 Brave New Digital Classroom deftly interweaves results of pedagogical research and descriptions of the most successful computer-assisted language learning (CALL) projects to explore how technology can best be employed in the foreign-language curriculum to assist the second language acquisition process. Directed to all language teachers -- whether at the school or the postsecondary level, with or without prior experience -- this book focuses on how to use new technologies effectively. Blake urges teachers to move beyond a simple functional competence of knowing how to use the tools toward first a critical competence -- realizing what the various tools are good for -- and ultimately a rhetorical competence of knowing how the tools will help transform the learning environment. This book examines the effective use of a range of technologies, from Internet sites through computer-mediated communication such as synchronous chatting and blogs, to distance learning. At the end of each chapter questions and activities demonstrate the interactionist, learner-centered pedagogy Blake espouses. An invaluable reference for experienced researchers and CALL developers as well as those of limited experience, Brave New Digital Classroom is also ideal for graduate-level courses on second language pedagogy. It will also be of interest to department chairs and administrators seeking to develop and evaluate their own CALL programs.

 Motion Simulation and Mechanism Design with SOLIDWORKS Motion 2017 is written to help you become familiar with SOLIDWORKS Motion, an add-on module of the SOLIDWORKS software family. This book covers the basic concepts and frequently used commands required to advance readers from a novice to intermediate level in using SOLIDWORKS Motion. SOLIDWORKS Motion allows you to use solid models created in SOLIDWORKS to simulate and visualize mechanism motion and performance. Using SOLIDWORKS Motion early in the product development stage could prevent costly redesign due to design defects found in the physical testing phase. Therefore, using SOLIDWORKS Motion contributes to a more cost effective, reliable, and efficient product design process. Basic concepts discussed in this book include model generation, such as creating assembly mates for proper motion; carrying out simulation and animation; and visualizing simulation results, such as graphs and spreadsheet data. These concepts are introduced using simple, yet realistic examples. Verifying the results obtained from the computer simulation is extremely important. One of the unique features of this book is the incorporation of theoretical discussions for kinematic and dynamic analyses in conjunction with the simulation results obtained using SOLIDWORKS Motion. Verifying the simulation results will increase your confidence in using the software and prevent you from being fooled by erroneous simulations.

 Marty Preston wonders why it is that despite Judd Traver's attempts to redeem himself everyone is still so willing to think the worst of him. Marty's friend David is sure that Judd will be named as the murderer of a man who has been missing. Others are sure that Judd is behind a series of burglaries in the area. But Marty's parents and, with some trepidation, Marty himself persist in their attempts to be good neighbors and to give Judd a second chance. Now that Marty has Shiloh, maybe he can help Judd to take better care of his other dogs. Then again, maybe folks are right -- there's no way a Judd Travers can ever change for the good. Then a terrifying life-or-death situation brings this dilemma into sharp focus. Saving Shiloh is a powerful novel that brings this trilogy to a close.

Celebrate the 25th anniversary of this Newbery and Coretta Scott King Honoree about a hilarious family on a road-trip at one of the most important times in America's history. This special edition makes a perfect gift and includes bonus content! Enter the hilarious world of ten-year-old Kenny and his family, the Weird Watsons of Flint, Michigan. There's Momma, Dad, little sister Joetta, and brother Byron, who's thirteen and an "official juvenile delinquent." When Byron gets to be too much trouble, they head South to Birmingham to visit Grandma, the one person who can shape him up. And they'll be in Birmingham during one of the darkest moments in America's history. "Every so often a book becomes a modern classic almost as soon as it arrives on bookshelves. That happened in the mid-'90s when Christopher Paul Curtis released his first book, *The Watsons Go to Birmingham--1963*." --NPR "One of the best novels EVER." --Jacqueline Woodson, Newbery Honor and National Book Award-winning author of *Brown Girl Dreaming*

"Computerised Test Generation for Cross-National Military Recruitment" by Prof. Sidney H. Irvine is a handbook for use in occupational psychology, test construction and psychometrics. The book describes the development of the British Army Recruitment Battery (BARB) by Prof. Irvine and his colleagues at the University of Plymouth. BARB is a computer-administered selection battery that is still in use to this day and is capable of developing new parallel tests for every candidate in the recruitment process. In telling the story, Sidney Irvine describes not only the development of the battery itself, funded by the UK Ministry of Defence, but all the work that went on before and afterwards, in the United Kingdom, with European allies and in the United States. _x000D_ Prof. Irvine argues that judicious application of the current state-of-the art in psychometric selection tests can be used to maximise retention and minimise attrition. As such, this long-awaited book will be of great interest to psychologists, psychometricians, test developers, those involved in personnel selection and all with an interest in military history, in particular the history of military science. With a foreword and chapter introductions from a worldwide array of subject matter experts, the book also has a full subject index and an extensive bibliography. I commend it heartily." — Professor Jamie Hacker Hughes CPsychol CSci FBPsS, Former Defence Consultant Advisor in Psychology, Ministry of Defence, United Kingdom.
