Ricordi - Bmg Ricordi
As the first book of its
kind, Nancy Lee
Harper's Portuguese
Piano Music: An
Introduction and
Annotated Bibliography
fills the gap in the
historical record of
Portuguese piano
music from its start in
the 18th century to the
present. While
although Spanish piano
music is well
documented owing to
the reputation of such
composers as Isaac
Albéniz, Enrique

Granados, and Manuel
de Falla, our
knowledge of
compositions in the
tradition of Portuguese
piano music has not
fared as well, barring
the work of Carlos
Seixas (1704-1742).
This obscurity,
however, reflects
poorly on the history of
early piano music in
light of the many
compositions written
for fortepiano on behalf
of the Portuguese court
during the first half of
the 18th century.
Indeed, it was in the
royal halls of King John
V during his reign from
1706 to 1750 where
the early fortepiano
was frequently heard.
In Portuguese Piano
Music, Harper explores
this rich musical
tradition, offering a
brief introduction to
the pianistic history of
Portugal and overviews

of Portugal's contributions to solo piano music, piano in instrumental chamber music, piano concerti, piano for multiple pianists including with works with electronics, and didactic piano. While paying close attention to female composers, Harper adds an annotated and graded bibliography that presents readers with a comprehensive inventory of compositions. Appendixes include a selected discography, list of publishers, and other types of critical source information. To further illustrate its contents, Portuguese Piano Music contains a CD on which Harper performs representative repertoire, some of which are world premieres. This work is

aimed at pianists, teachers, pupils, musicologists, and music lovers seeking to discover the remarkable world of Portuguese piano music.

Faber & Faber (LKM Music). Charles Neidich is among the world's foremost authorities on Mozart's masterful Concerto in A for Bass Clarinet, KV. 622. This publication presents Neidich's full reconstruction of the original bass clarinet

part, as well as a carefully revised solo part for the standard clarinet in A, based on Mozart's autograph fragment and important early editions. This edition is a must for any clarinetist who wishes to perform and study one of the most important concertos ever written for the instrument.

Concerto for Clarinet in A, K622. (Piano Reduction Based on the Urtext of the New Mozart Edition). G Schirmer, Incorporated
Reduction for clarinet (or basset clarinet) and piano. The basset clarinet (with an extended range to low

C) has been enjoying a resurgence in popularity. Many modern composers have been answering this trend by writing new music for the instrument. Joan Tower's Clarinet Concerto, while performable on the standard A clarinet, takes advantage of the basset clarinet's extended range with a few melodic excursions to notes beneath E. This 19-minute work was recorded on Summit Records pianist Eckhart Selheim.

Carl Nielsen's *Koncert* from Opus 57 is a work for clarinet and orchestra. This edition features a piano reduction of the original orchestral score with clarinet solo part. Originally composed in 1928, this edition is based on the revised score published by the Carl Nielsen Edition in 2002.

Concerto for Oboe and Strings

Despite its short duration, *The Peacock Moment* holds a central place in Anders Hillborg's worklist. Much of the material in this frenetic one-

minute work for clarinet and piano derive from a prime-number series---a common feature in his subsequent work. Particularly striking is the way Hillborg creates the impression of a polyphony of voices within the clarinet's solo lines. Expertly arranged *B-Flat Clarinet Solo* by Carl Maria von Weber from the Kalmus Edition series. This is from the Romantic era.

Piano reductions of orchestral scores are invaluable tools for rehearsals and arguably the most

frequent vehicles for modern-day performances. Piano accompanists face the arduous task of performing an orchestral reduction in a manner consistent with the integrity of the score while achieving an idiomatic sound on the keyboard. All pianists stand to gain from any study that offers practical approaches to and considerations for arriving at a sensible pianistic representation of any work originally intended for orchestra. This study uses Mozart's Clarinet Concerto, K. 622, to examine the most accessible editions arranged for clarinet and piano. It highlights the differences between all of the

orchestral reductions and evaluates these choices from a pianist's perspective.

Furthermore, the work includes numerous side-by-side comparisons, assesses each edition in terms of its adherence to the orchestral score, and offers multiple interpretations of the most effective way to represent the orchestra within the confines of the piano.
