This book provides some common background in child development and assists the provider of child assessment services to determine appropriate procedures to answer questions and investigate specific problems. It is intended for graduate students in child clinical psychology and school psychology.

An Investigation of the Effects of Two Reading Readiness Programs which Were Administered by Parents to Their Post-kindergarten Children on Measures of Readiness, Listening, and Beginning Reading Guilford Press

ASSESSMENT IN SPECIAL AND INCLUSIVE EDUCATION offers basic assessment information along with a handbook-style reference to comprehensive, frank reviews of the tests most administered in K-12 schools. Updated to reflect changes in the field, this edition brings to the forefront the important topics of MTSS/RTI and ELL -- while retaining key features that have made the text a classic. The authors focus on both classroom-based tests designed to inform instruction and intervention, as well as more formal standardized tests that are commonly used to determine eligibility for special education. Appropriate for novices and experts, this standard-setting text equips readers with the knowledge and tools to effectively and efficiently assess their students' skills and abilities. Featuring an emphasis on improved outcomes, it shows readers how to go beyond efforts designed to make predictions about students' lives to efforts that can make a difference in the lives of the students they serve. With more than three times as many defined entries, biographies, illustrations, and appendices than any other dictionary of psychology ever printed in the English language, Raymond Corsini's *Dictionary of Psychology* is indeed a landmark resource. The most comprehensive, up-to-date reference of its kind, the *Dictionary* also maintains a user-friendliness throughout. This combination ensures that it will serve as the definitive work for years to come. With a clear and functional design, and highly readable style, the *Dictionary* offers over 30,000 entries (including interdisciplinary terms and contemporary slang), more than 125 illustrations, as well as extensive cross-referencing of entries. Ten supportive appendices, such as the Greek Alphabet, Medical Prescription Terms, and biographies of more than 1,000 deceased contributors to psychology, further augment the *Dictionary's* usefulness. Over 100 psychologists as well as numerous physicians participated as consulting editors, and a dozen specialist consulting editors reviewed the material. Dr. Alan Auerbach, the American Psychological Association's de facto dictionary expert, served as the senior consulting editor. As a final check for comprehensiveness and accuracy, independent review editors were employed to re-examine, re-review, and re-approve every entry.

Reading--from Words to Multiple Texts John Wiley & Sons

Increasing the mastery of reading and text literacy in the general population is one of the most important challenges faced by both developed and developing societies. Providing a new reference for researchers and practitioners involved in this domain, this book brings together empirical research on the multiple levels of language that are involved in reading. It emphasizes the concrete outcomes of scientific research, and illustrates the continuity among levels. The chapters deal with

clearly articulated questions, provide up-to-date reviews of the literature, and include discussions of the impacts of research outcomes for the practice of reading instruction. Furthermore, the volume addresses the gap between restricted and more functional approaches to reading competency. Finally, it addresses some of the new issues that arise from the rapid changes in reading practices that are related to the diffusion of digital technologies. Featuring contributions from authors who are among the acknowledged leaders in the field and presenting the state of the art and current controversies in reading and literacy research, this volume honors the profound impact of Charles Perfetti on reading research.

Budding Botanists, a life science unit for grades 1-2, engages students in an investigation of plant life as they assume the role of botanists. Team members seek to understand the structure, nature, and life cycle of plants, and to answer questions such as "How can plants be used to fuel cars?"

Winner of the 2008 NAGC Curriculum Studies Award, Budding Botanists was developed by the Center for Gifted Education at The College of William and Mary, to offer advanced curriculum supported by years of research. The Center's materials have received national recognition from the United States Department of Education and the National Association for Gifted Children, and they are widely used both nationally and internationally. Each of the books in this series offers curriculum that focuses on advanced content and higher level processes. The science units contain simulations of real-world problems, and students experience the work of real science by using data-handling skills, analyzing information, and evaluating results. The mathematics units provide sophisticated ideas and concepts, challenging extensions, higher order thinking skills, and opportunities for student exploration based on interest. These materials are a must for any teacher seeking to challenge and engage learners and increase achievement. Grades 1-2

The diverse composition of American families and changing ways of raising our children have become subjects of intense scrutiny by researchers and policymakers in recent years. Shifting demographics and work patterns, growing numbers of women in the work force, teenage pregnancy, single-parent families, and the deinstitutionalization of the elderly, disabled, and mentally ill—all these trends have significantly affected family life. Evaluating Family Programs effectively bridges the gap between researchers and practitioners in order to bring practical, understandable advice to

providers of family programs and to program funders and policymakers. Heather B. Weiss and Francine H. Jacobs have collected in this volume works which move outside the traditional approaches of their disciplines to create new models for delivering and evaluating services. This sets a mood of genuine inquiry and excitement about successful aspects of programs while maintaining openness about the limitations of both research and practice. By expanding the research model, this work is an attempt to understand reciprocal influences of extended family, culture, community, and social institutions. It urges those who advocate program accountability to understand that not all types of evaluations are appropriate for all programs, and it notes that limitations in current evaluation technologies make it difficult to evaluate outcomes. Evaluating Family Programs reminds the reader that in order to develop sound family policy we must look at children and families in context. Because policymakers, program administrators, and informed citizens have come to rely more upon the results of evaluation research, we must improve our methods while not losing sight of its limitations. It is a thought-provoking contribution to the efforts of those who seek to support the American family with compassion, understanding, and realism.

Assessing Special Students Routledge

Designed to help students learn how to assess clients, conduct treatment planning, and evaluate client outcomes, Counseling Assessment and Evaluation addresses specific CACREP competencies. Incorporating case studies and examples, authors Joshua C. Watson and Brandé Flamez provide foundational knowledge for sound formal and informal assessments, cover ethical and legal considerations in assessment, describe basic statistical concepts, highlight the domains in which

assessments are commonly used (intelligence, aptitude, achievement, personality, career, etc.), and provide strategies for integrating assessment data when working with clients. “Watson and Flamez have captured the essence of the assessment process in their new book. Through rich case illustrations and the authors’ deep knowledge of the subject, readers are provided the most current trends and reflections on the assessment process.” —Bill McHenry, Texas A&M University–Texarkana
 “The text is very straightforward and easy to read. It encourages students to apply what they are learning through case illustrations and guided practice exercises.” —Wendy Killam, Stephen F. Austin State University
 “Watson and Flamez provide the reader with an engaging discussion of the fundamentals of counseling assessment and evaluation. ?—Mark W. Dewalt, Winthrop University
 “The case illustrations and the practice exercises are exceptional and go a long way toward making the material accessible. Case examples in the body of the text are also well done.” —Patricia Andersen, Midwestern State University
