If You Only Knew Springer

This book brings together papers dealing with essential issues in applied linguistics and multilingualism that have been contributed by leading figures in these two fields and present state-of-the-art developments in theory and research. The first part includes articles touching on various aspects of multiple-language acquisition, with a particular emphasis on the role of affordances, the interfaces between language and thought, and factors influencing the process of language learning. Part Two deals with individual variations in the acquisition of additional languages, focusing in particular on the impact of such variables as age, aptitude, motivation and learning deficits. Finally, Part Three presents contributions illuminating key issues in the acquisition of different subsystems and skills, such as grammar, phonology, lexis and writing systems. Thanks to the diversity of perspectives on applied linguistics and multilingualism, as well as the cutting-edge nature of some of the proposals, this edited collection will be an important reference work and a source of inspiration for theorists and researchers.

New developments in ESP teaching and learning research
IGI Global

This book provides a detailed introduction and guide to researching translator and interpreter education. Providing an overview of the main research topics, trends and methods, the book covers the following six areas: training effectiveness, learning and teaching practices, assessment, translation and interpreting processes, translated and interpreted texts, and professionals' experiences and roles. The book focuses on explaining the issues and topics researched in each area, and showing how they have been researched. As the first book to provide a comprehensive overview of translator and interpreter education research, it has important implications to developing its areas at the theoretical and practical levels. In addition, it offers an invaluable guide for those interested in researching translator and interpreter education areas, and in educating translators and

interpreters.

Improving Individual Performance IGI Global

In today's constantly changing business environment, capable people are crucial to an organization's success, and developing their capabilities through training, learning and development initiatives is a major investment. While measuring the return on that investment is important, attempts to do so are much less valuable if they are not accompanied by a clear understanding of all of the factors that can affect the application of new skills and knowledge on the job - in other words, a clear understanding of what affects learning transfer. So, if organisations are to remain competitive, and develop the highly skilled people that will contribute to their future performance, improving learning transfer should be a priority. Cyril Kirwan's book addresses this critical issue at a number of levels. Firstly, it explores what learning transfer actually is (it's about application of learning back at work, as well as maintenance of that learning over time). Secondly, it describes the main factors that affect transfer, in terms of trainee characteristics, training design factors, and work environment characteristics. It also examines how those factors exert their effect, which ones are more important, how they interact with one another, and in doing so constructs a practical learning transfer model for practitioners. The book also describes in some detail what the various factors working for or against learning transfer look like in practice. Finally, using case studies, it points the way towards what can be done before, during and after training to improve the rate of transfer. This highly practical book will help trainers, development specialists and line managers ensure that their training is about real outcomes and not just inputs.

Training Needs Assessment Springer

Introducing Needs Analysis and English for Specific Purposes is a clear and accessible guide to the theoretical background and practical tools needed for this early stage of curriculum development in ESP. Beginning with definitions of needs analysis and ESP, this book takes a jargon-free approach which leads the reader step-by-step through the process of performing a needs analysis in ESP, including: how to focus a needs analysis according to the course and student level; the selection and

sequencing of a wide variety of data collection procedures; analysis and interpretation of needs analysis data in order to write reports and determine Student Learning Outcomes; personal reflection exercises and examples of real-world applications of needs analysis in ESP. Introducing Needs Analysis and English for Specific Purposes is essential reading for pre-service and in-service teachers, and students studying English for Specific Purposes, Applied Linguistics, TESOL and Education.

Promoting Peace and Global Relations Springer Science & Business Media

Presented in two parts, this book firstly introduces core considerations in ESP course development drawing on examples from a wide range of ESP and EAP courses. Secondly four case studies show how experienced ESP teachers and course developers went about developing courses to meet the needs of their particular learners.

This book provides a practical and accessible update of major developments in ESP today.

ICIESC 2021 Cambridge Scholars Publishing

Information engineering and applications is the field of study concerned with constructing information computing, intelligent systems, mathematical models, numerical solution techniques, and using computers and other electronic devices to analyze and solve natural scientific, social scientific and engineering problems. Information engineering is an important underpinning for techniques used in information and computational science and there are many unresolved problems worth studying. The Proceedings of the 2nd International Conference on Information Engineering and Applications (IEA 2012), which was held in Chongqing, China, from October 26-28, 2012, discusses the most innovative research and developments including technical challenges and social, legal, political, and economic issues. A forum for engineers and scientists in academia, industry, and government, the Proceedings of the 2nd International Conference on Information Engineering and Applications presents ideas, results, works in progress, and experience in all aspects of information engineering and applications.

CRM Automation John Wiley & Sons

We are delighted to deliver the Proceedings of the 3rd International Conference on Innovation in Education, Science and Culture (ICIESC). This conference was organized by Research and Community Service Centre of Universitas Negeri Medan (LPPM UNIMED) held virtually on 31 August 2021. By raise up the main theme of Leading Recovery: "The New Innovation in Education, Science and Culture After a Global Pandemic", the 3rd ICIESC conference shows up several interested topics as a Science Education, Vocational Education, Social Science and Humanities, Management Innovation and Heritage Culture. Some of the topics been interested topic and important to be discussed. With the number participant is 180 participants, who came from Universitas Negeri Medan, Universitas Negeri Makasar, Widyagama University of Malang, Rizal Technological University, Philippine, Sholom-Aleichem Priamursky State University Rusia, Thu Dau Mot University Vietnam. ICIESC consists of 79 papers. The double blinds review process was employed by committee to evaluate all papers, whose members are highly qualified independent researchers in the ICIESC topic area. It has been our privilege to convene this conference. Our sincere thanks, to the conference organizing committee; to the Program Chairs for their wise advice and brilliant suggestion on organizing the technical program and to the Program Committee for their through and timely reviewing of the papers. Recognition should go to the Local Organizing Committee members who have all worked extremely hard for the details of important aspects of the conference programs and social activities. Finally, we hope that this proceedings can bring contribution and inspire you, and result in new knowledge, collaborations, and friendships. Thank you and we hope to meet you again for the next conference of ICIESC.

What English Language Teachers Need to Know II Routledge
An introductory textbook that assumes no prior knowledge of linguistics or second language acquisition, this book presents a comprehensive overview of the theoretical foundations, methods and practices of Teaching English as a Foreign Language (TEFL) for pre-service teachers. Lennon covers the theoretical bases for TEFL and addresses second language-acquisition research, past and present EFL teaching methodology, as well as psychological and social approaches to individual language-learner variation. Further chapters provide extensive yet accessible coverage on essential foundational topics, including chapters on pronunciation,

grammar, vocabulary, literature and testing. Offering a sociocultural approach in which the teacher is seen as a facilitator and supporter of students' self-directed learning, this text provides the prospective teacher with the knowledge and skills to be an effective educator in the EFL classroom. The targeted EFL focus makes this book ideal for pre-service teachers and for teacher training programmes around the world. Each chapter includes a Food for Thought section with questions for reflection and a Further Reading list.

International Education Exchanges and Intercultural Understanding Peter Lang

Instruments for Research into Second Languages is an accessible introduction to understanding and evaluating existing and emerging methodologies in L2 research. The book provides an introduction to the data collection materials available in the IRIS database. IRIS is an open access, searchable repository of instruments used to elicit data for research into second and foreign language learning and teaching. The book is aimed at graduate students, researchers and educators in the fields of Applied Linguistics and Second Language Acquisition. Featuring contributions from top scholars in the field, this dynamic volume includes empirical research carried out using innovative instruments held in IRIS, offering insights into their basic mechanics, how and why they are used, as well as the challenges they can present. The chapters describe the kinds of data (evidence about knowledge, processing, interaction, learning, and motivation) that result from these methods, and they discuss conditions that lead to reliable and valid data collection and analysis. This unique collection provides researchers, professionals, and students with up-to-date responses to practical and theoretical questions about how second language learning and teaching can be investigated using the IRIS database of instruments. IRIS was funded by the Economic and Social Research Council and is a long term British Academy Research Project.

Language Centre Needs Analysis Xlibris Corporation

This comprehensive guide to Customer Relationship Management (CRM) draws on Barton Goldenbergs 20 plus years of experience guiding firms to a successful implementation of CRM solutions and techniques. Goldenberg demonstrates how the right mix of people, process, and technology can help firms achieve a superior

level of customer satisfaction, loyalty, and new business. Beginning with a primer for executives who need to get quickly up-to-speed on CRM, the book covers a full range of critical issues including integration challenges and security concerns, and illuminates CRM's key role in the 24/7/365 real-time business revolution. CRM in Real Time is an essential guide for any organization seeking to maximize customer relationships, coordinate customer-facing functions, and leverage the power of the Internet as business goes real time.

Teacher Mediated Agency in Educational Reform in China Prenada Media

An essential toolkit for language teachers who need to design language courses for working professionals, vocational schools, undergraduate and graduate students. *Needs Analysis for Language Course Design* is a handbook for those who prepare and teach courses in ESP. The book shows the reader how needs analysis can be used to create a detailed profile of the professional learner and how this profile can then be used to tailor make a course in language and communication for working professionals and for those studying towards a professional or vocational qualification.

Essential Topics in Applied Linguistics and Multilingualism Cambridge University Press

This book examines teacher agency in implementing English as a Foreign Language (EFL) curriculum reform in the Chinese university context. It theorizes the concept of teacher agency from a sociocultural theory perspective and draws on a study conducted in a conservative and less developed area in China. The book uses Engeström's activity theory and Vygotsky's concept of the Zone of Proximal Development (ZPD) to understand the nature and extent of teacher agency in adapting one's teaching with respect to beliefs, knowledge and instructional practices. The study concludes that curriculum reform in China needs to shift from reliance on 'top-down' policies to 'bottom-up' implementation that mobilizes local understandings and practices. One of the implications of this

study is that transformative teacher education programs aimed at developing teacher pedagogical agency require that teachers have ongoing opportunities to design, develop and evaluate curriculum-based mediational means.

A Guide to Getting More Out of What You Put Into Your Training Springer

Designed for pre-service teachers and teachers new to the field of ELT, Volume II and its companion are companion textbook, Volume I, are volumes organized around the key question: What do teachers need to know and be able to do in order for their students to learn English? Volume I covers the characteristics of the context in which teachers work, how English works and how it is learned, and the teacher's role in the larger professional sphere of English language education. Volume II covers the three main facets of teaching: planning, instructing, and assessing. The focus throughout is on outcomes, that is, student learning. The texts work for teachers across different contexts (countries where English is the dominant language, one of the official languages, or taught as a foreign language); different levels (elementary/primary, secondary, college or university, or adult education), and different learning purposes (general English, workplace English, English for academic purposes, or English for specific purposes).

Areas, Methods and Trends Routledge

This book is entitled Syllabus Design for English Language Teaching which was written and developed based on a research "Communicative Competence Based Syllabus Design for Speaking Course One for Students of The English Department". It mainly provides detailed elucidation of the process of designing a syllabus as one of systematic steps of curriculum development in language teaching. Curriculum development in language teaching should be done since it implies an effort carried out by the language teachers to improve the quality of language teaching

through some stages of systematic planning such as a needs analysis, formulation of learning objectives, development of syllabus and teaching materials, teaching materials' implementation as well as evaluation to find out the effectiveness of the curriculum by taking into account the achievement of learning goals in language teaching program. This book generally includes some information on the discussion of: (1). The status of English in the education system of Indonesia and the outcomes of English teaching all this time according to researchers in the field of language teaching; (2). The distinction between the terms of curriculum and syllabus therewith the syllabus design theory from the standpoint of ESP and Language Program Development; (3). Theory of needs analysis as the main cornerstone in the development of syllabus design; (4). The concept and the theory of communicative competence based syllabus design; (5). The systematic stages in designing a competency-based syllabus ranging from preliminary stages with the needs analysis, the stage of teaching materials development, as well as the stage of reviewing the learning outcomes; (6). A practical example of a study which is presented to make the readers clearly understand how to apply the stages of developing the communicative competence based syllabus design Buku Persembahan Penerbit PrenadaMedia

ICLLE 2019 SAGE

This book demystifies the process of planning a community intervention, using clear and simple language to aid students understanding .

Advancing Methodology and Practice Cambridge University Press

The book contains a unique and refreshingly new perspective on education, training and development (ETD) practices in the 21st century workplace context. It moves away from merely revamping known and traditional principles of ETD to providing

the reader and student with practical tools and new perspectives on the changing and broadening role of the ETD practitioner in the workplace. It contains new and transformative models, practical applications and guidelines for students and readers on the South African outcomes-based approach to ETD, the profession and practice of ETD, including quality assurance aspects.

A Holistic Approach to ESP Springer Nature

What services should a modern university language centre offer its clients: students, departments, and faculties? How can language centres find out more about the language needs of the different actors at University level? The book pursues a double purpose: first, it offers a coherent theoretical framework for conducting a multiperspective, mixed-mode foreign language needs analysis in a university context. Its second purpose is to show in very detailed analysis what the practical results and consequences of such an analysis can be. After a critical view of data collection methods in foreign language needs analysis, the authors describe the framework of the Leibniz Universität Hannover, a German university dedicated to the process of internationalisation. The book examines and evaluates in detail the results of a foreign language needs analysis conducted among approximately 18,000 students and 1,800 staff members at that university. Finally, the book demonstrates how the results of such an analysis inform a re-evaluation of language course programmes and language services within the university context.

August 12-14, 1991 Routledge

1 The origins of language curriculum development 2 From syllabus design to curriculum development 3 Needs analysis 4 Situation analysis 5 Planning goals and learning outcomes 6 Course planning and syllabus design 7 Providing for effective teaching 8 The role and design of instructional materials 9 Approaches to evaluation.
