveting account of family, friendship, grief and love after tragedy. In a country where class and sport dominate, and car crashes compete with floods and pandemics for headlines, our connection with others is what propels us on. Heartbreaking and darkly hilarious, *Car Crash* is a story for our times. 'Scarifying and unforgettable, *Car Crash* is a story of carnage and life-long consequences - not just from a single, sudden catastrophe but from the long, slow cataclysm of masculine confusion. A brave and unsettling account.' —Tim Winton 'A heart-soaring act of literary bravery where the ongoing cost of experience is exposed in every note-perfect sentence. This is a profound reflection on the deafening soul noise heard by a beautiful group of young friends fated to live the rest of their lives with the silence of the dead. Some books just have to be written. And some books just have to be read.' —Trent Dalton 'I began this book with my guts in my mouth. Then, as I read on, I winced with recognition, I laughed a lot and my heart gradually broke open. It's odd to talk about "talent" when a book covers such sensitive, sad subject matter, but the truth is that Blaine has it. There are strong sentences, clarity of intent and tone, wicked one-liners and a mastery of metaphor. This book is for everyone - it truly captures something of "modern Australia" in a tenderly told story of one young man's tumultuous coming-of-age.' —Bri Lee 'Car Crash is a clear-eyed, bruising and tender account of how the moments that thrust you into adulthood can take place in seconds. Lech Blaine's journalism has long made me suspect he's one of the best writers of his generation. *Car Crash* confirms it, without a doubt.' —Ben Law

THE STORY OF CUBAN BOXER AND POLITICAL PARIAH GUILLERMO RIGONDEAUX'S HARROWING DECISION TO DEFECT IN HOPES OF REAPING THE REWARDS OF THE AMERICAN DREAM "What is one million dollars compared to the love of eight million Cubans?"

This was the question posed by legendary boxer Teofilo Stevenson in the 1970s, crowned by many as the Muhammad Ali of Cuba, in response to an offer of five million dollars to leave his island to fight Ali. But not all Cubans have come to the same conclusion, let alone with such apparent ease. Guillermo Rigondeaux, two-time Olympic champion and heir to Stevenson's throne, sacrificed everything he had in his home country—his wife, his son, his government-subsidized car and house, as well as universal reverence among his fellow citizens—to try to make it in the mecca of big-money boxing, the United States of America. But has the chance to make good in America been worth the loss of his national identity and the love of his countrymen? And to what extent has he been corrupted by the promise of untold riches? In *A Cuban Boxer's Journey*, author, filmmaker, and journalist Brin-Jonathan Butler chronicles the fascinating and tumultuous career of Rigondeaux—moody, driven, and almost mythically talented—as he attempts to capture the elusive and often punishing American dream. See how this athlete's most daunting challenge becomes how he can survive the complex forces outside of the ring.

First released in 2007, the bestselling *Transport Revolutions* argued that land transport in the first half of the 21st century will feature at least two revolutions. One will involve the use of electric drives rather than internal combustion engines. Another will involve powering many of these drives directly from the electric grid - as trains and trolley buses are powered today - rather than from on-board fuel. Now available for the first time in paperback and updated with the most recent data, it sets out the challenges to our growing dependence on transport fuelled by low-priced oil. These challenges include an early peak in world oil production and profound climate change resulting in part from oil use. It proposes responses to ensure effective, secure movement of people and goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts. Synthesizing engineering, economics, environment, organization, policy and technology in a detailed yet highly readable style, *Transport Revolutions* is essential reading for anyone working, studying or interested in transport and the environment.

The Road Map to Driving Greatness Prima Games

For 30 years some of the most talented and bravest drivers have battled across the continents of the world to claim what is arguably motorsport's toughest prize: the World Rally Championship. Now a multi-million dollar, global technology battle and terrestrial television phenomenon played out over the frozen wastes of Finland, the dusty plains of Australia and the sun-kissed mountain roads of Corsica, the WRC has reached its 30th birthday. This book celebrates that important milestone and paints an exhaustively detailed picture of the people and personalities who have shaped this great sport. The Complete Book of the World Rally Champions provides a biographical account of the 65 men who have won at least one World Championship Rally since 1973. The biographies are compiled by the sport's leading writers and historians and complemented by stunning photography. The book includes a detailed and accurate statistical career record of each driver, plus highlights of all the significant cars.

This book is full of magic and power, connects us to the new era we are living through with futuristic visions and prophecies of the future. This revelation 777 represents issues of the second millennium, such as the abstraction of words and the handling of images similar to a pictorial movement emerged in the year 1949 - POP ART - which is characterized by the use of iconography of popular culture that were taken from the media, as in the case of advertisements, comic books and other publications. In this

opportunity, it is shown how art has been made with the famous masterpiece "The Vitruvian Man" by Leonardo da Vinci. Part of the present investigation has been based on coincidences relative to my life with the environment, through which I have managed to confirm that I am the great awaited Vitruvian Man II. To consider myself a Titan, has allowed me to understand what every person belonging to this world must know to obtain their keys to success. In this prophecy I have shown that I am Vitruvian Man II, with a kind of POP ART, and I have highlighted images of NASA, Coins and Poker Cards that remind us of the consumerism that occurs in cities where the capital market flows. The image of the casino roulette is used to illustrate the chance of our time, at the moment of witnessing a possible extraterrestrial contact in the year 2251. The coincidences based on numerology with the number 7 and personal data, which can not be modified, are a

proof of the accuracy of what I show you today. With the intention of corroborating my discovery, I undertook the task of traveling to mark in the world that I am Vitruvian Man II, (the logo used by some astronauts in their space suit) for that purpose I made the crossing AUSTIN, AUSTRALIA, ARGENTINA, AUSTRIA that they are related to the word ASTRONAUT. The creation of new economic systems, sources of energy, means of transport, or even as our physical form will be, can hardly be known with the way we think today. This book opens the doors to a different world, where the high probabilities stand out that the English language will be the most used by the majority of human beings. Taking into consideration that this language today dominates more than 80% of the economic operations and the media, I visualize it as a fundamental tool for the future that will be unveiled to you. In this sense, I show you 77 verbs, 777 words, and various practical sentences that are used in the TOEFL test.
