The Definitive Guide to Investing in Asia InvestmentsAsia's
Changing International Investment RegimeSustainability,
Regionalization, and Arbitration

Until now, most socially responsible and impact investments have centred on developed markets, with growth potential and investment opportunities in the frontier economies of countries such as Cambodia, Laos, Myanmar, and Vietnam being mostly overlooked. While some individuals and organizations have begun to develop responsible investment opportunities with these countries in mind, large new sources of capital for development could still emerge. This book explores the greater potential for global investment in Southeast Asia, and the ways in which socially responsible investment styles can be used in their developing economies. It demonstrates how the benefits of investment could create a robust platform for separate stakeholders, including governments, non-governmental organizations, development banks, the financial sector, and small and medium sized enterprises. The author explores how shaping collaborative sustainable investment policies could speed up inclusive development, address the needs of those at the bottom of the pyramid, and ensure sustainable future growth.

The Asian Turn in Foreign Investment Rockport Publishers
"Studying the Asian Infrastructure Investment Bank (AIIB) through the lens of international relations (IR) theory, Chen argues that it is inappropriate to treat the AIIB as either a revisionist or a complementary institution. Instead, the bank is still evolving and the interaction of power, interests, and status that will determine whether the bank will go wild. Theoretically, the current shape of the AIIB will influence global strategic conditions and global perceptions of the bank itself, consequently affecting China's level of dissatisfaction with its power and status in the international financial system and maneuvering in the AIIB. To empirically show that, this book presents the evolution of the AIIB, compares the bank with its main competitors in the Asia-Pacific region, and conducts ten comparative case studies to show how countries

around the world have positioned themselves in response to the emergence of the AIIB"--

Goods, Services and Investment Springer

This book focuses on the Asia-Pacific region, delineating the evolving dynamics of foreign investment in the region. It examines the relationship between efforts to increase foreign direct investment (FDI) and efforts to improve governance and inclusive growth and development. Against a background of rapidly developing international investment law, it emphasises the need to strike a balance between these domestic and international legal frameworks, seeking to promote both foreign investment and the laws and policies necessary to regulate investments and investor conduct. Foreign investments play a pivotal role in most countries' political economies, and in order to encourage cross-border capital flows, countries have taken various steps, such as revising their domestic legal frameworks, liberalising rules on inward and outward investment, and creating special regimes that provide incentives and protections for foreign investment. Alongside the developments in domestic laws, countries have also taken bilateral and multilateral action, including entering into trade and/or investment agreements. Further, the book explores regional investment trends, highlights specific features of Asia-Pacific investment laws and treaties, and analyses policy implications. It addresses four overarching themes: the trends (how Asia-Pacific's agreements compare with recent global trends in the evolving rules on foreign investment); what China is doing; current investment arbitration practice in Asia; and the importance of regionalising investment law in the Asia-Pacific region. In addition, it identifies and discusses the research and policy gaps that should be filled in order to promote more sustainable and responsible investment. The book offers a valuable resource not only for academics and students, but also for trade and investment officials, policy-makers, diplomats, economists, lawyers, think tanks, and business leaders interested in the governance and regulation of foreign investment, economic policy reforms, and the development of new types of investment agreements.

The Specter of Global China Penguin

In 2011 the World Bank—with funding from the Bill and Melinda

Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.

Current Perspectives and Future Challenges Routledge

For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War.

Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

The Changing Face of Corruption in the Asia Pacific McGraw Hill Regional economic engagement within South Asia may gain increasing importance owing to several factors that are currently in play, including strategies to diversify global value chains and locate such value chains nearer home. These developments offer South Asia a chance to enhance its low levels of regional economic engagement and capitalize on significant unrealized development opportunities. This report shows that examining intraregional investment and knowledge connectivity enhances our understanding of the low levels of intraregional trade and limited regional value chains in South Asia. Creating a new and unique data set for South Asian investment, it provides a detailed and nuanced understanding of the drivers of outward investment, both regional and global, for South Asian firms. "Regional Investment Pioneers in South Asia" provides key considerations for policy makers in South Asia, which remain particularly relevant in the aftermath of the pandemic. First, it makes a case for regulatory relaxation of outward FDI regimes, based on new micro foundations, grounded in value chains. Second, it spells out details of smart inward FDI promotion techniques and investment facilitation. Third, it identifies distinct cross-border information-enhancing and network development activities. Fourth, it suggests that digital connectivity and continued interventions in reducing trade costs are warranted to increase investment as well

as trade flows. There is particular scope to build on the digitalization initiatives in trade and investment facilitation taken during the pandemic. "Regional Investment Pioneers in South Asia" follows on, and is complementary to, the earlier World Bank report, "A Glass Half Full: the Promise of Regional Trade in South Asia."

The Belt and Road Initiative (Bri) and Asian Infrastructure Investment Bank (Aiib), Volume I McGraw-Hill/Irwin

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Impact Investment Funds for Frontier Markets in Southeast Asia Routledge

This book provides deep insight into the flow of foreign direct investment from Asia to Europe. It assesses the topic of trade and investment from the reverse direction, considering Asian countries as the capital investors in the EU countries. Each chapter analyses either the international trade or investment of one or more Asian countries in correlation with one or more

European states. The book analyses a significant number of countries, which are included in various economic associations, such as the Visegrad Group, the Three Seas Initiative, the European Free Trade Association, or are states from the same geopolitical region – for instance, the Iberian Peninsula, Baltic States, and Nordic countries. It examines Indian outward foreign direct investment trends in the UK before and after Brexit, based on select case studies, to emphasize the impact of Brexit, as well as to encourage trade and investment among Asian and European countries before and during COVID-19, to highlight the influence of the pandemic on the target country's economy. The authors use a variety of analytical methods in the book, such as numerical presentations, econometric analysis, descriptive statistical analysis, an examination of time-series dynamics, the modelling of functions, and semi-structured interviews with company executives. The regional perspectives bring new and useful insights to the topic, and the case study approach allows for a wider exploration of the research questions as well as their theoretical evolution. The book provides a "big picture" for economists, researchers, business analysts, and PhD students of economics, international trade, and business.

China's Grand Strategy to Displace American Order Academic Press

World Bank Technical Paper 249. These papers from a World Bank-sponsored seminar address two timely issues: water policy and water markets. The Bank has emphasized that water must be treated as an economic and social good. From a management viewpoint, countries should explore the efficient allocation of water through the use of pricing. Although pricing through markets has existed for some time, the use of these markets has not been widespread. This volume covers the traditional fields in water management. Section I discusses water policy in the Middle East, North Africa, and China's Yellow River Basin. The second section reviews the Bank's experience with irrigation and drainage and the attitudes of water resources professionals toward problems in this area. The final section targets the general aspects of water markets with case studies from Chile, Mexico, Spain, and the United States. The suitability of markets for Central Asia and the Indo-Gangetic basin is also examined.

Doing Business in Asia Routledge

The COVID-19 pandemic struck the global economy after a

decade that featured a broad-based slowdown in productivity growth. *Global Productivity: Trends, Drivers, and Policies* presents the first comprehensive analysis of the evolution and drivers of productivity growth, examines the effects of COVID-19 on productivity, and discusses a wide range of policies needed to rekindle productivity growth. The book also provides a far-reaching data set of multiple measures of productivity for up to 164 advanced economies and emerging market and developing economies, and it introduces a new sectoral database of productivity. The World Bank has created an extraordinary book on productivity, covering a large group of countries and using a wide variety of data sources. There is an emphasis on emerging and developing economies, whereas the prior literature has concentrated on developed economies. The book seeks to understand growth patterns and quantify the role of (among other things) the reallocation of factors, technological change, and the impact of natural disasters, including the COVID-19 pandemic. This book is must-reading for specialists in emerging economies but also provides deep insights for anyone interested in economic growth and productivity. Martin Neil Baily Senior Fellow, The Brookings Institution Former Chair, U.S. President's Council of Economic Advisers This is an important book at a critical time. As the book notes, global productivity growth had already been slowing prior to the COVID-19 pandemic and collapses with the pandemic. If we want an effective recovery, we have to understand what was driving these long-run trends. The book presents a novel global approach to examining the levels, growth rates, and drivers of productivity growth. For anyone wanting to understand or influence productivity growth, this is an essential read. Nicholas Bloom William D. Eberle Professor of Economics, Stanford University The COVID-19 pandemic hit a global economy that was already struggling with an adverse pre-existing condition—slow productivity growth. This extraordinarily valuable and timely book brings considerable new evidence that shows the broad-based, long-standing nature of the slowdown. It is comprehensive, with an exceptional focus on emerging market and developing economies. Importantly, it shows how severe disasters (of which COVID-19 is just the latest) typically harm productivity. There are no silver bullets, but the book suggests sensible strategies to improve growth prospects. John Fernald Schrodgers Chaired Professor of European Competitiveness and

Reform and Professor of Economics, INSEAD
The Dhandho Investor Oxford University Press
With changes to the international investment law landscape and Asian countries now actively developing their network of bilateral investment treaties (BITs) and free trade agreements (FTAs), this volume studies issues relating to Asian perspectives on international investment law and forecasts the future of Asian contribution to its science and practice. The book discusses the major factors that have been driving Asian countries to new directions in international investment rule-making and dispute settlement. It also looks at whether Asian countries are crafting a new model of international investment law to reflect their specific socio-cultural values. Finally, the book examines whether there are any 'Asian' styles of international investment rule-making and dispute settlement, or if individual Asian countries are seeking specific national 'models' based on economic structure and geopolitical interests. This unique collection is exceptionally useful to students, scholars and practitioners of international investment law, international trade law and public international law.

Regional and Global Gains from Liberalization John Wiley & Sons
The Rise of Asia examines emerging trends and patterns of foreign trade and investment in Asia with a view to contributing to the policy debate on how development strategies should be adopted in response to challenges to economic globalization. The existing body of knowledge in this subject area has predominantly been shaped by the experiences of the newly industrialized countries (NICs) in East Asia. This volume is inspired by the conviction that generalization from the NIC experience is hazardous because the on-going process of economic globalization over the past two decades has dramatically transformed the international context of national development policy making. Moreover, as 'embracing market', albeit at varying degree and rapidly, has now become an Asia-wide phenomenon, it is vital to look at the issues from a broader relational perspective, paying attention to opportunities for intra-regional division of labour within the wider context of global economic integration. This book will be of interest to students and scholars with an interest in Asian studies, economics, political economy and globalization.

Mergers and Acquisitions in Asia Routledge

A comprehensive value investing framework for the individual investor In a straightforward and accessible manner, *The Dhandho Investor* lays out the powerful framework of value investing. Written with the intelligent individual investor in mind, this comprehensive guide distills the Dhandho capital allocation framework of the business savvy Patels from India and presents how they can be applied successfully to the stock market. The Dhandho method expands on the groundbreaking principles of value investing expounded by Benjamin Graham, Warren Buffett, and Charlie Munger. Readers will be introduced to important value investing concepts such as "Heads, I win! Tails, I don't lose that much!," "Few Bets, Big Bets, Infrequent Bets," Abhimanyu's dilemma, and a detailed treatise on using the Kelly Formula to invest in undervalued stocks. Using a light, entertaining style, Pabrai lays out the Dhandho framework in an easy-to-use format. Any investor who adopts the framework is bound to improve on results and soundly beat the markets and most professionals.

10 Timeless Principles World Bank Publications

- New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, Vox "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are

well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Asian Perspectives on International Investment Law World Scientific

This book consists of 20 short essays on different dimensions of international economic policy with specific (though not exclusive) focus on Asia. Topics covered include: exchange rate regimes and reserve buildup in Asia; global macroeconomic imbalances; financial sector liberalization; international capital flows to and from Asia; infrastructure financing in Asia; foreign direct investment (FDI) flows, production networks, manufacturing and outsourcing in Asia; the economic rise of China and India; and trade, financial and monetary regionalism in Asia. While the book covers important and often technical economic issues of contemporary policy relevance, it is written in a manner that is easily accessible to non-economists, including students of public policy, international affairs, international commerce and business, as well as policy-makers and interested observers. Book jacket.

East Asian Integration Routledge

This book examines recent trends towards mergers and acquisitions in Japan, Greater China and Southeast Asia from 1990 to 2004. Comparisons are made among regions and between countries of particular regions. The economic profiles and investment climates of key countries are discussed and many issues are examined from the perspectives of US-based and UK-based investors because they play significant roles in Mergers and Acquisitions activities in all regions of the world. The practices and management strategies in Asia are also compared

with those observed in the United States and the United Kingdom where appropriate.

Asia's Changing International Investment Regime World Bank Publications

Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

World Bank Publications

The terms "Eurodollar" and "Eurocurrency" were widely used in the 1970s, a time when the US dollar was prevalently traded in Europe. Later, the Eurodollar market was extended to Asia, especially Singapore and Hong Kong, and to cover a wider range of non-local currencies. But international markets have changed, with Renminbi set to become the world's dominant offshore

currency. Leading bankers, analysts, bank supervisors, economists, journalists, professors, and lawyers contributed to *Investing in Asian Offshore Currency Markets*, exploring various issues regarding offshore currency markets in Asia, and especially the challenges and issues in building the offshore market for Renminbi.

Design-it-Yourself Graphic Workshop Routledge

Introducing... *Essentials of Investments*, 9th Global Edition, by Zvi Bodie, Alex Kane and Alan J. Marcus. We are pleased to present this Global Edition, which has been developed specifically to meet the needs of international investment students. A market leader in the field, this text emphasizes asset allocation while presenting the practical applications of investment theory without unnecessary mathematical detail. The ninth edition includes new coverage on the roots and fallout from the recent financial crisis and provides increased content on the changes in market structure and trading technology. Enhancements to this new Global Edition include: - New 'On the market front' boxes highlight important investment concepts in real world situations across the globe, to promote student thinking without taking a full case study approach. Topics include short-selling in Europe & Asia, credit default swaps and the debt crisis in Greece and include examples from Commerzbank, JP Morgan, Facebook, Coca-Cola, Santander, The European Energy Exchange, plus many more! - Revised worked examples illustrate problems using both real and fictional scenarios from across the world to help students develop their problem solving skills. Regional examples include Hutchinson Whampoa (Asia), The Emirates Group (The Middle East) and KLM Royal Dutch Airlines (The Netherlands). - Revised end-of chapter material includes brand new global questions and global internet exercises that feature currencies, companies and scenarios from Europe, Middle East, Africa and Asia to increase engagement for international students. - Global Edition of *Connect Plus Finance*, McGraw-Hill's web-based assignment and assessment platform with eBook access, helps students learn faster, study more efficiently, and retain more knowledge. This Global Edition has been adapted to meet the needs of courses outside of the United States and does not align with the instructor and student resources available with the US edition.
